Acknowledgments

I am grateful to all my colleagues at the Netherlands Economic Institute for their valuable help and suggestions; a special word of thanks to Mrs S. van Willigenburg who typed the manuscript and to Mr W. Cristofoletti who drew the first sketches of the diagrams. My thanks are also due to Mr T. Stalker Miller who drew the diagrams and the map. The frontispiece was supplied by the International Bank for Reconstruction and Development (photo Jack Ling).

Material for the diagrams was drawn from the following sources:
