

## **Propositions**

- 1: The wide application of CRISPR technology provides the opportunity to target drug resistance in cancer cells.
- 2: GCN2-ATF4-ASNS axis is an essential but not sufficient response to nutrient starvation.
- 3: SLC1A3 contributes to L-asparaginase resistance in solid cancer cells.
- 4: SLC1A3 could transport both aspartate and glutamate.
- 5: The loss of function of EP300 promoted L-asparaginase resistance in PC3 cells.
- 6: The harder you work, the luckier you will be.
7. Distance tests a horse's stamina.
8. Easier to say than to do.
- 9: A man can be destroyed but not defeated.
- 10: Life was like a box of chocolates, you never know what you will get.
11. Hope is a good thing, maybe the best of things, and no good thing ever dies.
