

# **The Extracellular Matrix for Bone Regeneration: Interplay between Mesenchymal Stromal Cells and the Bone Microenvironment**

**Marta Baroncelli**

The work presented in this thesis was performed in the Department of Internal Medicine, Erasmus University Medical Center, Rotterdam, the Netherlands. This work was financially supported by a grant from the Dutch government to the Netherlands Institute of Regenerative Medicine (FES0908). The studies described in Chapter 2 were performed in collaboration with the Department of Precision and Microengineering and the Department of Biomechanical Engineering of Delft University of Technology. The studies described in Chapter 2 and 3 were performed in collaboration with the Proteomics Center of Erasmus MC. The studies described in Chapter 5 were performed in close collaboration with the Department of Gastroenterology and Hepatology of Erasmus MC and supported by European Commission FP7 Program INTERBONE Grant PIRSES-GA-2011-295181, Erasmus Trustfonds and Fundação de Amparo a Pesquisa do Estado de São Paulo (FAPESP) (grant No: 2014/22689-3).

Publication of this thesis was supported by Erasmus University Rotterdam and by Netherlands Society for Biomaterials and Tissue Engineering (NBTE).

**The Extracellular Matrix for Bone Regeneration:  
Interplay between mesenchymal stromal cells and the  
bone microenvironment**

**Extracellulaire Matrix voor Botregeneratie:  
Interactie tussen mesenchymale stromale cellen en de bot-omgeving**

**Thesis**

to obtain the degree of Doctor at  
Erasmus University Rotterdam  
on the authority of the  
rector magnificus

Prof. Dr. H.A.P. Pols

and in accordance with the decision of the Doctorate Board.

The public defence ceremony shall be held on  
**Wednesday, 13 June 2018 at 09:30 hours**

by  
**Marta Baroncelli**  
born in Prato, Italy

**Erasmus University Rotterdam**

## **DOCTORAL COMMITTEE**

**Supervisor:** Prof. Dr. J.P.T.M van Leeuwen

**Other members:** Prof. Dr. G.J.V.M van Osch  
Prof. Dr. J. de Boer  
Prof. Dr. L.J. Hofland

**Co-supervisor:** Dr. ing. H.J. van de Peppel

To my family

## TABLE OF CONTENTS

Chapter 1	General Introduction	9
Chapter 2	Human osteoblast-derived extracellular matrix with high homology to bone proteome is osteopromotive	39
Chapter 3	Comparative proteomic profiling of human osteoblast-derived extracellular matrices identifies proteins involved in mesenchymal stromal cell osteogenic differentiation and mineralization	73
Chapter 4	A single two-day-pulse of Activin-A leads to a transient change in osteoblast gene expression and reduction in extracellular matrix mineralization	127
Chapter 5	Human mesenchymal stromal cells in adhesion to cell-derived extracellular matrix and titanium: a comparative kinome profile analysis	163
Chapter 6	General Discussion	221
Appendix	Abbreviation index	240
	Summary	245
	Samenvatting	248
	Curriculum Vitae	251
	Ph.D portfolio	252
	Publications	254
	Acknowledgements	256
