Correlational finding on Happiness and Earlier intimacy
Subject code: I6.1.1

Study BAHR 1980

Population: Recently widowed miner's wives and controls, USA, 1972

Sample:
Non-Response: Widows 39%, survivor wives 19%, other miners wives 48%
N: 222

Correlate

Authors label: Having close friends prior to the fire (1)
Our classification: Earlier intimacy, code I6.1.1
Measurement: Direct question: "Did you have close friends in the community prior to the fire?". Scores ranged from 2 low friendship (reflecting a "yes" answer) to 4 high friendship.

Observed Relation with Happiness

<table>

Sample: Non-probability purposive sample

Non-Response: 0

N: 70

Correlate

Authors label: Relationship

Our classification: Current intimate relationships, code I6.2

Measurement: Selfreport on the following questions:
- I have several close friends
- I feel loved and accepted by those who live with me
- I am called by my first name by those who live with me
- Some people address me formally
- I am married or steady partner
- I have friends to stay with me at home at least once a year
- When I am sad there are people who listen to me and help me
- There are both men and women living in my home
- I stay overnight with friends at least once a year
- I get on well with my family

Beta = -0.02  
ns  

Beta controlled for:
- Socio-demographic:
  - sex
  - age
  - satisfaction with finances
- Health-related:
  - activities of daily living
  - visu-motoric coordination
  - affect balance score
  - satisfaction with health
- Social network:
  - household type
- Housing:
  - basic household features
  - home ownership
  - satisfaction with housing
- Living area:
  - available services
  - neighbourhood features
  - satisfaction with living area
- Mobility:
  - car use as passenger
  - car use as driver
  - satisfaction with public transport
  - satisfaction with mobility
- Leisure time activities:
  - outdoor leisure activities
  - satisfaction with leisure activities

No interaction with region (East/West Germany)

Correlational finding on Happiness and Current intimate relationships
Subject code: I6.2
**Study**  
**RYFF 1989**

**Reported in:** Ryff, C.D.  
Happiness is Everything, or Is It? Explorations on the Meaning of Psychological Well-Being.  
Page in Report: 1073

**Population:** Adults, USA, 198?

**Sample:** Probability cluster sample

**Non-Response:**

\[ N: 321 \]

---

**Correlate**

**Authors label:** Positive relations with others

**Our classification:** Current intimate relationships, code I6.2

**Measurement:** Self report on 16 positive and 16 negative statements. Each rated on a 6-point scale ranging from strongly agree to disagree.  
High scorers have warm, satisfying, trusting relationships with others; are concerned about the welfare of others; capable of strong empathy, affection, and intimacy; understandings give and take of human relationships.  
Low scorers have few close, trusting relationships with others; find it difficult to be warm, open and concerned about others; are isolated and frustrated in interpersonal relationships; not willing to make compromises to sustain importunities with others

**Measured Values:** Young adults: women (m=101.01, sd=13.03), men (m=89.92, sd=12.31) Middle aged adults: women (m=96.07, sd=15.40), men (m=89.99, sd=17.04) Older adults: women (m=95.03, sd=16.80), men (m=94.39, sd=13.81)

**Error Estimates:** alpha=.91, Test-retest reliability between 6 week period (n=117)=.83

### Correlational finding on Happiness and Total number of intimate ties

**Subject code: I6.2.2**

**Study**

*Reported in:* Duckitt, J.H.  
Humanitas, Republic of South Africa, 1982, Vol. 8, 121-129  
Page in Report: 125/126

**Population:** 65-90 aged whites Pretoria, South Africa, 198?

**Sample:**

*Non-Response:* 20%

*N:* 80

**Correlate**

*Authors label:* Scope of interaction (1)

*Our classification:* Total number of intimate ties, code I6.2.2
Findings on Happiness and INTIMACY

**Measurement:** Number of contacts mentioned. The subject was asked to list all persons with whom he had face-to-face contact: however infrequent, in the following categories:

1. Immediate family (i.e. spouse, children, grandchildren).
2. Siblings and other relatives.
3. Intimate friends (described as extremely close friends whom the subject confided in and could depend on for emotional support).
4. Other friends, neighbors and acquaintances.
5. Total network.
6. Total network, intimate friends excluded.

