INDEX

Page numbers followed by a lower case n refer to footnotes in text.
Page numbers in italics refer to illustrations.

A

Acceleration principle, 129-130, 132-133, 152-153, 215-229
  Aftalion, A., 215
  Bickerdike, C. F., 215
  Bouniatian, M., 215
  Carver, 215
  Chait, B., 215
  Clark, J. M., 129-130, 152-153, 215, 218, 225
  correlation aspect, 220-228
  Fanno, 215
  Harrod, R. F., 215
  Kuznets, S. S., 215, 225, 227
  Mitchell, W. C., 225
  Pigou, A. C., 215
  regression aspect, 220-228
  Robertson, D. H., *223*, 229n
  Staehle, H., 219, 220
  statistical evidence on, 215-229
Aftalion, A., 215
Allen, R. G. D., 91, 94-95, 247
Amplitude of fluctuations, 48
Autocorrelation, 63, 66, 204
  Marschak, J., 204

B

Bean, 127-128
Bentzel, R., 190n, 203
Bickerdike, C. F., 163, 215
Black, W. E., 101
Bouniatian, M., 215
Bowley, 94-95
Brown, A. J., 137-138, 163
Building cycle, 147-148
  Derksen, J. B. D., 148
Bunch maps, 81-83, 199
Business-cycle movements (*see* Acceleration principle; Fluctuation; *and* Movement, business-cycle)
Business-cycle theory, system of arrows, 38

C

Carver, 215
Cassel, G., 30n, 42, 114, 125
Chait, B., 91, 215
Chang, Tse-Chun, 99, 134-136, 232
Chisquare test, 64
Clark, Colin, 149, 155-156
Clark, J. M., 129-130, 152-153, 215, 218, 225
Cobweb theorem, 145-146
  Hanau, A., 146
Cohen, Ruth, 104
Commodities, characteristics of, substitute, and complementary (*see* Demand relation, determination of)
Comparative-static system(s), 155-156
  Kaldor, N., 155
  relations, 155-156
  Stone, R. and Jackson, E. F., 155n
Comparative statics, 46
Complete system(s), 29, 99, 161-188
  definition of, 39
  description, 37-43
  movements of, 43-49
    elimination of variables, 44-45
      final equation, 45
      kinds of, 47
      terms, kinds of, 46-47
    structure, 39, 40, 41
    system of arrows, 38
Components of time series, 53-57

Conclusions in regression analysis, 84-88
Connection between relations (*see* Relation(s), connection between)
Correlation, criteria, coefficient of, 68
  index of, 68
  ratio of, 68
Correlation
  high, 67 (*see also* Acceleration principle, correlation aspect)
  linear, 67-68
  low, 67 (*see also* Acceleration principle, correlation aspect)
  nonlinear, 67
  normal (*see* Correlation, linear)
  simple, 66-74, 82, 84, 193
Correlation analysis, 7, 193-214
  multiple, 8, 75-80, 193-197
    Fisher, R. A., 198
    Frisch, Ragnar, 196, 198-199
    Koopmans, T., 196-197, 199-200, 201n
  reduced form, 43, 84, 202-204
  simple, 66-74, 193
  uncertainty in results, 197-200, 205-206
  use of, 193-214, 234-245
    Hall, R. L., 214
    Hitch, C. J., 214
    Iversen, 209
    Klein, Lawrence R., 213
    Schut, M. J., 213n
    Verdoorn, P. J., 213
    von Mises, L., 214
    Witteveen, H. J., 214
    Wold, H., 209
Correlation coefficient, 68-69
Correlation index, 68-69
Correlation ratio, 68-69
Cost curve(s), 117-125
  macroeconomic, 119-125
  microeconomic, 117-119
    Dean, 118
Cost(s), marginal and production (*see* Supply relation(s), determination of)
Cournot, A. A., 9, 71
Cumulated variable(s), 21-26
Curve-fitting, 7
Cyclical fluctutation(s), 53, 206-209 (*see also* Acceleration principle)
  determination of, 64-66
  Iversen, 209

