

Propositions pertaining this thesis

1. "Adenotonsillectomy is the first choice of treatment for obstructive sleep apnea in children with syndromic craniosynostosis in children older than 1 year of age, even in case of mild tonsillar hypertrophy." – This thesis
2. "Heart rate variability analysis has to be incorporated in the analysis of polysomnography to distinguish children with upper airway resistance syndrome and primary snoring." – This thesis
3. "Cranial vault surgery in children with intracranial hypertension decreases sleep quality in children with syndromic craniosynostosis and might be due to increased perfusion of the cortex after surgery." – This thesis
4. "Flow limitation in the superior sagittal sinus is associated with a stenotic sagittal suture." – This thesis
5. "A distended straight sinus on a cerebral MRI-scan is associated with intracranial hypertension." – This thesis
6. "In children, actigraphy can be used to measure sleep at home but overestimates night awakenings" – M. Bélanger et al., *J Clin Sleep Med*, 2013
7. "Het weigeren van niet-gevaccineerde kinderen op kinderdagverblijven creëert schijnveiligheid. Daarmee worden gevaarlijke infectiehaarden gecreëerd bij kinderdagverblijven die deze kinderen nog wel accepteren, met veel ongevaccineerde kinderen bij elkaar." – Patricia Bruining, *EenVandaag*, 2020
8. "Adolescent sleep interventions should consider assessing the impact of social media use on sleep schedules as standard" – H. Scott et al., *BMJ Open*, 2019
9. "In the developed economies of Europe, government administrators could save more than €100 billion in operational efficiency improvements alone by using big data in health care" – J. Manyika et al., *McKinsey*, 2011
10. "If it took an extra 10% longer for conscious life to evolve on earth, it wouldn't evolve at all, because it would have been incinerated by the sun" – Elon Musk, *SpaceX Starship update*, 2019
11. "Whenever I'm sad, I stop being sad and be awesome instead" – Barney Stinson
