Correlational finding on Happiness and Perceived happiness career
Subject code: H5.1

Study

BORTN 1974

Reported in: Bortner, R.W.; Hultsch, D.F.
Patterns of Subjective Deprivation in Adulthood.
Developmental Psychology, 1974, Vol. 10, 534 - 545 ISSN 0012 1649
Page in Report: 539

Population: 21+ aged, general public, USA, 1959

Sample:

Non-Response: 17% incomplete information
N: 1294

Correlate

Authors label: Type of deprivation (1)
Our classification: Perceived happiness career, code H5.1
Measurement: Ss were classified on the basis of present-self, past-self and future-self ratings using the Cantril (1965) question on "best possible life".
(See CANTR 1965)

TD temporary deprivation:
present lower than past: future higher than present

CD continuous deprivation:
present lower than past: future lower than present

GED great expectative deprivation:
present higher than past: future higher than present

SND Stereotyped non-deprivation:
present higher than past: future slightly higher than present

AD anticipatory deprivation:
present higher than past: future lower than present.

**Correlate**

**Authors label:** Recent happiness (1)

**Our classification:** . in recent past, code H5.1.1
Findings on Happiness and HAPPINESS: CAREER

Measurement: Weighted sum of possible answers to closed question: "Think back over what your life has been like during the past ten weeks. It may help to try to remember some of the specific things that happened to you, or which you did during this period. Your answers should add up to ten weeks. For what part of the time did you feel delighted about your life as a whole (answer A)... pleased (B)...mostly satisfied (C)... mixed—about equally satisfied and dissatisfied (D)... mostly dissatisfied (E)... unhappy (F)... terrible (G)?"

Remarks: Two measures were derived:
1. weighted sum: \( (1 \times A) + (2 \times B) + (3 \times C) + (4 \times D) + (5 \times E) + (6 \times F) + (7 \times G) \)
2. Regression weighted sum: \( 52.366 + (1.244 \times A) + (.869 \times B) - (1.507 \times E) - (2.373 \times F) \)

Correlational finding on Happiness and recent change
Subject code: H5.1.2.1

Study

ANDRE 1976/5

Reported in: Andrews, F.M.; Withey, S.B.
Social Indicators of Well-being: Americans’ Perceptions of Life Quality
Page in Report: 92

Population: 18+ aged, general public, non-institutionalized, USA, 1973/7

Sample: N: 222

Non-Response:

Correlate

Authors label: Past change in happiness Past progress (1)

Our classification: recent change, code H5.1.2.1

Measurement: Difference in response to two questions:
1. "Where was your life most of the time during the past year?"
2. "Where was your life five years ago?"
Rated on a 9-point graphic scale ranging from best life (9) to worst life (0)

**Correlational finding on Happiness and . in the near future (up to 5 years)**

**Subject code:** H5.1.4.1

**Study**

ANDRE 1976/5

*Page in Report:* 92

*Population:* 18+ aged, general public, non-institutionalized, USA, 1973/7

*Sample:*

*Non-Response:*

N: 222

**Correlate**

*Authors label:* Expected change in happiness Future progress (1)

*Our classification:* . in the near future (up to 5 years), code H5.1.4.1
Findings on Happiness and HAPPINESS: CAREER

Measurement: Difference in response to two single direct questions:
1. "Where do you expect your life to be five years from now?"
2. "Where was your life most of the time during the past year?"
Rated on a 9-point graphic scale ranging from best life (9) to worst life (0)

**Subject code:** H5.2.1.1

**Study** BRUNS 1998/1
Correlate

**Authors label:** Daily emotional well being

**Our classification:** recent happiness (< 1 year ago), code H5.2.1.1

**Measurement:** Selfreport on 8 questions, twice a day during two weeks: how frequent one experienced in the past half day.

- A happy
- B joyful
- C contented
- D cheerful
- E frustrated
- F sad
- G depressed
- H dissatisfied

Rated 1: scarcely … 5: very frequently

Summation: \((A+B+C+D)-(E+F+G+H)\)

Name: adapted from UWIST mood adjective checklist (Mathews et. al. 1990)

**Measured Values:** M=4.62, SD=5.11

**Error Estimates:** Cronbach alpha=.92

**Remarks:** Average of 12 occasions: two times in every second day for 2 weeks (6 days * 2 administrations = 12 occasions)

*Authors label:* Counseling program

*Our classification:* . recent happiness (< 1 year ago), code H5.2.1.1

*Measurement:* The women and their partners were randomly assigned to participate in one of two different 6 week counseling programs, after which they once again completed the measures over the phone at T2. The other half of the sample was assigned to an attentinal control condition in which the women with breast cancer also received six weekly calls and their partners received two bimonthly calls. However, there was no substantive counseling offered in these brief contacts.

The Relationship between Mood and Subjective Well-Being.
Social Indicators Research, 1991, Vol. 24, 101 - 111. ISSN p 0303 8300; ISSN e 1573 0921 DOI:10.1007/BF00292653
Page in Report: 106

Population: University students, State University of New York at Buffalo, followed 10 weeks, 198?
Sample: Non-probability chunk sample
Non-Response: N: 65

Correlate

Authors label: Affect Balance in 10 weeks
Our classification: recent happiness (< 1 year ago), code H5.2.1.1
Measurement: Selfreport on 9 item scale
Please indicate how much of each emotion you felt today:
A happy
B depressed, blue
C joyfull
D pleased
E frustrated
F angry, hostile
G enjoyment, fun
H worried, anxious
I unhappy
Answer options:
1 not at all
2 very slight
3 somewhat
4 moderate amount
5 much
6 very much
7 extremely much
Computation: (A+C+D+G)-(B+E+F+H+I)
Name: Diener's 'Daily Mood scale'
Assessed at T1 and T2 with 10 weeks difference

Measured Values: T1: M = 42,95, SD=9,25 T2: M = 46,74, SD=11,27

Error Estimates: T1: Cronbach alpha = .81 T2: Cronbach alpha = .86

Correlational finding on Happiness and . past happiness (1 to 10 years ago)
Subject code: H5.2.1.2

Study

Reported in: Block, J.
Lives through Time.
Bancroft Books, 1971, Berkeley, USA
Page in Report: 302-307

Population: Highschool pupils, followed from age 11 to 35, USA, 1936-1957

Sample:
Non-Response: 65% dropout, 11% incomplete data
N: 160

Correlate

Authors label: Earlier cheerfulness (1)
Our classification: . past happiness (1 to 10 years ago), code H5.2.1.2
Measurement:
Rating on the basis of interview-protocols by independent judges of cheerfulness as personality descriptive variable from most uncharacteristic to most characteristic of the subject. Rated on a scale ranging from 1 to 9.

Happiness assessed at:
T1: junior high school: age 11-14,±1936
T2: senior high school: age 14-17,±1942
T3: fourth decade: age 28-35,±1957

Observed Relation with Happiness
### Happiness Measure

<table>
<thead>
<tr>
<th>Measure</th>
<th>Statistics</th>
<th>Elaboration/Remarks</th>
</tr>
</thead>
</table>
| A-CP/g/rc/?/9/a | $mr=+.54$ | T1 by T2 happiness:  
males: $r=+.57$ (001)  
r corrected for attenuation =+.75  
females: $r=+.50$ (001)  
r corrected for attenuation =+.69  
Females tend to become less happy between T1 and T2. The individual rankorder is largely maintained (conclusion based on corrected r). |
| A-CP/g/rc/?/9/a | $mr=+.31$ | T2 by T3 happiness:  
males: $r=+.26$ (05)  
r corrected for attenuation =+.34  
females: $r=+.36$ (001)  
r corrected for attenuation =+.46  
Females tend to become more happy between T2 and T3. The individual rankorder changes considerably (conclusion based on corrected r). |

Affect Balance (M) computed by WDH-staff, subtracting Negative Affect from Positive Affect score

Correlational finding on Happiness and . past happiness (1 to 10 years ago)
Subject code: H5.2.1.2

Study

EVANS 2005

Page in Report: 1726-29

Population: 18-65 aged in good, moderate and poor mental health, followed 2 years, UK, 1999-2001

Sample: Mixed samples

Non-Response: Non-response at T1: 83% Drop-out at T2: 50%

N: 1912

Correlate

Authors label: Change in quality of life

Our classification: . past happiness (1 to 10 years ago), code H5.2.1.2

Measurement: T1-T2 change in response to question: How do you feel about your life as a whole.....?
7 delighted
6 pleased
5 mostly satisfied
4 mixed
3 mostly dissatisfied
2 unhappy
1 terrible

Measured Values: M = 4.79; SD = 1.06

Remarks: Assessed at T1 and T2, 22 month interval

Observed Relation with Happiness

### Correlational finding on Happiness and past happiness (1 to 10 years ago)

**Subject code:** H5.2.1.2

**Study**

**Reported in:** Wessman, A.E.; Ricks, D.F. 
Mood and Personality. 
Holt, Rinehart and Wilson, 1966, New York, USA. ISBN 03 0541 151 8 
Page in Report: 103

**Population:** Male college students, followed 3 years, Harvard University, USA, 1957-60

**Sample:** Non-probability chunk sample

**Non-Response:** 37%: 9 dropouts, incomplete; about the same happiness distribution.

**N:** 17

### Correlate

**Authors label:** Avowed happiness (1)

**Our classification:** past happiness (1 to 10 years ago), code H5.2.1.2

**Measurement:** Questionnaire items indicative of avowed happiness – unhappiness.

Assessed two years earlier.

Correlational finding on Happiness and long term happiness (< 10 years ago)
Subject code: H5.2.1.3

Study

SCHA 1963/1

Reported in: Schaefer, E.S.; Bayley, N.
Maternal Behavior, Child Behavior and Their Intercorrelation.

Population: Children followed from age 0 to 18, Berkeley, California, USA, 1929-47
Sample:
Non-Response: 13% drop-outs (7 children and their mothers)
N: 54

Correlate

Authors label: Happiness at age 12 - 18 (1)
Our classification: long term happiness (< 10 years ago), code H5.2.1.3
Measurement:

T1: (1929)
Happiness (AFF 5.1, hedonic level) rated 12 times between 10-36 months of age. Ratings combined: months 10 + 11 + 12 / 13 + 14 + 15 / 18 + 21 + 24 / 27 + 30 + 36.

T2: (1947)
Ratings by two judges on the basis of notes from observations and interviews between age 12-18. (inter-rater agreement rather low)

1. 4-item index involving:
   - discontented
   - unhappy
   - dissatisfied
   - complains (HAPP 3.4)

2. 2-item index involving:
   - gloomy
   - not cheerful (AFF 1.5)

Remarks:

Correlational finding on Happiness and long term happiness (< 10 years ago)
Subject code: H5.2.1.3

Study: SCHAE 1963/2

Population: Girls, followed from age 0 to 18, Berkely, California, USA, 1929-47

Sample: N: 19

Non-Response:

Correlate

Authors label: Emotional tone in babyhood (age 0-3) (1)

Our classification: . long term happiness (< 10 years ago), code H5.2.1.3

Measurement:

T1: age 0-3 (1929)
Clinical ratings on the basis of repeated observations of expressive behavior (AFF 5.1). Ratings were scored on a 7 point scale, that ranged from `happy' to `unhappy'. These ratings were part of wider observations on social and psychological functioning.
Ratings were made in the following ages in months: 10, 11, 12, 14, 15, 18, 21, 27, 30, 36.