D

Dalmulder, J. J. J., 113n
Davis, H. T., 247
Dean, 118
Decision model, 161-188
  alternatives, 162-169
  approach(es) Bickerdike, C. F., 163
    Brown, A. J., 163
    Faxén, K. O. and Savosnick, K., 163
    Keynes-Machlup-Meade, 163
    Metzler, L. A., 163
    Neisser, H., 163
    Polak, J. J., 163
  Derksen, J. B. D. and Rombouts, A. L. G. M., 168n
  description of, 162-169
  devaluation, 177-179
  elasticity of demand, coefficients of, 173-178, 180-181, 184-187
  equation(s), 163-168, 173-178, 180, 185-187
  equilibrium development, 161-188
  optimum solution, 179-184
  parameter(s), 170-188
  price policy, isolated, 176-177
  Tinbergen, J., 168n
  variables, boundary conditions, 170-171, 174
    choice of, 165-171
  wage policy, isolated, 173-175
de Lange, W. P., 125
Demand curve(s), 71-74, 109-116, 129-133
  agricultural products, 99-105
    Moore, 99
    Schultz, 99, 100-101, 103, 104
Cassel, G, 30n, 114
Cournot-case, 71

Demand curve(s)—*(Cont.)*
Dalmulder, J. J. J., 113n
dynamic, 107-109, 113-114
exponential, 29
foundations of, 114-116
Frisch, Ragnar, 114-116
Wald, 116
industrial products, 107-109
investment fluctuation(s), 129-133
acceleration principle, 129-130, 132-133
services, 105-107
shifting, 8
Tinbergen, J., 113n
Walras, 30, 31
Demand elasticity, coefficients of, 28-29, 101-112, 173-178, 180-181, 184-187, 220
Demand equation(s), 26-29, 164-166, 168, 173-178, 180, 185-187, 196, 200-202 (*see also* Relation, demand)
exponential form of, 29
linear form of, 27-28
Demand relation(s), 16, 92-116, 130-133, 163 (*see also* Equations, demand)
connection with price-fixation relation, 30-37
derivation of, 92-93
determination of, 17-18, 105-110
Engel curve(s), 92-99
formula(s), 93-99
Derived economic laws, 45
Derksen, J. B. D., 109, *110*, 133, 148, 168n
de Wolff, P., 36n, 97, 109
Differential method (*see* Random change, determination of)
Douglas, P. H., 120-121, *122*-123, 125
Dupriez, 91
Dynamic method, definition of, 14
Dynamic relation(s), 22-26, 107-109, 113-114
cumulated variable in, 22-26
influence(s), psychological, on form of, 23-26
Dynamic relation(s)—*(Cont.)*
influence(s)—*(Cont.)*
in gradually changing relation, 25-26
time-lag, 22-26

E

Echo principle, 144-145
Meuldijk, J., Jr., 144-145
Econometric research, results of, 89-157
use of, 161-190
Econometric Society, 9
Econometrics, advantages and disadvantages, 3
definition of, 3
relationship to economics and statistics, 3-10
research, in economic policy, 161-245
results of, 89-157
working methods of, 11-88
Economic policy, 159-190
directive(s), 171-172
econometric research in, 161-245
instrument(s), 171-172
purpose of, 49-50
strategy of, 171-172
Morgenstern and Von Neumann, 172
Economic system(s), functioning of, 143-157
Economics, definition of, 3
disadvantages, of mathematical economics, 5
of qualitative methods, 4
mathematical, formulation of, 13-50
function of, 13-17
method, dynamic, 14
static, 14, 15
relationship to econometrics, 3-10
Edelberg, V., 121
Ehrke, *119*
Elasticity, demand, 28-29, 100-112
coefficients of, 28-29, 100-112, 168, 173-178, 180-181, 184-187, 220

Elasticity, demand—*(Cont.)*
coefficients of—*(Cont.)*
Black, W. E., 101

turnover, 26-29, 202
Equilibria, stable and unstable, 49-50
Equilibrium development, 50, 161-188
stable and unstable, 50
Equilibrium value, 46
Evans, E. G., 247
Exponential form of equations (*see* Equation, exponential form of)
Exponential line (*see* Trend, mathematical)
Extrapolation, numerical, 44, 45, 207
Ezekial, M., 75-76

