

Propositions appended to the dissertation

Functional difficulties in Craniofacial Microsomia - Breathing and Feeding -

Functionele problemen in Craniofaciale Microsomie

- Ademhaling en Voeding -

Linda Caron

1. The severity of mandibular hypoplasia defines the risk for developing obstructive sleep apnea, feeding and swallowing difficulties. (This thesis)
2. Patients with craniofacial microsomia have to be examined thoroughly for extracraniofacial anomalies. (This thesis)
3. The level(s) of obstruction, in combination with the severity of symptoms, has to play a key role in the choice of treatment for OSA. (This thesis)
4. Several factors have to be taken into account in analyzing feeding and swallowing difficulties in patients with craniofacial microsomia. (This thesis)
5. Patients diagnosed with craniofacial microsomia and cleft lip/palate have to be seen as a different subgroup. (This thesis)
6. A little nonsense now and then, is cherished by the wisest (wo)men. (Roald Dahl - 1964)
7. De voorwaarde voor geluk, is dat je wilt zijn wat je bent. (Desiderius Erasmus - 1511)
8. Normality is a paved road. It's comfortable to walk on, but no flowers grow on it. (Vincent van Gogh - 1878)
9. When I hear music, I can't make my feet behave. (Blanche Hodel - 1978)
10. It's not about the shoes, it's what you do in them. (Nike – 2008)
11. Eerst eten, zeggen die van Oosterhout. (Oosterhouts gezegde - 1863)
