INDEX

Accounting interest rates, 43
Accounting prices, 41
Accounting sector, 42
Accounting wage rates, 43
Adaptation period, 56, 62, 68, 116
Aims of policy, 2, 47, 113
Alternative techniques, 97
Analytical problems, 1, 20, 70
Applicability, practical, 8
Appraisal, of investment projects, 87
of road construction, 107
Approximations, successive, 9
Autarchy, 114

Balance-of-payments equilibrium, 63
Banerji, H., 30n.
Baumol, William J., 55n., 64n.
Bos, H. C., 109n.
Boundary conditions, 26, 28, 83, 115
Break, structural, 84

Capacity of equipment, 18, 60
Capital in models, 11, 13, 17
Capital coefficients, partial, 67
(See also Capital-output ratio)
Capital goods, first-order, 57
one, 62, 63, 65
second-order, 56
several, 67
Capital intensity, 38, 45
Capital-output ratio, 12, 16, 40, 41, 54
gross, 18

Chenery, Hollis B., 14n., 101
Closed economy, 52
Cobb-Douglas production function, 11, 32, 38, 40
generealized form, 32
Comparative advantages, 80, 95
Complementarity, 65
Coordination in planning, 5
Cost curves, nonlinear, 90, 96
Cyclical setbacks, development without,
20, 70, 71

Data, 1
Decreasing abstraction, 52
Decreasing marginal costs, 85
Degrees of freedom, 2, 76, 103
Deliveries, interindustry, 82
Depreciation, 17
Development, without cyclical setbacks,
20, 70, 71
optimum rate of, 24, 115
Diminishing returns, 85
Discount, 25, 90
Demar, Eusey D., 15, 54, 59
Dorfman, R., 68n., 97n.

Economies of scale, 33
Efficiency, 32, 39
Elasticity, of production, 32, 39
of supply, 33, 40
Empty sector, 11, 64, 84
Engel curves, 53
Equipment, 17

Financial equilibrium, internal, 63
Finite substitution in elasticity of demand, 107, 110
First-order capital goods, 57
Fixed prices, assumption of, 13
Fixed targets, 2
Flexibility of marginal utility, 25
Flexible targets, 2
Forecasting vs. planning, 4, 70
Frisch, Ragnar, 25

Geographical subdivision of economy, 100
Gestation periods, 12, 53, 115
different, 72
macromodel, 27
nonuniform, 83
uniform, 65, 67
Gross investment, 17
Gross product, 16

Harrod, R. F., 15, 54, 59
Horizon, 26

Idle capital goods, 57
Imperfect markets in models, 104
Income distribution, 40
Increasing marginal cost, 85, 96
Increasing returns, 85, 97
Individuabilities, 85, 86, 97
Industrialization, 84
Industries, 11
Infinite substitution in elasticity of demand, 107
Input-output relations, 65, 67
with different lags, 72
with variable coefficients, 73
with world-demand equations, 94
Inputs, rigid distribution of, 100
Instruments of economic policy, 1, 70
Interindustry deliveries, 52
International trade, 13, 63, 80
Intertemporal substitution, 13
Investment, 11

Investment, finished, 22
Investment process, 24
Investment projects, appraisal of, 87

Justice between generations, 31

Kells, Lyman M., 18n., 22n., 59n.
Koyck, L. M., 108n.

Labor in models, 11
Labor-intensive processes, 45
Labor productivity, 38
Lags (see Gestation periods)
Lathes and looms example, 58
Leontief, W. W., 101n.
Lifetime of capital goods, 17
Linear programming technique, 97, 114
Looms (see Lathes)

Mathematical economists, role of, 5, 7
Macromodels, 17, 22
Mahalanobis, P. C., 77
Marginal costs, 85, 96
Market interest rates, 43
Market wage rates, 43
Mathematical models (see Models)
Maximization of income, 77, 81, 84, 90, 96, 106

Maximum level of consumption, 25
Means of economic policy, 1, 115
Minimum level of consumption, 24
Mobility, of factors, 101
of products, 101
Models, conditions of applicability, 8
as core of programming, 4
elements of, 6, 10
Moses, L. N., 101n.

National sector, 11, 101
Nonlinear partial models, 90, 96, 97

Ohlin, B., 100
Open country, 16, 63, 80, 93, 94
Optimum rate of development, 24, 115
Order of capital goods, 12, 58
INDEX

Order, economic, and means of policy, 3
Organization in planning, role of, 5

Partial models, 10, 84, 90
Planning, 4
  in stages, 3, 7, 9, 10, 54
Policy or political problems, 1, 2, 20, 36
  aims of, 2, 47, 113
  instruments of, 1, 70
  means of, 1, 115
Population, 33, 36
Prestige to balanced growth, 114
Prices in models, 12, 101, 104
Priority to heavy industry, 114
Processes, 11
Production function, 11, 32, 38, 40
Programming, 4
  present state of, 113
  suggestions on, 116
Projects, investment, appraisal of, 87

Qayum, A., 42

Regional sector, 11, 101
Regions, 100
  prices varying between, 104
Replacement, 17
Road construction, appraisal of, 107

Samuelson, P. A., 63n., 97n.
Sandee, J., 98
Saturation level of consumption, 25
Savings ratio, 16, 24n.
Second-order capital goods, 87
Second-stage planning problem, 54, 81
Sectors, 11
  empty, 11
  national, 11, 101
  regional, 11, 101
Short-term adaptations, 116
Smooth development, 20, 70, 71
Social utility function, 2
Social welfare function, 2, 3
Solow, R. M., 63n., 97n.
Specialization, 82, 103
Specificity of capital goods, 12, 56
Stages, planning in, 3, 7, 9, 10, 54
Structural break, 84
Subsidies (labor), 45
Substitution, 76, 107, 108
  continuous, 32
  forms of, 13
  restricted, 45
Successive approximations, 9

Target variables, 2
Tax (capital), 45
Technological change, 37
Technological possibilities, curve of, 38
Technology, "most advanced," 115
Terms of trade, 93
Timbergen, J., 14n., 106n.
Transition period, 56, 62, 68, 116
Transportation coefficients, 107
Transportation costs, 91, 101, 106, 110
Two-sector model, 93

Utility of consumption, 24
Utility function, social, 2

Variables, choice of, 3
  endogenous, 6
  target, 2
Verdoorn, P. J., 41n., 93n.

Wage level, "normal," 33
World demand, role of, 95, 104