F

Fanno, 215
Faxén, K. O., 163
Final equation, 45
Fisher, Irving, 232
Fisher, R. A., 80, 83, 112, 198
Fluctuation(s), amplitude of, 48
building cycle, 147-148
causes of, 143-155
cobweb theorem, 145-146
cyclical, 53, 64-66, 209 (*see also* Acceleration principle)
echo principle, 144-145
hog cycle, 145-146
investment, 129-133
long-term, 112, 119-120, 231-245
market, 143-148
moving average, 56
profit, 219
seasonal, 54, 55, 64-66, 102
short-term, 112, 119
property of, 57
Foreign trade elasticity (*see* Elasticity, substitution)
Free competition (*see* Organization of market)
Frequency distribution (*see* Probability distribution)
Frisch, Ragnar, 80-83, 91, 104, 114-116, 148, 161, 184, 196, 198-199, 200
Frisch, Ragnar—*(Cont.)*
decision model, 161-188
dynamic method, definition of, 14
Function(s), homogeneous, 20
linear, approximation of, 20
use of, 27, 34

G

Gauss curve, *58, 60*
Gauss law, 60, 61, 62, 80
Gauss-Laplace law, 60, 61
Geographic method, 106-107, **121,** 123
Girshick, M. A., 104, 155
Goudriaan, 106n

H

Haavelmo, T., 83, 98, 104, 155, 200, 201
Hall, R. L., 214
Hanau, A,, 128, 146
Harrod, R. F., 215
Harvard-barometer, 6
Hicks, 91
High correlation, 67, 70 (*see also* Acceleration principle, correlation aspect)
Hinshaw, R., 232n
Historic method, 121, 123
Historical graph(s) (*see* Simple correlation, graphical methods)
Hitch, C. J., 214
Hoffman, *225, 227*
Hog cycle, 145-146
Hanau, A., 146
Homogeneous function, 20
Horizon (*see* Time factor in relation)
Horner, S. L., 107n
Hotelling, H., 103-104

I

Ignatius, J. G. W., 101
Indifference surfaces, 114-116
Integral method (*see* Random change, determination of)
Investment fluctuation(s), 129-133
acceleration principle, 129-130, 132-133

Investment fluctuation(s)—*(Cont.)*
interest rate, 130-133
Zimmerman, 133
Iversen, 209

J

Jackson, E. F., 155n
Juglar (*see* Wave, classification by Schumpeter)

K

Kaldor, N., 155
Kalečki, M., 148-149, 157n
Keynes, J. M., 95, 96n, 97, 109, 137
analysis, 164
Kitchin (*see* Wave, classification by Schumpeter)
Klein, Lawrence R., 104-105, 154, 213
Kondratief (*see* Wave, classification by Schumpeter and long business-cycle)
Koopmans, T. C., 83, 84, 129, 196-197, 199-200, 247
Kuznets, S. S., 215, 225n, 227

L

Least squares method of calculation, 70, 76, 83, 84, 111, 199, 200-204 (*see also* Haavelmo, T.)
multiple correlation, 76, 84, 99
simple correlation, 70
Leontief, W. W., 91
Linear approximation, 95
Linear correlation, 67-68, 194-195, 205
Linear function, cumulated variable, example of, 20
equation(s), 20, 27
use of, 27, 34
Link relatives, 60
Logistic curve (*see* Trend, mathematical)
Long-term fluctuation(s), 112, 119-120, 231-245
Long-term influence (*see* Time factor in relation)
Low correlation, 67, 70 (*see also* Acceleration principle, correlation aspect)

M

MacDougall, 241
Macroeconomic investigation(s), 33-37
definition of, 33
examples, 34-37
linear function, use of, 34
Macroeconomic problem, 14
Magnitude(s) (*see* Variable)
Marginal utility, 114-115

price-fixation, 30-33, 138, 163
regression, 69
structural, 40, 42-43, 84, 194-204
Relations—*(Cont.)*
structural—*(Cont.)*
reduced form, 43, 84, 202-204
variables in, kinds of, 42
supply, 16, 26-29, 127-129, 138-141, 200-202
time factor in, 22-26, 70, 231-245
time-lag, 145-147, 149-153, 201-203, 231-245
turnover (*see* Equation, turnover)
variables, choice of, 17, 165-171
Residual(s), 68, 82, 84
Robertson, D. H., *223*, 229n
Robinson, Joan, 163
Rombouts, A. L. G. M., 96, 133, 168n
Roos, C. F., 107-109
Roy, 101, 105, 106

