### Classification of Findings

<i>Subject Code</i>	<i>Description</i>	<i>Nr of Studies on this Subject</i>
L10	LOCAL ENVIRONMENT	4
L10.1	Residential career	0
L10.1.1	Earlier residence	3
L10.1.1.1	. Earlier satisfaction with residence	1
L10.1.2	Change in residence	0
L10.1.2.2	. change in residence characteristics	0
L10.1.2.3	. change in satisfaction with residence	2
L10.1.4	Later residence	1
L10.1.4.1	. Later attitudes to residence	1
L10.2	Current residence context	5
L10.2.1	Community size	60
L10.2.1.1	. open country vs village	2
L10.2.1.2	. rural vs urban dwelling	32
L10.2.1.3	. sub-urban vs urban	5
L10.2.1.4	. size of urban setting	2
L10.2.2	Modernity of community	3
L10.2.3	Planned community	1
L10.3	Local economic prosperity	2
L10.3.1	Economic growth/decline in community	6
L10.3.2	Local costs of living	1
L10.3.3	Local quality of housing	1
L10.3.4	Local income level	0

L10.4	Local facilities	1
L10.4.1	Actual local facilities	22
L10.4.2	Satisfaction with local facilities	5
L10.4.2.2	. satisfaction with medical services	7
L10.4.2.3	. satisfaction with local police	2
L10.4.2.4	. satisfaction with local recreation	10
L10.4.2.5	. satisfaction with local schools	7
L10.4.2.6	. satisfaction with local shops	4
L10.4.2.7	. satisfaction with neatness of local streets	3
L10.4.2.8	. satisfaction with local transport facilities	8
L10.5	Local safety	2
L10.5.1	Actual safety in community	2
L10.5.2	Perceived safety in community	13
L10.5.3	Satisfaction with safety in community	23
L10.6	Local social cohesion	0
L10.6.1	Local social homogeneity	7
L10.6.2	Local social contacts	20
L10.6.3	Perceived cohesion in community	14
L10.7	Local politics	0
L10.7.1	Attitudes to local political issues	4
L10.7.2	Attitudes to local government	1
L10.8	Remoteness	1
L10.9	Local nature	0
L10.9.1	Actual local nature	1
L10.9.2	Attitude to local natural environment	10
L10.10	Attitudes to local environment	7
L10.10.1	Attitude to region	13
L10.10.2	Attitude to community	18
L10.10.3	Attitude to neighborhood	24
L10.10.4	Attitude to urban life	4
L10.10.6	Attitude to local climate	4
L10.10.7	Attitude to local costs of living	2
L10.11	Joint local characteristics	2
L10.12	Local cultural climate	1
L10.12.1	Local educational level	0

## Correlational finding on Happiness and LOCAL ENVIRONMENT

Subject code: L10

### Study **BRINK 1997/2**

*Reported in:* Brinkerhoff, M.B.; Fredell, K.; Frideres, J.  
Basic Minimum Needs, Quality of Life and Selected Correlates: Explorations in Villages in Northern India.  
Social Indicators Research, 1997, Vol. 42, 245 - 281 ISSN p 0303 8300; ISSN e 1573 0921 DOI:10.1023/A:1006834830518  
Page in Report: 263

*Population:* Adult, general public, poor rural village, Bhopalpani, India 1991

*Sample:* Non-probability purposive-quota sample

*Non-Response:* 108

*N:* 0

---

### Correlate

*Authors label:* Drinking water (1)

*Our classification:* LOCAL ENVIRONMENT, code L10

*Measurement:* Family needs prioritized by Paired Comparisons. Out of four basic needs  
ss were asked to compare two at a time and to select, which they sought 'their family needs most'  
Items were:  
-food  
-health  
-employment  
-leisure  
This leads to six pairs of comparisons.  
Score pro need can be:  
0. not mentioned  
1. once  
2. twice  
3. three times  
Needs index is the mean number of times an item is chosen.

*Measured Values:* 0: 1,89; 1: 9,2; 2: 24,8; 3: 33,9; M: 32,1

*Remarks:* Items for pairwise comparison were selected by participant observation and open interviews

## Observed Relation with Happiness

## Study POWDT 2007

*Reported in:* Powdthavee N.  
 Putting a Price Tag on Friends, Relatives, and Neighbours: Using Surveys of Life Satisfaction to Value Social Relationships  
 2008, The Journal of Socio-Economics, vol. 37, 1459-1480. ISSN:.1053 5357. DOI: 10.1016/j.socec.2007.04.004.  
 Page in Report: 40

*Population:* 16-65 aged, followed 6 years, Great-Britain, 1997-2003

*Sample:* Probability stratified sample

*Non-Response:* n.a.

