Contents

Chapter 1 Introduction and definition of research objectives

1.1 Introductory remarks *11*
1.2 Definition of research objectives *12*
1.3 References *14*

Chapter 2 Normal development and anatomy of fetal lungs and thorax

2.1.1 Developmental aspects of the lungs *15*
2.1.2 Normal sonographic appearance and anatomy of the fetal lungs *17*
2.1.3 Lung biometry *17*
2.1.4 Lung echogenicity *18*
2.1.5 Colour coded Doppler imaging of the normal pulmonary circulation *18*
2.2 Fetal thoracic wall *19*
2.3 References *20*

Chapter 3 Abnormal development of (intra)thoracic anatomy
Developmental, sonographic and clinical aspects

3.1 Pulmonary hypoplasia *25*
3.2 Hydrothorax (chylothorax) *27*
3.3 Congenital cystic adenomatoid malformation of the lung *28*
3.3.1 Prenatal diagnosis of congenital cystic adenomatoid lung malformation: a report of seven cases (Prenat.Diagn.1993: 13, 65-71) *29*
3.4 Bronchopulmonary sequestration *35*
3.5 Bronchogenic cyst *36*
3.6 Mediastinal teratoma *37*
3.7 Congenital diaphragmatic hernia *37*
3.7.1 Prenatal diagnosis of congenital diaphragmatic hernia: a retrospective analysis of 28 cases (Prenat.Diagn.1994: 14, 187-190) *40*
3.7.2 Colour coded Doppler ultrasound and diaphragmatic hernia *45*
3.8 Fetal thoracic wall abnormalities *46*
3.9 References *48*

Chapter 4 **Normal development and anatomy of the fetal abdomen**

4.1.1 Developmental aspects of the anterior abdominal wall *61*
4.1.2 Normal sonographic appearance of the fetal anterior abdominal wall *61*
4.2.1 Developmental aspects of the gastrointestinal tract *62*
4.2.2 Normal sonographic appearance of the fetal gastrointestinal tract *64*
4.3.1 Developmental aspects of the renal tract *65*
4.3.2 Normal sonographic appearance of the fetal renal tract *67*
4.3.3 Fetal renal biometry *68*
4.4 Colour coded Doppler imaging of the normal (intra)abdominal vasculature *69*
4.4.1 Materials and methods *70*
4.4.2 Normal intra-abdominal vasculature *70*
4.5 References *74*

Chapter 5 **Abnormal development of (intra)abdominal anatomy**
Developmental, sonographic and clinical aspects

5.1 Fetal abdominal wall defects *79*
5.1.1 Prenatal diagnosis of fetal abdominal wall defects: a retrospective analysis of 44 cases (Prenat.Diagn.1996: 16, 411-417) *81*
5.2 Obstructive bowel disease *91*
5.2.1 Prenatal ultrasonic diagnosis of obstructive bowel disease: a retrospective analysis (Prenat.Diagn.1994: 14, 1035-1041) *93*
5.3 Renal tract anomalies *102*
5.3.1 Renal agenesis *102*
5.3.2 Renal cystic disease *103*
5.3.2.1 Polycystic kidney disease *103*
5.3.2.2 Multicystic dysplastic kidney disease *104*
5.3.3 Obstructive uropathy *105*
5.3.3.1 High-level obstructive uropathy *106*
5.3.3.2 Low-level obstructive uropathy *107*
5.3.4 Renal tumours *109*
5.4 Colour coded Doppler ultrasound and (intra)abdominal structural anomalies *109*
5.4.1.1 Renal tract anomalies *110*
5.4.1.2 Fetal renal artery flow velocity waveforms in the presence of congenital renal tract anomalies (Prenat.Diagn.1993: 13, 545-549) *111*
5.4.2 Abdominal wall defects *115*
5.4.3 Gastrointestinal obstructions *116*
5.4.4 Intra-abdominal cysts *116*
5.5 References *117*

Chapter 6 **Fetal thoracic and abdominal structural pathology and growth**

6.1 Structural pathology in small-for-gestational age pregnancies *137*

6.2 Tertiary centre referral of small-for-gestational age pregnancies; a 10-year retrospective analysis
(Prenat.Diagn.1994: 14, 105-108) *141*

6.3 References *148*

Chapter 7 **General conclusions** *153*

Summary *157*

Samenvatting *161*

Dankwoord *165*

Curriculum vitae *167*