**Remarks:** Controlled for household income and expert rated physical health. Controls reduced zero-order correlations only slightly.

ß controled for physical activity, self-perceived health, marital status and report of serious personal loss or misfortune in the past year. Same for Blackes and Whites.

Correlational finding on Happiness and Perceived quality of intimate ties
Subject code: I6.2.4

Study
ROSE 1955

Page in Report: 16

Population: Married couples, middle aged, middle-class, USA, 1952

Sample:
Non-Response: 50 %
N: 416

Correlate

Authors label: Closeness of total family life (2)
Our classification: Perceived quality of intimate ties, code I6.2.4
Measurement: Rating by child (sociology student) who participated in the study.

Observed Relation with Happiness

Happiness Measure

Statistics Elaboration/Remarks
Findings on Happiness and INTIMACY

O-SLug/sq/v/5/a  D% =+ p<.05
Positive among females only. Among very satisfied women in 48% of the cases the college student offspring described total family life as being very close; among satisfied women this percentage was 28%, and among the relatively dissatisfied mothers it was only 20%.

Correlational finding on Happiness and Opportunities for self-disclosure

Subject code: I6.3.1

Study

- **Reported in:** Moriwaki, S.Y.
  - Self-Disclosure, Significant Others and Psychological Well-Being in Old Age.
  - Page in Report: 229

- **Population:** 60+ aged, retirees, Los Angeles County, USA, 1971

- **Sample:**

- **Non-Response:**
  - **N:** 71

Correlate

- **Authors label:** Supported self-disclosure. (1)

- **Our classification:** Opportunities for self-disclosure, code I6.3.1

- **Measurement:**
  - Number of important life areas for which support for self-disclosure from significant others is perceived. Those persons one considers to be close and with whom one can feel free and talk about personal things were considered as 'significant others'.

  Measurement by means of Supported Self-Disclosure Index (see Jourard & Lasakow, 1958), modified to include 38 content areas of concern to the elderly, including changes in social relations with age, status and role changes, bodily changes, self-feelings, financial and material problems, and health problems.

Correlational finding on Happiness and perceived value-similarity with intimates
Subject code: I6.3.2.1

Study DUCKI 1982

Reported in: Duckitt, J.H.
Humanitas, Republic of South Africa, 1982, Vol. 8, 121-129
Page in Report: 125/126

Population: 65-90 aged whites Pretoria, South Africa, 198?

Sample:
Non-Response: 20%
N: 80

Correlate

Authors label: Age grading in interaction (1)

Our classification: . perceived value-similarity with intimates, code I6.3.2.1
Findings on Happiness and INTIMACY

**Measurement:**
1. All contacts with age peers (aged 60+), belonging to immediate family, siblings and relatives, intimate friends (described as extremely close friends whom the subject confided in and could depend on for emotional support) or friends neighbours and acquaintances:
   a. Absolute number of contacts
   b. Percentage of total number of contacts
   c. Absolute frequency of contacts
   d. Percentage of total frequency of contacts

2. Intimate friends excluded:
   a. Absolute number of contacts
   b. Percentage of total number of contacts
   c. Absolute frequency of contacts
   d. Percentage of total frequency of contacts.

**Remarks:** Controlled for household income and expert rated physical health. Controls reduced zero-order correlation only slightly.

Correlational finding on Happiness and Attitudes to intimates
Subject code: I6.5

Study  RYFF 1989

Reported in: Ryff, C.D.
Happiness is Everything, or Is It? Explorations on the Meaning of Psychological Well-Being.
Page in Report: 1073

Population: Adults, USA, 198?

