

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Statistical Robustness . . . . .	1
1.2	Outlier Robustness . . . . .	3
1.2.1	Outlier Robustness and Semiparametrics or Nonparametrics . . . . .	5
1.2.2	Outlier Robustness and Diagnostics . . . . .	6
1.2.3	Outlier Robustness and Dummy Variables . . . . .	7
1.3	Outlier Robust Statistics and Econometrics . . . . .	8
1.4	Summary of the Contents . . . . .	10
1.4.1	An Introduction into Robust Techniques . . . . .	10
1.4.2	Univariate Unit Root Testing . . . . .	11
1.4.3	Multivariate Unit Root Testing . . . . .	13
1.4.4	Notational Conventions used in this Thesis . . . . .	14
<b>2</b>	<b>A Brief Introduction to Robust Statistics</b>	<b>15</b>
2.1	Outliers . . . . .	15
2.1.1	Definition of Outliers . . . . .	15
2.1.2	Classification of Outliers . . . . .	17
2.2	Robustness Assessment . . . . .	20
2.2.1	Estimators as Functionals . . . . .	20
2.2.2	Influence Function . . . . .	22
2.2.3	Breakdown Point . . . . .	25
2.2.4	Bias Curve . . . . .	27
2.3	Robust Estimators . . . . .	30
2.3.1	GM Estimators . . . . .	30
2.3.2	High Breakdown Estimators . . . . .	37
2.4	Multivariate Location and Scatter . . . . .	38
2.4.1	Low Breakdown Estimators . . . . .	39
2.4.2	High Breakdown Estimators . . . . .	40
2.4.3	Miscellaneous Remarks . . . . .	41
2.5	Model Selection and Evaluation . . . . .	42
2.5.1	Robust Model Selection . . . . .	42
2.5.2	Residual Analysis and Model Diagnostics . . . . .	43

<b>3</b>	<b>Robustness Properties of the Student <math>t</math> Based Pseudo Maximum Likelihood Estimator</b>	<b>47</b>
3.1	The Model and Estimator . . . . .	48
3.2	A Derivation of the Influence Function . . . . .	50
3.3	A Numerical Illustration . . . . .	56
3.3.1	Estimators . . . . .	56
3.3.2	Error Distributions . . . . .	59
3.3.3	Results . . . . .	60
3.4	Concluding Remarks . . . . .	66
<b>4</b>	<b>Low Breakdown Robust Unit Root Tests</b>	<b>67</b>
4.1	Introduction . . . . .	67
4.1.1	A Simple Autoregressive Unit Root Model . . . . .	68
4.1.2	Relevance of Unit Roots for Economics and Econometrics	69
4.1.3	Some Standard Unit Root Tests . . . . .	72
4.2	Some Robustness Concepts . . . . .	74
4.3	Classical Analysis . . . . .	77
4.4	A Bayesian Analysis . . . . .	86
4.5	Empirical Illustration . . . . .	88
4.6	Concluding Remarks . . . . .	97
4.A	Proof of the Proposition . . . . .	98
<b>5</b>	<b>High Breakdown Unit Root Tests</b>	<b>101</b>
5.1	Introduction . . . . .	101
5.2	Outliers and Robust Estimators . . . . .	104
5.3	Asymptotic Distribution Theory for I.I.D. Innovations . . . . .	107
5.4	Size and Power Robustness of the Unit Root Tests . . . . .	110
5.5	Application to the Extended Nelson-Plosser Data . . . . .	114
5.6	Conclusions . . . . .	119
<b>6</b>	<b>Asymptotics for Unit Root Tests Based on M Estimators</b>	<b>121</b>
6.1	Introduction . . . . .	121
6.2	An Asymptotic Analysis . . . . .	122
6.3	The Choice of the M Estimator . . . . .	128
6.4	Simulation Experiment . . . . .	129
6.5	Concluding remarks . . . . .	134
6.A	Proofs . . . . .	134
<b>7</b>	<b>Cointegration Testing Using Pseudo Likelihood Ratio Tests</b>	<b>137</b>
7.1	Testing for Cointegration . . . . .	137
7.2	Preliminaries . . . . .	145
7.3	Asymptotic Distribution Theory . . . . .	147
7.4	The Choice of the Pseudo Likelihood . . . . .	152
7.5	Obtaining Critical Values . . . . .	157
7.6	Simulation Results . . . . .	160
7.7	Model Extensions . . . . .	167

7.8	Conclusions . . . . .	169
7.A	Proofs . . . . .	170
<b>8</b>	<b>Cointegration Testing Using an Outlier Robust Wald Test</b>	<b>177</b>
8.1	The Model, the Testing Procedure, and the Hypotheses . . . . .	178
8.1.1	The Model . . . . .	178
8.1.2	The Testing Procedure . . . . .	179
8.1.3	The Hypotheses of Interest . . . . .	181
8.2	Construction of the Test Statistics . . . . .	182
8.3	Asymptotic Distribution of the Wald Test . . . . .	185
8.4	Simulation Results . . . . .	189
8.4.1	Level . . . . .	189
8.4.2	Power . . . . .	194
8.5	Ordering of the Variables . . . . .	196
8.5.1	Asymptotic Distribution Theory for $ \alpha_{11}  = 0$ . . . . .	196
8.5.2	A Pretest for $ \alpha_{11}  = 0$ . . . . .	197
8.5.3	Testing Procedures that are Independent of $\alpha_{11}$ . . . . .	199
8.5.4	Simulation Results for $ \alpha_{11}  = 0$ . . . . .	201
8.6	Concluding Remarks . . . . .	204
8.A	Proofs . . . . .	204
<b>9</b>	<b>Concluding Remarks</b>	<b>219</b>
9.1	Summary of the Main Conclusions . . . . .	219
9.2	Directions for Future Research . . . . .	222