*N:* 54424

## Correlate

*Authors label:* Quality of accomodation and neighbourhood variables

*Our classification:* LOCAL ENVIRONMENT, code L10

*Measurement:* Anwer on the question referring to quality of accomodation and neighbourhood: Does your accommodation have any of the following problems?

0 No

1 Yes

a Shortage of space

b Noise from neighbours

c Street noise

d Not enough lights

e Lack of adequate heating

f Condensation

g Leaky roof

h Damp walls, floor, etc.

i Rot in windows, floor etc.

j Pollution/environmental problems

k Vandalism or crime

*Remarks:* T1=average 1997-2000, T2=2002

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<u>O-SLW/u/sq/n/7/e</u>	<u>B=-.02</u> ns	Shortage of space B (-.019)
<u>O-SLW/u/sq/n/7/e</u>	<u>B=+.01</u> ns	b Noise from neighbours B (+.007)
<u>O-SLW/u/sq/n/7/e</u>	<u>B=+.01</u> ns	c Street noise B (+.006)
<u>O-SLW/u/sq/n/7/e</u>	<u>B=-.07</u> <u>p&lt;.00</u>	d Not enough lights B (-.066)
<u>O-SLW/u/sq/n/7/e</u>	<u>B=+.03</u> ns	e Lack of adequate heating B (+.025)

		<p>B's controled for</p> <ul style="list-style-type: none"> <li>- Frequency of meeting friends and relatives</li> <li>- Talk to neighbours</li> <li>- Socioeconomic variables</li> <li>- Other indicators of quality of accomation and neighbourhood variables</li> <li>- Average district income</li> </ul> <p>B's calculated by fixed effects estimations: Change in answers from T1 to T2</p>

## Correlational finding on Happiness and Earlier residence

Subject code: L10.1.1

### Study **BRINK 1986A**

*Reported in:* Brinkerhoff, M.B.; Jacob, J.  
Quality of Life in an Alternative Lifestyle: The Smallholding Movement.  
Social Indicators Research, 1986, Vol. 18, 153 - 173 ISSN p 0303 8300; ISSN e 1573 0921 DOI:10.1007/BF00317546  
Page in Report: 158

*Population:* 'Back to the land' mini-farmers, West USA and Canada, 198?

*Sample:* Non-probability purposive sample

*Non-Response:* 44 %

*N:* 510

## Correlate

*Authors label:* area of origin (1)

*Our classification:* Earlier residence, code L10.1.1

*Measurement:* Childhood residence before age 18:

1.rural farm

2.small town

3.small city

4.metropolis

*Measured Values:* 1: Males 29% Female: 27%, 1+2: Males 56% Females 52%

### Study BRINK 1986A

*Reported in:* Brinkerhoff, M.B.; Jacob, J.

Quality of Life in an Alternative Lifestyle: The Smallholding Movement.

Social Indicators Research, 1986, Vol. 18, 153 - 173 ISSN p 0303 8300; ISSN e 1573

0921 DOI:10.1007/BF00317546

Page in Report: 158

*Population:* 'Back to the land' mini-farmers, West USA and Canada,198?

*Sample:* Non-probability purposive sample

*Non-Response:* 44 %

*N:* 510

## Correlate

*Authors label:* years in urban area (1)

*Our classification:* Earlier residence, code L10.1.1

*Measurement:* Selfreport of years lived in urban area

*Measured Values:* Males: ranges: 0-86 M=13.1, Females: range: 0-70 M=12.1

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<u>O-HL/u/sq/v/4/a</u>	<u>r=+.05</u> <u>ns</u>	

## Correlational finding on Happiness and Earlier residence

Subject code: L10.1.1

### Study ORMEL 1980

*Reported in:* Ormel, J.  
Moeite met Leven of een Moeilijk Leven. (Difficulties with Living or a Difficult Life).  
Konstapel, 1980, Groningen, Netherlands  
Page in Report: 350

*Population:* 15-60 aged, general public, followed 12 month, The Netherlands, 1967-77

*Sample:*

*Non-Response:* 18%

*N:* 296

## Correlate

*Authors label:* Earlier community size (1)

*Our classification:* Earlier residence, code L10.1.1

*Measurement:* T1 (1970) inhabitants in place of residence:  
1: below 10,000  
2: 10,000-100,000  
3: over 100,000