S

Savosnick, K., 163
Scatter diagram(s), 75-76, 77, 240 (*see also* Simple correlation, graphical methods; Multiple correlation, graphical methods)
Schultz, 99, 100-101, 103, 104
Schumpeter, J. A., 55
Schut, M. J., 107n, 213n
Seasonal fluctuation(s), 54, 55, 102
correction for shifting season, *65*-66
determination of, 64-66
additive, 64
multiplicative, 64, *65*
Wald's method, 64
Separate market(s), 143-148
building cycle, 143, 147-148
echo principle, 143, 144-148
hog cycle, 143, 145-147
Short-term fluctuation(s), 112, 119
property of, 57
Short-term influence (*see* Time factor in relation)
Simple correlation, 66-74, 82, 84, 193
application, 71-74
demand or supply curves, 71-74
cases requiring correction, 73-74

Simple correlation—*(Cont.)*
application—*(Cont.)*
demand or supply curves—*(Cont.)*
cases requiring no correction, 72
graphical methods, historical graphs, 66-71
scatter diagrams, 66-71
least squares method, 70
regression line(s), 67, 69, 70
residual(s), 68, 82, 84
Simultaneous equation(s), 83-84, 98, 104, 111, 113n, 162, 200-204
Bentzel, R. and Wold, H., 190n, 203
Haavelmo, T., 83, 98, 200, 201
Slutsky, E., 103-104, 151
Smit, 104
Smith, Adam, 9
Snyder, C., *124*-125
Staehle, H., 97, 219, 220
Stamp, *225*
Standard deviation, 53, 112, 198
Fisher, R. A., 112
Static method, application of, 15-16
definition of, 14
Statistical testing, 51-88
Statistics, definition of, 5
disadvantages, of quantitative knowledge, 6
mathematical, correlation analysis, 7
curve-fitting, 7
purpose of, 8
purpose of, 8, 66, 68-71
checking, 68-69
measuring, 69-71
relationship to econometrics, 3-10
Stone, R., 96, 97, 155n
Stone, W. M., 96, 97
Straight line (*see* Trend, mathematical)
Structural break(s) (*see* Random change)
Structural relation(s), 40, 42-43, 84, 194-204
reduced form, 43, 84, 202-204
variables in, kinds of, 42
Structure of complete system(s), 39, 40, 41
Supply curve(s), 71-74, 127-129
Cassel, G., 30n
exponential, 29
monopolist's (*see* Organization of market)
Walras, 30, 31
Supply equation(s), 26-29, 200-202
exponential form of, 29
linear form of, 27-28
Supply relation(s), 16, 26-29, 127-129, 138-141, 200-202
connection with price-fixation relation, 29-37, 138
determination of, 18-19, 30-33
System of arrows, 38

T

Technical development, 123-125
Technical relations, 117-125
Testing, statistical, 51-88
Time factor in relation(s), 22-26, 70, 231-245
horizon, 24, *70*
long-term influence, 24, 231-245
short-term influence, 24, 231-236
time-lag, 145-147, 149-153, 201-203, 231-245
equation(s), 22, 23
Time graph (*see* Multiple correlation, graphical methods)
Time-lag (*see* Time factor in relation)
Time series, determination of components, 53-57
traditional, 53-54
Wagemann, E., 55
wavelength, 54
Tinbergen, J., 35n, 106n, 111, 123, 128, 130, 135, 138-141, 168n, 232n
Törnqvist, 93-94
Trend, 53, 57-60, 100
definition of, 6
mathematical, 57-60
short-term fluctuations, property of, 57
Turnover equation(s), 27, 28, 202

Tweddle, 120

V

Van den Briel, 104
Van der Schalk, 125
Van Lottum, 109, *110*
van Olst, H. Rijken, 101
van Stuyvenberg, J. H., 101-102
Van Uven, 199
Variable(s), choice of, in relation, 17-19, 100, 165-171
  cumulated, 21-26
  determination of, Frisch, Ragnar, 82-83, 114-116
  in investment fluctuations, 130-132
  predetermined, 42, 201
Verdoorn, P. J., 106n, 213
von Mises, L., 214
Von Neumann, 172
Von Szeliski, V., 107-109

W

Wagemann, E., 54, 91
Wage policy, isolated, equilibrium development, 174-175
  influence on employment 173, 175, 185-187
Wald, 64, 116
Walras, 30, 31
Walrasian market, 26
  equation(s), 26-29
Warren, G. F., 101
Wave(s), classification by Schumpeter, 55
  length, 54
  long business-cycle, 54, 55
Weinreb, F., 101
Witteveen, H. J., 214
Wold, 102-103, 104, 190n, 203, 209

Z

Zimmerman, 133
