	C	

5. Several Sectors; Fixed Prices; Substitution	. 76
5.1. Model with Substitution between Factors	76
5.2. Open-economy Models	_
5.3. Models with a Structural Break	
5.4. Models with Increasing Marginal Costs	. 85
5.5. Indivisibilities	. 86
5.6. Nonlinear Partial Models	. 90
6. Several Sectors; Variable Prices	93
6.1. Two-sector Model for Terms of Trade	. 93
6.2. Open-economy Input-Output Model with World-demand Equations	. 94
6.3. Nonlinear Cost Functions	
6.4. Other Demand Functions	. 97
6.5. Alternative Techniques: a Linear Programming Model	. 97
7. Several Sectors and Several Regions	100
7.1. Rigid Distribution of Inputs over Sectors of Origin	100
7.2. Transportation Costs Neglected; Prices Varying between Regions.	. 104
7.3. Static Models with Transportation Costs	. 106
7.4. Development Model with Transportation Costs	. 109
8. Some Critical and Concluding Remarks	. 113
8.1. Some Critical Remarks on the Present State of the Discipline	. 113
8.2. Some Practical Suggestions	. 116
Appendix. Symbols Used	. 119
Bibliography	. 127
Index	199