T2: age 12-18 (1947)
Happiness assessed in adolescence.
HAP 7.3 based on various interviews and observations in adolescence.

Findings on Happiness and HAPPINESS: CAREER

A-AB/cq/mq/v/2/a  Selfreport on 10 questions:

We would like to ask you some questions about how things have been going. Please answer ‘yes’ if a statement is true for you and ‘no’ if it does not apply to you. In the past months have you been feeling:
A On top of the world?
B In high spirits
C Particularly content with life?
D Lucky?
E Bored?
F Very lonely or remote from people?
G Depressed or very unhappy?
H Flustered because you didn’t know what was expected of you?
I Generally satisfied with the way your life has turned out?

Response options:
2 yes
1 don’t know
0 no

Computation: (A+B+C+D+I) - (E+F+G+H)

MUNSH Affect Balance Scale

A-AB/cw/mq/n/5/b  Selfreport on 12 questions:

...how frequent one experienced moods in the past week...
A happy
B joyful
C contented
D cheerful
E pleasant
F elated
G frustrated
H sad
I depressed
J dissatisfied
K gloomy
L dejected

Rated 1: scarcely ...5: very frequently

Summation: (A+B+C+D+E+F) - (G+H+I+J+K+L)

Name: adapted from UWIST mood adjective checklist (Mathews et. al. 1990)

A-AB/mp/mq/n/5/a  Selfreport on 8 questions:

...how frequent one experienced in the past half day...
A happy
B joyful
C contented
D cheerful
E frustrated
F sad
G depressed
H dissatisfied

Rated 1: scarcely ...5: very frequently

Summation: (A+B+C+D) - (E+F+G+H)

Name: adapted from UWIST mood adjective checklist (Mathews et. al. 1990)
Selfreport on 2 questions:

A: "In general how happy or unhappy do you usually feel? Check the one statement below that best describes your average happiness.
10 extremely happy (feeling ecstatic, joyous, fantastic)
9 very happy (feeling really good, elated)
8 pretty happy (spirits high, feeling good)
7 mildly happy (feeling fairly good and somewhat cheerful)
6 slightly happy (just a bit above neutral)
5 neutral (not particularly happy or unhappy)
4 slightly unhappy (just a bit below neutral)
3 mildly unhappy (just a little low)
2 pretty unhappy (somewhat "blue", spirits down)
1 very unhappy (depressed, spirits very low)
0 extremely unhappy (utterly depressed, completely down)"

B: "Consider your emotions a moment further. On the average.
- What percent of the time do you feel happy?
- What percent of the time do you feel unhappy?
- What percent of the time do you feel neutral (neither happy nor unhappy)?
Make sure the three figures add-up to equal 100%".

Scoring:
- Question A : 0.- 10
- Question B : % happy
Summation : (A * 10 + B)/2

Selfreport on single question:

How are you feeling now....?
5 very good
4 good
3 neither good nor poor
2 poor
1 very poor

Selfreport on single question, repeated every evening before retiring during 3 weeks (experience sampling).

"On the average, how happy or unhappy did you feel today....?"
2 Very unhappy. Depressed. Spirits very low.
3 Pretty unhappy. Somewhat 'blue'. Spirits down.
4 Mildly unhappy. Just a little low.
5 Barely unhappy. Just this side of neutral.
6 Barely happy. Just this side of neutral.
7 Mildly happy. Feeling fairly good and somewhat cheerful.

Name: Wessman & Ricks' "Elation - Depression Scale" (adapted version)
Findings on Happiness and HAPPINESS: CAREER

Selfreport on single question, answered every evening before retiring during six weeks (experience sampling)

"On average; how elated or depressed, happy or unhappy you felt today.....?
10 Complete elation, rapturous joy and soaring ecstasy
9 Very elated and in very high spirits. Tremendous delight and buoyancy
8 Elated and in high spirits
7 Feeling very good and cheerful
6 Feeling pretty good, "OK"
5 Feeling a little bit low. Just so-so
4 Spirits low and somewhat 'blue'
3 Depressed and feeling very low. Definitely 'blue'
2 Tremendously depressed. Feeling terrible, really miserable, "just awful"
1 Utter depression and gloom. Completely down. All is black and leaden. Wish it were all over.

Name: Wessman & Ricks' `Elation - depression scale'

Selfreport on 10 questions:

During the past few weeks, did you ever feel .....? (yes/no)
A Particularly exited or interested in something?
B So restless that you couldn't sit long in a chair?
C Proud because someone complimented you on something you had done?
D Very lonely or remote from other people?
E Pleased about having accomplished something?
F Bored?
G On top of the world?
H Depressed or very unhappy?
I That things were going your way?
J Upset because someone criticized you?

Answer options and scoring:
yes = 1
no = 0

Summation:
-Positive Affect Score (PAS): A+C+E+G+I
-Negative Affect Score (NAS): B+D+F+H+J
-Affect Balance Score (ABS): PAS minus NAS
Possible range: -5 to +5

Name: Bradburn's 'Affect Balance Scale' (standard version)

Self report on 8 questions

A Have you been under or felt you were under any strain, stress or pressure during the past month?
B Have you been anxious, worried, or upset during the past month?
C Have you been feeling emotionally stable and sure of yourself, during the past month?
D How relaxed or tense have you been during the past month?
E How depressed or cheerful have you been, during the past month?
F How have you been feeling in general during the past month?
G How happy, satisfied or pleased have you been with your personal life, during the past month?
H How much energy, pep, vitality have you felt, during the past month?

Rating: 0-5 scale with verbally labeled response options

Computation: (C+F+G+H) - (A+B+D+E)

Name: Shortened General Wellbeing Schedule (GWB)
Findings on Happiness and HAPPINESS: CAREER

Selfreport on 8 questions:

"During the past week, did you ever feel.....?"
A Particularly interested in or excited about something
B Pleased about having accomplished something
C On top of the world
D Pity for some people you know
E Helpless, with no control over situations
F Bored
G Vaguely uneasy about something without knowing why
H Angry about something that usually wouldn't bother you

Possible range: -4 to +4
Selfreport on 48 questions:

SENTENCES
Each of the sentences below describes a FEELING. Mark HOW OFTEN you had that feeling during the past few weeks.

A. Nothing goes right with me
B. I feel close to people around me
C. I feel as though the best years of my life are over
D. I feel my life is on the right track
E. I feel loved and trusted
F. My work gives me a lot of pleasure
G. I don't like myself
H. I feel very tense
I. I feel life isn't worth living
J. I am content with myself
K. My past life is filled with failure
L. Everything I do seems worthwhile
M. I amn't be bothered doing anything
N. I feel I can do whatever I want to
O. I have lost interest in other people and don't care about them
P. Everything is going right for me
Q. I can express my feelings and emotions towards other people
R. I'm easy going
S. I seem to be left alone when I don't want to be
T. I wish I could change some parts of my life
U. I seem to have no real drive to do anything
V. The future looks good
W. I become very lonely
X. I can concentrate well on what I'm doing
Y. I feel out of place
Z. I think clearly and creatively
AA. I feel alone
AB. I feel free and easy
AC. I smile and laugh a lot
AD. I feel things are going my way
AE. The world seems a cold and impersonal place
AF. I feel I've made a mess of things again
AG. I feel like hiding away
AH. I feel confident about decisions I make
AI. I feel depressed for no apparent reason
AJ. I feel other people like me
AK. I feel like a failure
AL. I feel I'm a complete person
AM. I'm not sure I'm done the right thing
AN. My future looks good
AO. I'm making the most out of my life
AP. Everything is going right for me
AQ. I feel unimportant
AR. I feel as though there must be something wrong with me
AS. I don't feel like making the effort to do anything
AT. I feel confident in my dealings with the opposite sex
AU. I want to hurt those who have hurt me
AV. The results I have obtained make my efforts worthwhile

ADJECTIVES
Each of the objectives below describe a FEELING. Mark HOW OFTEN you had that feeling during the past few weeks;
A. Confident
B. Hopeless
Findings on Happiness and HAPPINESS: CAREER

Name: Kamman's Affectometer 1: version last month

A number of statements that people have used to describe how they feel are given below. Read each one and circle the number that best describes how frequently that statement was true for you in the past seven days, including today. Some statements describe positive feelings and some describe negative feelings. You may have experienced both positive and negative feelings at different times in the past week.

A I felt sad
B I felt I had failed as a person
C I felt dissatisfied with my life
D I felt mentally alert
E I felt disappointed with myself
F I felt cheerful
G I felt life wasn't worth living
H I felt satisfied with my life
I I felt healthy
J I felt life crying
K I felt I had been successful
L I felt happy
M I felt I couldn't make decisions
N I felt unattractive
O I felt optimistic about the future
P I felt life was rewording
Q I felt cheerless
R I felt life has a purpose
S I felt too tired to do anything
T I felt pleased with the way I am
U I felt lethargic
V I found it easy to make decisions
W I felt life was enjoyable
X I felt life was meaningless
Y I felt run down

Answer options:
0 never
1 rarely
2 sometimes
3 often

A-CA/mh/ri/?/0/a Interviewer rating

Interviewer rating of happiness, using flexible standards relative to the age of the subject.
Full instructions not reported.

A-CA/mh/ri/v/2/a Interviewer-rating of cheerful appearance on 8 aspects

A The look is
2) open
1) evasive
- impossible to say
B The corners of the mouth turn
2) up
1) down
- impossible to say
C The posture is
2) relaxed, at ease
1) rather tense
- impossible to say
D The movements are
2) relaxed, at ease
1) limited, withdrawn
- impossible to say
E The eyes are
2) big, open
1) small, screw up
- impossible to say
F The elbows are kept
2) not close to the body
1) close to the body
- impossible to say
G The lips are more
2) broad, full
1) thin, pent up
- impossible to say
H All in all the subject looks
2) quite cheerful
1) not very cheerful
- difficult to say
Scoring: sum of aspect ratings

Name: 'Allensbacher Ausdruckstest'

A-CP/c/rc/n/9/a Clinical rating of cheerfulness:

Based on independent interviews by two psychologists with one week interval.

Rating cheerful - glum on 9 step scale (rating scale not reported)

A-CP/g/fi/n/7/a Selfreport in focused interview:

Rating of cheerfulness by interviewer on the basis of an extensive interview.

Rating options:
7 cheerful
6
5
4
3
2
1 gloomy

A-CP/g/fi/v/7/a Selfreport in focused interview

Rating two independent interviewers.
A. Psychiatric social worker who interviewed parents at home. Interview focused on child
B. Clinical psychologist who interviewed parents separately. Interview focused on family life.

Rating options:
7 extremely cheerful, animated, jolly
6
5
4 usually good-humored air
3
2
1 dejected, melancholic appearance, in the dumps

Summation: average ratings A and B

A-CP/g/rc/?/9/a Clinical rating of cheerfulness.

Rating on the basis of interview-protocols by 2 or 3 independent judges of cheerfulness as personality

descriptive variable from most uncharacteristic to most characteristic of the subject.

Rating options: scale rating from 1 to 9 (scale options not reported)

A-CP/mi/tsb/n/7/a Time sampling of happy behaviors

The children were rated during the first 3 years of their lives, after 10, 11, 12, 13, 14, 15, 18, 21, 24, 27,

30 and 36 months of living for 'Emotional tone: unhappy - happy' on a 7-point scale.

Scoring rated on 7-step numerical scale.

Summation:
Later the ratings of 10 - 12, 13 - 15, 18 - 24, and 27 - 36 months were combined.

Rated on 7-step numerical scale.
Findings on Happiness and HAPPINESS: CAREER

Selfreport on single question:

"How do you feel about what you have accomplished in life...?"
3 well satisfied
2 reasonable satisfied
1 dissatisfied:

Selfreport on single question:

Here is a picture of a ladder. Suppose we say that the top of the ladder (10) represents the best possible life for you and the bottom (1) represents the worst possible life for you. Where on the ladder do you feel personally stand at the present time?

[ 9 ] best possible life for you
[ 8 ]
[ 7 ]
[ 6 ]
[ 5 ]
[ 4 ]
[ 3 ]
[ 2 ]
[ 1 ]
[ 0 ] worst possible life for you

Name: Cantril's self anchoring ladder rating of life (adapted version)

Selfreport on single question:

"Here is a picture of a ladder. Suppose we say that the top of the ladder represents the best possible life for you and the bottom represents the worst possible life for you. Where on the ladder do you feel you personally stand at the present time?"

[ 10 ] best possible life
[ 9 ]
[ 8 ]
[ 7 ]
[ 6 ]
[ 5 ]
[ 4 ]
[ 3 ]
[ 2 ]
[ 1 ]
[ 0 ] worst possible life

Preceded by 1) open questions about what the respondent imagines as the best possible life and the worst possible life. 2) ratings on the ladder of one's life five years ago and where on the ladder one expects to stand five years from now.

Name: Cantril's self anchoring ladder rating of life (original)
Findings on Happiness and HAPPINESS: CAREER

C-BW/c/sq/l/11/b Selfreport on single question:

"Above you see a numbered ladder. Consider the top of the ladder as the best possible life and the bottom of the ladder as the worst possible life.
A Please place an X where you feel you are now.
B Place an Y at the point where you were five years ago.
C Please place a Z at the point that you feel you will be at five years from now.

[ 10 ] best possible life
[ 9 ]
[ 8 ]
[ 7 ]
[ 6 ]
[ 5 ]
[ 4 ]
[ 3 ]
[ 2 ]
[ 1 ]
[ 0 ] worst possible life

Question A is the case question.

Name: Cantril's self anchoring ladder rating of life (modified version)

C-BW/cy/sq/l/9/a Selfreport on single question:

"Here is a picture of a ladder. At the bottom of the ladder is the worst life you might reasonably expect to have. At the top is the best life you might expect to have. Of course, life from week to week falls somewhere in between. Where was your life most of the time during the past year?"

[ 9 ] best life you might expect to have
[ 8 ]
[ 7 ]
[ 6 ]
[ 5 ]
[ 4 ]
[ 3 ]
[ 2 ]
[ 1 ] worst life you might expect to have

Name: Cantril's self anchoring ladder rating (modified version)

C-RG/h/sq/l/11/a Selfreport on single question:

How would you rate yourself as to how successful or unsuccessful you have been in terms of achieving your own goals and aims in life? Think of the top of the ladder as being completely successful, the bottom being entirely unsuccessful

[ 10 ] completely successful
[ 9 ]

[ 4 ]
[ 3 ]
[ 2 ]
[ 1 ] entirely unsuccessful
Some people have certain goals or aspirations for various aspects of their lives. They aim for a particular sort of home, income, family lifestyle, and so on. Compared to your general aims and goals, how would you say that your life measures up to it....?

1 not at all
2 fairly
3 poorly
4 half as well as your goal
5 fairly
6 well
7 matches your goal

Will people of your age get the things they want most in life.....?

4 I expect to get almost all the things I really want in life
3 I will probably get more of the things I want than not
2 There are several things I want in life but will probably not get
1 I will probably never get most of the things I really want in life

A All in all, how much happiness would you say you find in life today......?
3 a great deal
2 some but not very much
1 almost none

B In general, how would you say you feel most of the time, in good spirits or in low spirits.....?
1 I am usually in low spirits
2 I am sometimes in good spirits, sometimes in low spirits
3 I am mostly in good spirits

C On the whole, how satisfied are you with your way of life today.....?
4 very satisfied
3 fairly satisfied
2 not very satisfied
1 not satisfied at all

A Selfreport on five questions repeated three times during semester:

a In most ways my life is close to ideal
b The conditions of my life are excellent
c I am satisfied with my life
d So far, I have gotten the important things I want in life
e If I could live my life over, I would change nothing

Answers rated: 7 strongly agree ...1 strongly disagree
(Diener's Satisfaction With Life Scale, SWLS)

B Selfreport on 24 questions:

How much of each mood did you experience in the last month?

BA LOVE

a Affection
b love
c caring
d fondness
Findings on Happiness and HAPPINESS: CAREER

BB J OY
a joy
b happiness
c contentment
d pride
BC FEAR
a fear
b worry
c anxiety
d nervous
BD ANGER
a anger
b irritation
c disgust
d rage
BE SHAME
a shame
b guilt
c regret
d embarrassment
BF SADNESS
a sadness
b loneliness
c unhappiness
d depression
Rated: 0 = not at all ...6 extremely much
Summation: balance score (BA+BB)/2 - (BC+BD+BE+BF)/4

C Rating of B by five informants
D Selfreport of daily affect on B
Summation: z-scores

M-AO/u/mq/*/0/a Selfreport on 2 questions:
A "Taking all things together, how would you say things are these days? Would you say you are.....?"
1 not too happy
2 pretty happy
3 very happy

B "How often do you feel that you are really enjoying life.....?"
1 rarely
2 now and than
3 fairly often
4 all the time
Summation: factor score

M-AO/u/sq/f/7/a Selfreport on single question:
Which (of the faces) best described how you feel about your life as a whole?
7 completely happy
6
5
4 neither happy nor unhappy
3
2
1 completely unhappy
Findings on Happiness and HAPPINESS: CAREER

Selfreport on single question:

How do you feel things have worked out for you generally?
4 very well
3 fairly well
2 not very well
1 not at all well

Selfreport on 2 questions:

A "...avowed happiness at this moment of life......"
B "...avowed happiness over the past month......"
(Full questions not reported)

Response options:

Selfreport on single question:

"Taking all things together, how would you say you have been this period? Check the phrase that best describes how you have felt."
7 very happy
6 happy
5 somewhat happy
4 mixed (about equally happy and unhappy)
3 somewhat unhappy
2 unhappy
1 very unhappy

Selfreport on single question:

How would you rate the last month of your life. Was it a happy or an unhappy time for you......?
5 very happy time
4 fairly happy time
3 happy nor unhappy
2 rather unhappy time
1 very unhappy time

Selfreport on 4 questions:

Thinking about the past week, please answer the questions below by circling one number.
Your life over the past week

A 10 the most peaceful feeling
   .
   0 none at all

B 10 the happiest feeling
   .
   0 none at all

C 10 the best quality of life
   .
Findings on Happiness and HAPPINESS: CAREER

0 the worst
D 10 the most satisfaction with life
0 none at all

Summation: A +B +C +D/4

M-FH/g/sq/n/11/a Selfreport on single question:

"Generally speaking, how (much) do you feel happy? What score do you give if we put ten for 'extremely happy, zero for extremely unhappy' and five for neither happy nor unhappy?"

10 extremely happy
9
8
7
6
5 neither happy nor unhappy
4
3
2
1
0 extremely unhappy

M-TH/cm/sq/v/6/a Selfreport on single question:

During the past 4 weeks.... Have you been a happy person?
6 all of the time
5 most of the time
4 a good bit of the time
3 some of the time
2 a little of the time
1 none of the time

Item MH5 in SF-36 (Medical Outcome Study 36 item Short Form)

O-DT/c/sq/v/7/aa Selfreport on single question:

How do you feel about your life as a whole right now.....?
7 delightfull
6 very satisfying
5 satisfying
4 mixed
3 dissatisfying
2 very dissatisfying
1 terrible
No opinion

1
0 totally unsatisfied

O-SLW/c/sq/v/5/d Selfreport on single question:
Taking everything into consideration, how satisfied are you with life in general at the present time? Would you say you are.....?
5 extremely satisfied
4 very satisfied
3 fairly satisfied
2 slightly satisfied
1 not satisfied
Findings on Happiness and HAPPINESS: CAREER

Selfreport on single question:

To what extent are you satisfied with your life in general at present?
1 not at all satisfied
2 less than satisfied
3 both yes and no
4 rather satisfied
5 fully satisfied

Selfreport on single question

Now taking everything into account, how satisfied or dissatisfied are you with your life these days?
5 very satisfied
4 satisfied
3 neither satisfied nor dissatisfied
2 dissatisfied
1 very dissatisfied
- don't know
- no answers

Numerical scale reversed

Selfreport on single question, asked twice during the interview:

Are you at this moment satisfied or dissatisfied with life in general......?
7 very satisfied
6 for the greater part satisfied
5 rather more satisfied than dissatisfied
4 neither satisfied nor dissatisfied
3 somewhat more dissatisfied than satisfied
2 for the greater part dissatisfied
1 very dissatisfied
- Do not know, difficult to say

Selfreport on single question;

How satisfied or unsatisfied were you last week with your life in general?
Please answer this question below by drawing a cross on the line

Scoring: mm on this 100 mm line

Selfreport on single question:

How do you feel about your life as a whole?
Rated on a seven step quality of life ladder was marked with a smiling face and marked "GOOD". The bottom marked with a frowning face and the word 'BAD'

[ 7 ] Good, picture of smiling face
[ 6 ]
[ 5 ]
[ 4 ]
[ 3 ]
[ 2 ]
[ 1 ] Bad, picture of frowning face
(Pictures not reproduced here)
Selfreport on single question:

Taking all together, how satisfied are you with your life as a whole.....?

Name: Shortened Diener's Satisfaction with Life Scale (SWLS), last years version
(In the original scale item 5 reads: 'If I could live my life over, I would change nothing'. This item is left out in this selection because a positive answer to this question does not necessarily mean that the respondent doesn't like the life he/she actually lives.)

O-Sum/g/rc/v/7/a Clinical rating.

Ratings by four judges on the basis of notes from observations and interviews between age 12-18.