Sample: Probability cluster sample

Non-Response:
N: 321

Correlate

Authors label: Positive relations with others

Our classification: Attitudes to intimates, code I6.5
Findings on Happiness and INTIMACY

**Measurement:** Self report on 16 positive and 16 negative statements. Each rated on a 6-point scale ranging from strongly agree to disagree.

High scorers have warm, satisfying, trusting relationships with others; are concerned about the welfare of others; capable of strong empathy, affection, and intimacy; understandings give and take of human relationships.

Low scorers have few close, trusting relationships with others; find it difficult to be warm, open and concerned about others; are isolated and frustrated in interpersonal relationships; not willing to make compromises to sustain importunities with others.

**Measured Values:** Young adults: women (m=101.01, sd=13.03), men (m=89.92, sd=12.31) Middle aged adults: women (m=96.07, sd=15.40), men (m=89.99, sd=17.04) Older adults: women (m=95.03, sd=16.80), men (m=94.39, sd=13.81)

**Error Estimates:** alpha=.91, Test-retest reliability between 6 week period (n=117)=.83

3 mostly dissatisfied
2 unhappy
1 terrible

Summation: arithmetic mean

Name: Andrews & Withey's "Delighted-Terrible Scale" (original version)
Also known as Lehman's 'Global lifesatisfaction'

Selfreport on single question asked twice

'How do you feel about your life as a whole?'
1 terrible
2 very unhappy
3 unhappy
4 mostly dissatisfied
5 mixed feelings
6 mostly satisfied
7 pleased
8 very pleased
9 delighted

Selfreport on single question:

"Generally speaking, are you happy these days......?"
6 very happy
5
4
3
2
1 very unhappy
(Response options not fully reported)
Findings on Happiness and INTIMACY

Selfreport on single question:
"Taken all things together, how would you say things are these days? Please put a circle around the appropriate number to indicate how happy you are these days.....?"
9 very happy
8
7
6
5 pretty happy
4
3
2
1 not too happy

(originally rated on a horizontal scale)

Selfreport on single question:
Taken all together, how would you say things are these days? Would you say you are....?
1 not too happy
2 relatively happy
3 very happy

Selfreport on single question:
Considering everything that has happened to you recently, how would you say things are with you - would you say you are.....?
3 very happy
2 pretty happy
1 not too happy

Selfreport on single question:
Do you feel your life at present is.....?
4 very happy
3 quite happy
2 quite unhappy
1 very unhappy

Selfreport on single question:
Taking all things together in your life, how would you say things are these days? Would you say you are ....?
5 very happy
4 happy
3 neither happy nor unhappy
2 unhappy
1 very unhappy
Findings on Happiness and INTIMACY

O-HL/c/sq/v/5/h Selfreport on single question

'How happy are you now?'
5 very happy
4 happy
3 neither happy nor unhappy
2 unhappy
1 very unhappy

Original text in Danish:
'Hvor lykkelig er du for tiden?'
5 meget lykkelig
4 lykkelig
3 hverken eller
2 ullykkelig
1 meget ulykkelig

O-HL/c/sq/v/5/i Selfreport on single question:

In general, how do you feel in terms of happiness in your current life?
1 very unhappy
2 unhappy
3 moderate
4 happy
5 very happy

O-HL/g/sq/n/9/a Selfreport on single question:

Generally, how happy are you.....?
1 not at all
2
3
4
5
6
7
8
9 completely

(Originally presented on a horizontal line scale)

O-HL/g/sq/v/3/c Selfreport on single question:

"In general, how happy would you say you are.....?"
3 very happy
2 fairly happy
1 not too happy
Findings on Happiness and INTIMACY

**Selfreport on single question:**

Taking all things together, would you say you are.....?
4 very happy
3 quite happy
2 not very happy
1 not at all happy.

**Selfreport on single question:**

On the whole, how happy would you say you are.....?
4 very happy
3 fairly happy
2 not very happy
1 very unhappy

**Selfreport on single question:**

"Generally speaking are you a happy person.......?"

Responses were made on an open line scale, and were later coded in 7 categories:
1 very unhappy
2
3
4
5
6
7 very happy.

