SUBJECT INDEX

Acceleration principle, 17
Accounting prices, 26
Actual Openness, 271, 272
Agglomerations, 12
Agglomeration effects, 235, 236
Aim function, 18
Aims of economic policy, 16
Aim variables, 17
Artificial basis technique, 72

Balance equations, 17
Basic feasible solution, 39-43, 60, 100, 123
Basic Model, 169, 170, 180, 185, 188, 192
Basic variables, 40
Benefit-cost ratio, 236
Binding constraints, 82
Bottle necks, 18
Brasilia, 248
British Preference, 271

Capital coefficients, 268
Capital-income ratios, 86, 268
Capital-output ratios, 266
Centres, 12, 213, 214, 216, 218, 219
  –, changes in a system of, 249
  –, composition of, 218, 220, 232, 233, 238
  –, group of, 215
  –, number of 221, 223,
  –, of consecutive rank, 224
  –, percentage, 240, 241
  –, rank of, 251, 218, 229, 232, 233, 238
Choice of technology, 22
Column minimum method, 44, 61
Communication, 4, 146
Commuting, 244
Comparative advantages, 19, 25, 33
Comparative statics, 171
Complementarity, 24
Consistency, 52, 197, 281, 282, 287
Continental distribution problem,114, 118, 122, 123, 125, 132, 133, 293
Continental goods, 5
Continents, 29
Convexity, 289, 290, 293
Corresponding distance, 270
Corresponding region, 269
Cost figures (coefficients), 33, 36, 111, 160, 200, 211, 318, 319
Country percentage, 240, 241

Dairy industry, 229
Decomposition, 73-75, 113-115, 132, 155, 164, 181, 197, 203, 280, 288, 290
Definitional equations, 17
Degenerate solution, 62, 130
Degrees of freedom, 57, 59, 69
Diffusion of the export function, 241
Distance factor in economics, 10
Direct costs, 42
Direct cost figures, 40, 105
Direct instruments, 251
Discount rate, 26
Domestic goods, 6, 9

Econometric model, 17
Economically active population, 159, 260
Economic lifetime, 244
Economies of scale, 85, 211, 229, 241, 255
Educational facilities, 252
Employment model, 67
Employment opportunities, 254

Employment-output ratios, 67
Employment target, 67, 168
Estimated Actual Openness, 271, 272
Euphratis, 247
Existing centres, 246, 248
External effects, 8
Factors of production, 21
Feasible area, 18
First basic feasible solution, 40, 43, 45, 48, 57, 62, 72, 78, 100, 102, 132

Gaussian elimination procedure, 165
General Model, 169-172, 174, 180, 181, 188, 191, 192
Generalized input-output coefficients, 233
Gestation lags, 20
Groups of industries, 219-221, 223, 225

Harrod-Domar model, 17
Heavy goods (products), 4, 6, 20, 39, 89, 90, 92, 93, 108, 111, 134, 183, 296, 313
Heavy mobile product, 94
Heavy transport, 185, 188, 193, 194, 205
Heavy world sector, 96
Hexagon, 12, 224
Historical model, 86, 87
Hitchcock problem, 38, 44, 46, 58, 62, 73, 82,83, 109
Hierarchy hypothesis, 215, 233, 236, 238, 240, 242
–, and foreign trade, 227
–, and non-shiftable industries, 225
–, optimality of, 242
Hierarchical industries, 240, 241
Hierarchy model, 211, 215, 229, 248
Hierarchy of centres, 238
Homogeneity of sectors, 51

Immobile products, 30, 31, 89
Immobile sectors, 30
Income increase targets, 85, 169, 207, 214
Income-output ratio, 30
Incremental capital-output ratios, 31, 226
Incremental spatial planning, 243
Indirect costs, 42, 60
Indirect cost figures, 40, 84, 104, 105, 111, 160
Indirect cost table, 57, 58
Indirect mobility, 243
Indivisibilities, 4, 12, 211-213, 237, 238
Indus, 247
Industries of consecutive ranks, 220
Industries with heavy agricultural inputs, 229
Industry, rank of, 213-215, 232-234, 238
Inequality coefficients, 264
Infra-structural projects, 251
Initial basic feasible solution, 44, 47
Input-output analysis, 19
Input-output coefficients, 197
–, differences in, 69, 73
Input-output relations, 39, 68-70, 145, 213, 232, 286, 293
Input-output tables, 261
–, block-triangular structure of, 233, 262
–, diagonal structure of, 262
–, international comparison of, 261, 262, 266
Institutional equations, 17
Instruments for spatial planning, 250
Integer numbers, 220
Integration of countries, 84
International goods, 5, 6, 9, 53, 89, 259
International industries, 258, 262
International sectors, 52, 260
International transport, 134, 136, 174, 193
Interregional transport, 134, 174, 193
Interregional transport flows, 75, 76, 78
Intertemporal distribution of investments, 171
Intraregional transport, 174, 183-188, 193, 196, 208
Investment table, 30
Irrelevant variables, 17
Islamabad, 248
Isolation, 271

Iterations, 39, 41, 43, 45, 47
–, number of, 43, 61, 72
Iterative improvement method, 91, 114-117, 122, 125, 126, 130, 132, 133, 144, 145, 153

Labour, geographical mobility of, 254
Learning process, 35
Linear production processes, 211
Linear programming, 38, 117
Linearity, 30, 32, 53, 94, 173, 182, 183, 185, 208
Local goods, 5, 6, 259
Local industries, 258, 262
Local sectors, 260
Long-term policies, 16, 23, 250
Lower bound, 81, 84

