

Propositions

1. Technological artefacts carry both neutrality and bias, as two sides of a single coin.
2. Bias in technology echoes social struggles over power, control, and ownership.
3. The abundance of consumer choice is a surface deception of the capitalist market.
4. Computational code allows impersonal delegation of personal choices.
5. The network is a new assembly line.
6. The current property regime is as unethical as slavery was.
7. Academic knowledge is abundant, yet wisdom escapes its boundaries.
8. Humans are in making.
9. Identity is a trap.
10. Dancing is a way of knowing.
11. Intelligence like mycelium connects all life forms.