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<u>A-BB/cw/mq/v/4/c</u>	<u>r=-.02 ns</u>	T2 happiness by T1 community size
<u>A-BB/cw/mq/v/4/c</u>	<u>r=+.01 ns</u>	T3 happiness by T1 community size

Correlational finding on Happiness and . Earlier satisfaction with residence  
Subject code: L10.1.1.1

### Study HOOPE 1989

*Reported in:* Hoopes, L.L.; Lounsbury, J.W.  
An Investigation of Life Satisfaction Following a Vacation: A Domain-Specific Approach.  
Journal of Community Psychology, 1989, Vol 17, 129 -140  
Page in Report: 132,134

*Population:* Working adults, USA, before and after vacation, 198?,

*Sample:* Non-probability purposive sample

*Non-Response:* 23

*N:* 129

### Correlate

*Authors label:* Satisfaction with community

*Our classification:* . Earlier satisfaction with residence, code L10.1.1.1

**Measurement:** Index of:  
 Satisfaction with friendships and social bonds:  
 - the number of good ,close friends you have  
 - the people you see socially  
 - the religious fulfillment in your life  
 - how much you help people or groups in this community  
 Satisfaction with where you live, :  
 - your house/ apartment  
 - the neighborhood you live in  
 - the community you live in.

Assessed on a 1-7 scale: 1 delighted...7 terrible

**Measured Values:** N=119 M=2,53 SD=,96

**Error Estimates:** alpha=.87

**Remarks:** Assessed for three periods:  
 T1: 1 or 2 weeks before vacation  
 T2: during vacation (retrospectively at T3)  
 T3: the week after vacation

## Observed Relation with Happiness

Happiness Measure	Statistics	Elaboration/Remarks
<u>O-DT/u/sq/v/7/a</u>	<u>r=+.43</u> <u>p&lt;.05</u>	T1 life satisfaction and T1 satisfaction with community
<u>O-DT/u/sq/v/7/a</u>	<u>r=+.34</u> <u>p&lt;.05</u>	T1 satisfaction with community and T3 life satisfaction
<u>O-DT/u/sq/v/7/a</u>	<u>r=+.36</u> <u>p&lt;.05</u>	T1 life satisfaction and T3 satisfaction with community
<u>O-DT/u/sq/v/7/a</u>	<u>r=+.41</u> <u>p&lt;.05</u>	T3 life satisfaction and T3 satisfaction with community

Correlational finding on Happiness and . change in satisfaction with

## residence

Subject code: L10.1.2.3

## Study HEADE 1982/2

*Reported in:* Headey, B.; Holström, E.; Wearing, A.J.  
 Australians' Priorities Satisfactions and Well-being: Methodological Issues.  
 Monograph in Public Policy Studies, nr.8, University of Melbourne, 1982, Australia  
 Page in Report: 53

*Population:* Adults, general public, Melbourne, Australia, followed 25 months 1978-81

*Sample:* Probability sample (unspecified)

*Non-Response:* 0

*N:* 184

## Correlate

*Authors label:* Change in satisfaction with suburb

*Our classification:* . change in satisfaction with residence, code L10.1.2.3

*Measurement:* Single question on satisfaction with this suburb and community as a place to live in, scored on a 1-9 D-T rating scale

*Remarks:* Both Happiness (ABS) and satisfaction with suburb were assessed at T1 and T2 (25 month interval)

## Observed Relation with Happiness

Happiness Measure	Statistics	Elaboration/Remarks
<u>A-BB/cm/mq/v/2/a</u>	<u>Beta=</u> <u>+.05 ns</u>	T1-T2 CHANGE in happiness by T1-T2 CHANGE in satisfaction with suburb

Correlational finding on Happiness and . change in satisfaction with residence

Subject code: L10.1.2.3

## Study HEADE 1984

*Reported in:* Headey, B., Holmström, E.;Wearing, A.  
The Impact of Life Events and Changes in Domain Satisfactions on Well-Being.  
Social Indicators Research, 1984, Vol. 15, 203 - 227. ISSN p 0303 8300; ISSN e 1573  
0921 DOI:10.1007/BF00668671  
Page in Report: 211

*Population:* 18-65 aged, general public, followed 3 years, Melbourne, Australia, 1979-80

*Sample:*

*Non-Response:*

*N:* 184

## Correlate

*Authors label:* Satisfaction with suburb (2)

*Our classification:* . change in satisfaction with residence, code L10.1.2.3

*Measurement:* Closed question rated on a 9- point scale (delighted ...  
terrible) Assessed at T2.

## Observed Relation with Happiness

*Happiness  
Measure*

*Statistics    Elaboration/Remarks*

A-BB/cm/mq/v/2/a

Beta=  
+.05 ns

Happiness T2 by satisfaction T2, controlling for  
happiness T1 and satisfaction T1.