Ratings were made on the following dimensions:
A. discontented
B. unhappy
C. dissatisfied
D. complaints

Rating options:
1 not at all true
2
3
4 average
5
6
7
8 extremely true

Summation: not reported

O-Sum/u/mq/*/0/a Selfreport on 3 questions:

A. "Dissatisfied" and "Unhappy" responses on the Block (1961) Adjective Rating List

B. Overall happiness. Single direct question: "Taking all things together, how would you say things are these days? Would you say you are .......?"
3 very happy
2 pretty happy
1 not too happy

C. Present-year score on Life-Evaluation Chart, ranging from:
1 low
2
3
4
5
6
7
8
9 high

O-Sum/u/mq/v/7/a Selfreport on four questions:

Using the 1-7 scale below, indicate your agreement with each of the items by placing the appropriate number on the line preceding that item. Please be open and honest in your responding.
A In most ways my life is close to ideal
B The conditions of my life are excellent
C I am satisfied with my life
D So far, I have gotten the important things I want in life

Answers rated:
7 strongly agree
6 agree
5 slightly agree
4 neither agree nor disagree
3 slightly disagree
2 disagree
1 strongly disagree

Computation: A+B+C+D divided by 4

Name: Shortened Diener's Satisfaction with Life Scale (SWLS)
(In the original scale item 5 reads: 'If I could live my life over, I would change nothing'. This item is left out in this selection because a positive answer to this question does not necessarily mean that the respondent doesn't like the life he/she actually lives.)
## Appendix 2: Statistics used

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| AoV      | **ANALYSIS of VARIANCE (ANOVA)**  
   Type: statistical procedure  
   Measurement level: Correlate(s): nominal, Happiness: metric  
   In an ANOVA, the total happiness variability, expressed as the sum of squares, is split into two or more parts, each of which is assigned to a source of variability. At least one of those sources is the variability of the correlate, in case there is only one, and always one other is the residual variability, which includes all unspecified influences on the happiness variable. Each sum of squares has its own number of degrees of freedom (df), which sum up to Ne -1 for the total variability. If a sum of squares (SS) is divided by its own number of df, a mean square (MS) is obtained. The ratio of two correctly selected mean squares has an F-distribution under the hypothesis that the corresponding association has a zero-value.  
   **NOTE:** A significantly high F-value only indicates that, in case of a single correlate, the largest of the c mean values is systematically larger than the smallest one. Conclusions about the other pairs of means require the application of a Multiple Comparisons Procedure (see e.g. BONFERRONI's MULTIPLE COMPARISON TEST, DUNCAN's MULTIPLE RANGE TEST or STUDENT-NEWMAN-KEULS) |
| B        | **REGRESSION COEFFICIENT (non-standardized) by LEAST SQUARES (OLS)**  
   Type: test statistic  
   Measurement level: Correlate: metric, Happiness: metric  
   Theoretical range: unlimited  
   **Meaning:**  
   B > 0 A higher correlate level corresponds with, on an average, higher happiness rating.  
   B < 0 A higher correlate level corresponds with, on an average, lower happiness rating.  
   B = 0 Not any correlation with the relevant correlate. |
| Beta     | **(β) STANDARDIZED REGRESSION COEFFICIENT by LEAST SQUARES (OLS)**  
   Type: test statistic.  
   Measurement level: Correlates: all metric, Happiness: metric.  
   Range: [-1; +1]  
   **Meaning:**  
   β > 0 « a higher correlate level corresponds with, on an average, higher happiness rating.  
   β < 0 « a higher correlate level corresponds with, on an average, lower happiness rating.  
   β = 0 « no correlation.  
   β = +1 or -1 « perfect correlation.  
   **Remark:**  
   Mean of observations is subtracted from all observations if standardized. |
| BMCT     | **BONFERRONI's MULTIPLE COMPARISON TEST**  
   Type: statistical procedure  
   Measurement level: Correlate: nominal, Happiness: metric  
   **Meaning:** if the correlate is measured at c levels, the c mean happiness values can be ranked from low to high. A multiple comparison procedure judges for each of the ½c(c-1) pairs whether or not they differ significantly. A convenient way to represent the results is by ranking the c means and by underlining them in such a way that means which have a common underlining do NOT differ significantly.  
   **When added by us, this test is performed at the 95% confidence level for all the differences together.** |
Chi²  **CHI-SQUARE**  
Type: test statistic  
Range: [0; Ne*(min(c,r)-1)], where c and r are the number of columns and rows respectively in a cross tabulation of Ne sample elements.  
Meaning:  
Chi² <= (c-1) * (r-1) means: no association  
Chi² >> (c-1) * (r-1) means: strong association

D%  **DIFFERENCE in PERCENTAGES**  
Type: descriptive statistic only.  
Measurement level: Correlate level: dichotomous, but nominal or ordinal theoretically possible as well.  
Happiness level: dichotomous  
Range: [-100; +100]  
Meaning: the difference of the percentages happy people at two correlate levels.

DM  **DIFFERENCE of MEANS**  
Type: descriptive statistic only.  
Measurement level: Correlate: dichotomous, Happiness: metric  
Range: depending on the happiness rating scale of the author; range symmetric about zero.  
Meaning: the difference of the mean happiness, as measured on the author's rating scale, between the two correlate levels.

DMa  **DIFFERENCE IN ADJUSTED MEANS**, See also Ma  
Computed in Analysis of Covariance (ANCOVA) or in multiple classification analysis (MCA)  
Seldom used in happiness research. See excerpted report for further reference.

DMr  **DIFFERENCE IN MEAN RIDITS**  
Type: test statistic  
Measurement level: Happiness ordinal  
Range: [0; +1]  
Meaning:  
Mr < .50: average happiness in this subgroup lower than in the larger population  
Mr = .50: average happiness in this subgroup the same as in the larger population  
Mr > .50: average happiness in this subgroup higher than in the larger population  
'Ridit analysis' compares the distribution of happiness scores in subgroups to its distribution in the entire sample (*Relative to an Identified Distribution*)  
Testing for significance can be performed through a "BROSS Confidence Interval" (BCI). If all values the BCI for a subgroup are above/below 0.500, the subgroup is significantly more/less happy than the larger population.