Macro phase, 15
Macro stage, 15, 16
Major space, 5
Major-space goods, 5
Mathematical programming, 18
Matrix minimum method, 44, 61, 78, 83, 138
Maximum Potential Openness, 270
Means of economic policy, 7, 13, 16, 250
Means of transportation, 93, 148, 149, 152, 296
Means variables, 17
Mekong, 247
Micro phase, 15, 23
Micro space, 5
Micro-space products, 5
Middle phase, 15
Middle stage, 15, 16
Minor space, 5
Minor-space goods, 5
Migration, 207, 244, 246, 253, 254
Minimum efficient plant size, 212, 213, 245, 255, 256, 258
Mixed integer programming, 4, 211
Mobile products, 30-32, 89, 90
Mobile sectors, 30
Mobility, 4, 5, 11, 89, 90, 172, 208, 243, 244, 262, 269, 314
–, degree of, 4, 5

National goods, 5, 53, 89, 259
National industries, 258, 262
National planning, 49, 52, 57, 70, 73, 117, 171
National-regional planning problem, 144
National sectors, 52, 260
Natural resources, 21, 34
New region, 247
Non-heavy transport, 182-184, 186, 187, 194, 205
Non-linearity, 20
Non-shiftable activities, 7
Non-shiftable industries, 7, 86, 170
Non-tradables, 6, 10
Northwest-corner rule, 40, 41, 45, 48, 57, 59, 61, 78, 102, 138

Objective function, 18, 31, 45, 175, 291, 295
Optimal assignment problem, 45
Optimal division of labour, 35, 251
Optimal location of a new plant, 245
Optimal regime, 7
Optimal size of a city, 236
Optimal solution, 40, 41, 45, 75, 91, 107, 113-115, 117, 124, 126, 138, 154, 155, 157, 161, 165, 181, 203, 251, 287, 288, 295
Optimality, 39, 214, 281
Optimality criterion, 250

Perspective plans, 26
Piecewise linear function, 289, 290, 293
Planning problem, reversion of, 21, 31, 32, 268
Planning in stages, 15, 172
Pre-determined zero activities, 47, 61, 86
Potential Openness, 270, 271
Primary industries, 246, 248
Primary restrictions, 37, 57, 72, 175
Processing industry, 232
Production cost coefficients, 113

Production costs, 11, 31, 124, 132, 136, 212, 214, 318, 319
–, differences in, 7
Production distribution problem, 108
Production units, number of, 218, 223
Production variables, 101, 115, 121, 124, 138, 155-157, 164, 165, 175, 182, 188
Project appraisal, 247
Project stage, 23, 261
Proportionality, 33, 53, 54, 69, 93, 135, 173, 188, 208, 211

Rank of industry, 213-215, 232-234, 238
Raw material industry, 232
Reaction equations, 17
Regional capital-output ratios, 236
Regional distribution problem, 171
Regional employment targets, 68
Regional goods, 5, 6, 53, 89, 173
Regional income distribution, 65
Regional income targets, 64-66, 86, 87
Regional industries, 258
Regional policy, 64
–, costs of, 63, 68
Regional targets, 113
Row minimum method, 44, 61

Secondary restrictions, 37, 175
Sector Stage, 18, 261
Semi-Hitchock problem, 86
Semi-input-output method, 24, 74, 261, 266
Sensitivity analysis, 65, 68
Servicing industries, 215, 246
Shadow prices, 26, 32, 68, 171, 319
Short-term policies, 16, 23, 26, 250
Shiftability, 6
Simplex method, 38, 72, 74, 84, 288
–, using multipliers, 100, 289
Simplex multipliers, 104, 118, 121, 123,125, 127, 138, 144, 157, 160, 161, 164, 165, 289
Simultaneous solution, 107-109, 111, 113, 114, 132, 137-140, 144
Size of the market, 212
Social model, 87
Space economics, 9, 10
Space unit, 2
–, categories of, 1
–, definition of, 1
–, degree of openness, 2, 84
–, order of subdivision, 3
–, size of, 2, 3
Spatial subdivision, first-order, 9
Spatial subdivision, higher order, 12
Spatial subdivision, second-order, 12, 29, 49, 89, 117, 170
Specialization, 22, 35, 80, 111, 141, 241
Squares, 224
Subsidies, 251
Subspace, 121-124
Successive solution, 91, 107-109, 111, 113-115, 117, 118, 133, 139, 140, 144, 280, 288, 290
Sugar industry, 229

Table of income increases, 36, 55, 95
Technical coefficients, 197, 200, 206, 208
Technical equations, 17
Technical units, 212
–, number of, 218, 223
Tennessee Valley Authority, 247
Time discounting, 25
Time-path, 177
Tinbergen system, 234, 235
Tradables, 6
Transportation costs, 2, 4, 20, 35, 39, 76, 89-91, 108, 111, 122, 124, 132, 134, 137, 145-148, 151, 172, 182, 212, 223, 255, 269, 288-290
Transport cost coefficients, 76, 77, 113
Transport cost/production cost ratio, 182
Transportation method, 38
Transportation problem, 38, 144, 171, 288, 289, 293
Transport variables, 92, 96, 100, 102, 108, 134, 136, 138, 157, 175, 178, 180, 181, 288, 290, 293
Transshipment problem, 78, 109, 115, 118, 121-126, 131-133, 138, 155-157, 161, 164, 165

Transshipments, 92
Triangles, 224

U-method, 109, 125
Upper bounds, 20, 39, 80-82, 84, 87,170
Uv-method, 38, 39, 45, 58, 62, 73, 75, 79 201, 284, 286

Variability, 243, 244

Weighted distribution problem, 201
World planning, 30, 89, 117
World products, 5