$\beta$  can be interpreted as regression between CHANGE  
OF HAPPINESS and CHANGE OF SATISFACTION in time.

Correlational finding on Happiness and Later residence  
Subject code: L10.1.4

## Study BACHM 1978/2

*Reported in:* Bachman, J.G.; O'Malley, P.M.; Johnston, J.  
 Youth in Transition, Vol. VI: Adolescence to Adulthood, Change and Stability in the  
 Lives of Young Men.  
 Institute for Social Research, 1970, University of Michigan, Ann Arbor, USA  
 Page in Report:

*Population:* Public highschool boys followed 8 years from grade 10, USA, 1966-74

*Sample:*

*Non-Response:* 2.8% at T1, 17.2% at T2, 21.0% at T3, 28.9% at T4, 28.5% at T5

*N:* 2213

## Correlate

*Authors label:* Urbanicity of later dwelling (1)

*Our classification:* Later residence, code L10.1.4

*Measurement:* Urbanicity of dwelling at T5  
 1 = rural community or small town or  
 city of fewer than 50,000;  
 2 = medium sized city (50,000-100,000)  
 or suburb of medium sized city;  
 3 = fairly large city (100,000-500,000)  
 or suburb of fairly large city;  
 4 = very large city (over 500,000) or  
 suburb of a very large city

## Observed Relation with Happiness

Happiness Measure	Statistics	Elaboration/Remarks
<u>O-HP/g/mq/v/5/a</u>	<u>tau=- ns</u>	T1 happiness: tau = -.03 (ns) T2 happiness: tau = -.02 (ns) T3 happiness: tau = -.02 (ns) T4 happiness: tau = -.02 (ns) T1:1966, T2:1968, T3:1969, T4:1970, T5:1974

Correlational finding on Happiness and . Later attitudes to residence  
 Subject code: L10.1.4.1

## Study

### HOOPE 1989

*Reported in:* Hoopes, L.L.; Lounsbury, J.W.  
 An Investigation of Life Satisfaction Following a Vacation: A Domain-Specific Approach.  
 Journal of Community Psychology, 1989, Vol 17, 129 -140  
 Page in Report: 132,134

*Population:* Working adults, USA, before and after vacation, 198?,

*Sample:* Non-probability purposive sample

*Non-Response:* 23

*N:* 129

## Correlate

*Authors label:* Satisfaction with community

*Our classification:* . Later attitudes to residence, code L10.1.4.1

*Measurement:* Index of:  
 Satisfaction with friendships and social bonds:  
 - the number of good ,close friends you have  
 - the people you see socially  
 - the religious fulfillment in your life  
 - how much you help people or groups in this community  
 Satisfaction with where you live, :  
 - your house/ apartment  
 - the neighborhood you live in

## Correlational finding on Happiness and Attitudes to local environment

Subject code: L10.10

### Study AUSSE 2008

*Reported in:* Aussen, S.; Hooijmans, S.; Linden, L. v.d.  
 Geluk in Rotterdam (Happiness in Rotterdam)  
 Erasmus University Rotterdam, Faculteit Sociale Wetenschappen. Bachelor thesis,  
 oktober 2008  
 Page in Report: 41,73,

*Population:* 16-75 aged, Rotterdam, The Netherlands, 2007

*Sample:* Probability stratified sample

*Non-Response:*

*N:* 4420

### Correlate

*Authors label:* satisfaction with living environment

*Our classification:* Attitudes to local environment, code L10.10

*Measurement:* Selfreport on single question  
 1: dissatisfied  
 2: not very satisfied  
 3: satisfied  
 4: very satisfied

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<u>O-HL/u/sq/v/4/ab</u>	<u><math>r=+.30</math></u> <u><math>p&lt;.01</math></u>	N=4407

## Correlational finding on Happiness and Attitudes to local environment

Subject code: L10.10

### Study AUSTR 1984/2

*Reported in:* Austrom, D.R.  
 The Consequences of Being Single.  
 Peter Lang Publisher, 1984, New York, USA ISBN 0 8204 0095 5  
 Page in Report: 237

*Population:* 23-59 aged English speaking, Toronto and Ontario, Canada, 198?

*Sample:*

*Non-Response:* 45%

*N:* 1038

## Correlate

*Authors label:* Satisfaction with place of residence etc. (1)

*Our classification:* Attitudes to local environment, code L10.10

*Measurement:* Closed questions rated on a 11-point scale ranging from 'completely dissatisfied' to 'completely satisfied'. The respondents were asked how satisfied they were with their: place of residence, community life, neighborhood.