DMt  **DIFFERENCE of MEANS AFTER TRANSFORMATION**  
Type: descriptive statistic only.  
Measurement level: Correlate: dichotomous, Happiness: metric  
Theoretical range: [-10; +10]  
Meaning: the difference of the mean happiness (happiness measured at a 0-10 rating scale) between the two correlate levels.

E²  **CORRELATION RATIO** (Elsewhere sometimes called h² or ETA)  
Type: test statistic  
Measurement level: Correlate: nominal or ordinal, Happiness: metric  
Range: [0; 1]  
Meaning: correlate is accountable for E² x 100 % of the variation in happiness.  
E² = 0 « knowledge of the correlate value does not improve the prediction quality of the happiness rating.  
E² = 1 « knowledge of the correlate value enables an exact prediction of the happiness rating.
F-STATISTIC
Type: asymmetric standard test statistic.
Range: nonnegative unlimited

Meaning: the test statistic is also called the "Variance Ratio" and is the ratio of two independent estimators of the same variance with n1 and n2 degrees of freedom respectively. The critical values of its probability distribution are tabulated extensively in almost any textbook on Statistics.

GOODMAN & Kruskal's GAMMA
Type: test statistic
Measurement level: Correlate: ordinal, Happiness: ordinal
Range: [-1; +1]

Meaning:
G = 0 « no rank correlation
G = +1 « strongest possible rank correlation, where high correlate values correspond with high happiness ratings.
G = -1 « strongest possible rank correlation, where high correlate values correspond with low happiness ratings.

PARTIAL GAMMA. See: GAMMA
Range: [-1, +1].
Seldom used in happiness research. See excerpted report.

Mean correlation coefficient (r).
For r, see PRODUCT-MOMENT CORRELATION

PRODUCT-MOMENT CORRELATION COEFFICIENT (Also "Pearson's correlation coefficient' or simply 'correlation coefficient')
Type: test statistic.
Measurement level: Correlate: metric, Happiness: metric
Range: [-1; +1]

Meaning:
r = 0 « no correlation,
r = 1 « perfect correlation, where high correlate values correspond with high happiness values, and
r = -1 « perfect correlation, where high correlate values correspond with low happiness values.

PARTIAL CORRELATION COEFFICIENT
Type: test statistic
Measurement level: Correlate: metric, Happiness: metric
Range: [-1; +1]

Meaning: a partial correlation between happiness and one of the correlates is that correlation, which remains after accounting for the contribution of the other influences, or some of them, to the total variability in the happiness scores.
Under that conditions
rpc > 0 « a higher correlate level corresponds with a higher happiness rating,
rpc < 0 « a higher correlate level corresponds with a lower happiness rating,

SPEARMAN'S RANK CORRELATION COEFFICIENT
Type: test statistic
Measurement level: Correlate: ordinal, Happiness: ordinal.
Range: [-1; +1]

Meaning:
rs = 0 « no rank correlation
rs = 1 « perfect rank correlation, where high correlate values are associated with high happiness ratings
rs = -1 « perfect rank correlation, where high correlate values are associated with low happiness ratings

Statistic Not Reported
Findings on Happiness and HAPPINESS: CAREER

**t:**

**t-STATISTIC (Student's t-statistic)**
Type: symmetric standard test statistic.
One parameter: number of degrees of freedom (df); range df: [1; + infinite)
Range for t: unlimited

Meaning: the test statistic is the ratio of a difference between a statistic and its expected value under the null hypothesis and its (estimated) standard error with n degrees of freedom. The critical values of its probability distribution are tabulated extensively in almost any textbook on Statistics.

**tb**

**KENDALL'S RANK CORRELATION COEFFICIENT TAU-B**
Type: test statistic
Measurement level: Correlate: ordinal, Happiness: ordinal
Range: [-1; +1]

Meaning:
\( tb = 0 \) « no rank correlation
\( tb = 1 \) « perfect rank correlation, where high values of the correlate correspond with high happiness ratings.
\( tb = -1 \) « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.

**tc**

**KENDALL'S TAU-C (Also referred to as Stuart's tau-c)**
Type: test statistic
Measurement level: Correlate: ordinal, Happiness: ordinal
Range: [-1; +1]

Meaning:
\( tc = 0 \) « no rank correlation
\( tc = 1 \) « perfect rank correlation, where high values of the correlate correspond with high happiness ratings.
\( tc = -1 \) « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.

**W**

**WILCOXON's SIGNED RANK TEST.**
Type: test statistic
Seldom used in happiness research. See excerpted report for further reference.

**ZZZZZ**

**WILCOXON's SIGNED RANK TEST.**
Type: test statistic
Seldom used in happiness research. See excerpted report for further reference.

---

**Appendix 3: About the World Database of Happiness**

**Structure of the collections**

The World Database of Happiness is an ongoing register of scientific research on the subjective enjoyment of life. It brings together findings that are scattered throughout many studies and provides a basis for synthetic work.

World literature on Happiness
Selection on subject

Bibliography and Directory

Findings on Happiness and HAPPINESS: CAREER

Selection of empirical studies
Selection on valid measurement: Item Bank
Abstracting and classification of findings
How happy people are, distributional findings
Happiness in Nations, Happiness in Publics
What goes together with happiness
Correlational Findings
Listing of comparable findings in Nations
States of Nations, Trends in Nations

Size of the collections
1226 Happiness measures (Item Bank)
4258 Nations surveys in 206 Nations
149 Distinguished publics in 1199 studies
12032 Correlational findings in 1196 studies

Appendix 4 Further Findings in the World Database of Happiness