**Selfreport on single question:**

We ask you to think about your life in the last two weeks....

How would you rate your quality of life?
1 very poor
2 poor
3 neither poor nor good
4 good
5 very good

Item 1 in WHOQOL-Bref

**Selfreport on single question:**

"....... satisfaction with life ....."
(full question not reported)
5 very satisfied
4 satisfied
3 don't know/satisfied
2 don't know/not satisfied
1 disappointed in life
Findings on Happiness and INTIMACY

Selfreport on single question:
In general, how satisfied are you with your way of life.......?
4 quite satisfied
3 fairly satisfied
2 sometimes dissatisfied
1 usually dissatisfied

Selfreport on single question:
'How satisfied are you with your life now?'
5 very satisfied
2 satisfied
3 neither satisfied nor dissatisfied
2 dissatisfied
1 very dissatisfied

Original text in Danish:
'Hvor tilfreds er du med dit liv for tiden?'
5 meget tilfreds
4 tilfreds
3 hverken tilfreds eller utilfreds
2 utilfreds
1 meget utilfreds

Self report on single question:
How satisfying do you find your life at the moment.....?
1 very dissatisfying
2 quite dissatisfying
3 not satisfying not dissatisfying
4 quite satisfying
5 very satisfying

Selfreport on single question:
"In general, how satisfied are you with your life.....?"
3 mostly satisfied
2 partly satisfied
1 mostly disappointed

Selfreport on single question:
In general, how satisfied are you with your life.....?
5 very satisfied
4 satisfied
3 average
2 somewhat dissatisfied
1 very dissatisfied
Findings on Happiness and INTIMACY

Selfreport on single question:

All things considered, how satisfied are you with your life as-a-whole now...?
1 dissatisfied
2
3
4
5
6
7
8
9
10 satisfied

Selfreport on single question;

What do you think, how satisfied are you at this moment- all in all - with your life ?' 'If for instance you are totally satisfied with your life, please mark a '10'. If you are totally unsatisfied with your life, mark a '0'. If you are not completely unsatisfied nor totally satisfied range yourself somewhere between '1' and '9''
10 completely satisfied
9
8
7
6
5
4
3
2
1
0 completely dissatisfied

Selfreport on single question:

Taking all things together, how satisfied are you with your life these days? Please answer with the help of this scale. For instance, when you are totally satisfied with your life, please tick '10'. When you are totally unsatisfied with your life, please tick '0'. You may use all values in between to indicate that you are neither totally satisfied nor totally unsatisfied."
10 totally satisfied
9
8
7
6
5
4
3
2
1
0 totally unsatisfied
O-SLW/c/sq/n/7/a Selfreport on single question:

We have talked about various parts of your life, now I want to ask you about your life as a whole. How satisfied are you with your life as a whole these days.....?
7 completely satisfied
6
5
4 neutral
3
2
1 completely dissatisfied

O-SLW/c/sq/v/4/g Selfreport on single question:

How satisfied are you with your life as a whole these days?
4 quite satisfied
3 rather satisfied
2 rather unsatisfied
1 not at all satisfied
- no answer
- hard to say

O-SLW/c/sq/v/5/d Selfreport on single question:

Taking everything into consideration, how satisfied are you with life in general at the present time? Would you say you are.....?
5 extremely satisfied
4 very satisfied
3 fairly satisfied
2 slightly satisfied
1 not satisfied"

O-SLW/u/sq/n/11/ca Selfreport on single question:

Thinking about your own life and personal circumstances, how satisfied are you with your life as a whole?
1 very dissatisfied
2
3
4
5 neutral
6
7
8
9
10 very satisfied

First item in Cummins' 'Personal Well-being Scale' (labels used until 2005)
Findings on Happiness and INTIMACY

O-SLW/u/sq/v/5/a  Selfreport on single question:

"On the whole, are you satisfied with your life.....?"
5 definitely yes
4 rather yes
3 don't know
2 rather no
1 definitely no
- no reply

O-SLW/u/sq/v/5/d  Selfreport on single question:

Taking your life as a whole, are you ........?
5 very satisfied
4 quite satisfied
3 more satisfied than discontented
2 more discontented than satisfied
1 quite dissatisfied

O-SLW/u/sqt/v/7/a  Selfreport on single question, asked twice in interview:

Considering everything, how satisfied are you with your life as a whole........?
7 completely satisfied
6
5
4
3
2
1 completely dissatisfied

Summation: both scores added
Possible range: 2 to 14

O-Sum/*/mq/*/0/a  Self report on 8 items

A How do you feel about your life as a whole?
Rated on a 9-step Delighted-Terrible scale
Asked twice in the interview with 15 minutes interval

B a In most ways my life is close to ideal
b The conditions of my life are excellent
c I am satisfied with my life
d So far, I have gotten the important things I want in life
e If I could live my life over, I would change nothing'
Answers rated: 7 strongly agree to 1 strongly disagree

C How do you feel usually?
0 extremely unhappy
.
10 extremely happy
Computation: factor
## Appendix 2: Statistics used

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| B      | REGRESSION COEFFICIENT (non-standardized) by LEAST SQUARES (OLS)  
Type: test statistic  
Measurement level: Correlate: metric, Happiness: metric  
Theoretical range: unlimited  
Meaning:  
B > 0 A higher correlate level corresponds with, on an average, higher happiness rating.  
B < 0 A higher correlate level corresponds with, on an average, lower happiness rating.  
B = 0 Not any correlation with the relevant correlate. |
| Beta   | (ß) STANDARDIZED REGRESSION COEFFICIENT by LEAST SQUARES (OLS)  
Type: test statistic.  
Measurement level: Correlates: all metric, Happinessl: metric.  
Range: [-1 ; +1]  
Meaning:  
beta > 0 « a higher correlate level corresponds with, on an average, higher happiness rating.  
beta < 0 « a higher correlate level corresponds with, on an average, lower happiness rating.  
beta = 0 « no correlation.  
beta = + 1 or -1 « perfect correlation.  
Remark:  
Mean of observations is subtracted from all observations if standardized. |
| D%     | DIFFERENCE in PERCENTAGES  
Type: descriptive statistic only.  
Measurement level: Correlate level: dichotomous, but nominal or ordinal theoretically possible as well. Happiness level: dichotomous  
Range: [-100; +100]  
Meaning: the difference of the percentages happy people at two correlate levels. |
| DM     | DIFFERENCE of MEANS  
Type: descriptive statistic only.  
Measurement level: Correlate: dichotomous, Happiness: metric  
Range: depending on the happiness rating scale of the author; range symmetric about zero.  
Meaning: the difference of the mean happiness, as measured on the author's rating scale, between the two correlate levels. |

Findings on Happiness and INTIMACY

\[ E^2 \]

CORRELATION RATIO (Elsewhere sometimes called \( h^2 \) or ETA)
Type: test statistic
Measurement level: Correlate: nominal or ordinal, Happiness: metric
Range: \([0; 1]\)

Meaning: correlate is accountable for \( E^2 \times 100 \% \) of the variation in happiness.
\( E^2 = 0 \) « knowledge of the correlate value does not improve the prediction quality of the happiness rating.
\( E^2 = 1 \) « knowledge of the correlate value enables an exact prediction of the happiness rating.

\[ G \]

GOODMAN & Kruskal's GAMMA
Type: test statistic
Measurement level: Correlate: ordinal, Happiness: ordinal
Range: \([-1; +1]\)

Meaning:
\( G = 0 \) « no rank correlation
\( G = +1 \) « strongest possible rank correlation, where high correlate values correspond with high happiness ratings.
\( G = -1 \) « strongest possible rank correlation, where high correlate values correspond with low happiness ratings.

\[ mc \]

Guttman's monotonicity coefficient.
Range: \([-1, +1]\).
Measurement level: Both correlate and happiness ordinal or interval
Based on the multiplication of signed differences within one variable with the corresponding difference in the second variable and summation over all possible differences.
Seldom used in happiness research. See excerpted report.

\[ MCT \]

Multiple Comparison Test, variant not specified.
Possible variants: Scheffe, Tukey, Student/Newman/Keuls, Bonferoni (BMCT)

\[ OR \]

ODDS RATIO
Type: descriptive statistic only.
Measurement level: Correlate: dichotomous, Happiness level: dichotomous
Range: nonnegative unlimited

Meaning:
\( OR = 1 \) « no association at all;
\( OR = 0 \) or infinite « at least one level of the correlate allows an error-free prediction of the happiness.
**PRODUCT-MOMENT CORRELATION COEFFICIENT** (Also "Pearson's correlation coefficient' or simply 'correlation coefficient')
Type: test statistic.
Measurement level: Correlate: metric, Happiness: metric
Range: [-1; +1]

Meaning:
- \( r = 0 \) « no correlation ,
- \( r = 1 \) « perfect correlation, where high correlate values correspond with high happiness values, and
- \( r = -1 \) « perfect correlation, where high correlate values correspond with low happiness values.

**PARTIAL CORRELATION COEFFICIENT**
Type: test statistic
Measurement level: Correlate: metric, Happiness: metric
Range: [-1; +1]

Meaning: a partial correlation between happiness and one of the correlates is that correlation, which remains after accounting for the contribution of the other influences, or some of them, to the total variability in the happiness scores.
Under that conditions
- \( rpc > 0 \) « a higher correlate level corresponds with a higher happiness rating,
- \( rpc < 0 \) « a higher correlate level corresponds with a lower happiness rating,

**SPEARMAN'S RANK CORRELATION COEFFICIENT**
Type: test statistic
Measurement level: Correlate: ordinal, Happiness: ordinal.
Range: [-1; +1]

Meaning:
- \( rs = 0 \) « no rank correlation
- \( rs = 1 \) « perfect rank correlation, where high correlate values are associated with high happiness ratings
- \( rs = -1 \) « perfect rank correlation, where high correlate values are associated with low happiness ratings

**R² COEFFICIENT of DETERMINATION**
Type: test statistic
Measurement level: Correlates: all metric, Happiness: metric
Range: [0; 1]

Meaning:
- \( R^2 = 0 \) « no influence of any correlate in this study has been established.
- \( R^2 = 1 \) « the correlates determine the happiness completely.

**SNR**
Statistic Not Reported
Findings on Happiness and INTIMACY

Tschuprow's T
Type: test statistic.
Measurement level: Correlate: nominal, Happiness: ordinal
Range: \[0 ; \sqrt{\frac{\min(r,c)-1}{\max(r,c) -1}}\], c and r being the numbers of columns resp. rows in a cross tabulation.

Meaning:
T = 0 « no association
T -> 1 « strongest possible association.

NOTE: sometimes the square value is reported instead!

Cramér's V
Type: test statistic
Measurement level: Correlate: nominal, Happiness: ordinal
Range: [0; 1]

Meaning:
V = 0 « no association
V = 1 « strongest possible association

Appendix 3: About the World Database of Happiness

Structure of the collections

The World Database of Happiness is an ongoing register of scientific research on the subjective enjoyment of life. It brings together findings that are scattered throughout many studies and provides a basis for synthetic work.

World literature on Happiness
Selection on subject

Bibliography and Directory

Selection of empirical studies
Selection on valid measurement: Item Bank

Abstracting and classification of findings
Findings on Happiness and INTIMACY

How happy people are, distributional findings
   Happiness in Nations, Happiness in Publics

What goes together with happiness
   Correlational Findings

Listing of comparable findings in Nations
   States of Nations, Trends in Nations

Size of the collections
1226 Happiness measures (Item Bank)
4258 Nations surveys in 206 Nations
149 Distinguished publics in 1199 studies
12032 Correlational findings in 1196 studies