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>

Subject code: L10.4

## Study BRINK 1997/1

*Reported in:* Brinkerhoff, M.B.; Fredell, K.; Frideres, J.  
Basic Minimum Needs, Quality of Life and Selected Correlates: Explorations in Villages in Northern India.  
Social Indicators Research, 1997, Vol. 42, 245 - 281 ISSN p 0303 8300; ISSN e 1573 0921 DOI:10.1023/A:1006834830518  
Page in Report: 262

*Population:* Adult, general public, poor rural village, Barasi, India 1991

*Sample:* Non-probability purposive-quota sample

*Non-Response:* 0

*N:* 234

## Correlate

*Authors label:* irrigation (1)

*Our classification:* Local facilities, code L10.4

*Measurement:* Village needs prioritized by Paired Comparisons. Out of four basic needs  
 ss were asked to compare two at a time and to select, which they sought 'their family needs most'  
 Items were:  
 -food  
 -health  
 -employment  
 -leisure  
 This leads to six pairs of comparisons.  
 Score pro need can be:  
 0. not mentioned  
 1. once  
 2. twice  
 3. three times  
 Needs index is the mean number of times an item is chosen.

*Measured Values:* 0: 1.36%; 1: 23,5%; 2: 35,0%; 3: 23,5%; M: 17,9%

*Remarks:* Items for pairwise comparison were selected by participant observation and open interviews

Beta's controlled for:

- Age
- Gender
- Environment:Housing:
  - housing amenities
  - home ownership
  - satisfaction with housing
  - satisfaction with living area
- Mobility:
  - car in household
  - satisfaction with public transportation
  - satisfaction with mobility
- Services:
  - medical services
  - services and shops
- Culture:
  - Cultural amenities
  - natural environment
  - satisfaction with leisure

- Security:
  - security
- Social Environment:
  - living together
  - division social network
  - friends/kin nearby
- Economic situation:
  - Income per person
  - satisfaction with finances
- Health:
  - ADL
  - satisfaction with health

Only standardized regression coefficient significant at a maximum error rate of  $\alpha=.05$  are shown.

## Study MOLLE 2005A

*Reported in:* Mollenkopf, H.; Kaspar, R.  
Ageing in Rural Areas of East and West Germany: Increasing Similarities and Remaining Differences.  
European Journal of Ageing, 2005, Vol-2, 120-130. ISSNp:1613 9372; ISSNe: 1613 9380; DOI:10.1007/s10433-005-0029-2  
Page in Report: 125, 127

*Population:* 55+, general public, rural areas, East and West Germany, 2000

*Sample:* Probability stratified sample

*Non-Response:* 41,6%

*N:* 762

## Correlate

*Authors label:* Satisfaction with living area

*Our classification:* Satisfaction with local facilities, code L10.4.2

*Measurement:* Self report on an 11-point scale  
Single question: All in all, how satisfied are you with the  
your living area?

*Measured Values:* West Germany: M=9,0; SD=1,5; East Germany: M=8,1; SD=2,2; p<0,001

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
------------------------------	-------------------	----------------------------

O-SLW/c/sq/n/11/baBeta=+.16p<.01

Beta controlled for:

- Socio-demographic:
  - sex
  - age
  - satisfaction with finances
- Health-related:
  - activities of daily living
  - visu-motoric coordination
  - affect balance score
  - satisfaction with health
- Social network:
  - household type
  - network variety
- Housing:
  - basic household features
  - home ownership
  - satisfaction with housing
- Living area:
  - available services
  - neighbourhood features
- Mobility:
  - car use as passenger
  - car use as driver
  - satisfaction with public transport
  - satisfaction with mobility
- Leisure time activities:
  - outdoor leisure activities
  - satisfaction with leisure activities

No interaction with region (East/West Germany)

## Correlational finding on Happiness and . satisfaction with medical services

Subject code: L10.4.2.2

**Study**                      **ANDRE 1976/3**

*Reported in:* Andrews, F.M.; Withey, S.B.  
 Social Indicators of Well-being: Americans' Perceptions of Life Quality  
 Plenum Press, 1976, New York, USA. ISBN 0 306 30935 1

*Sample:* Non-probability purposive-quota sample

*Non-Response:* 0

*N:* 234

## Correlate

*Authors label:* Health (1)

*Our classification:* . satisfaction with medical services, code L10.4.2.2

*Measurement:* Family needs prioritized by Paired Comparisons. Out of four basic needs  
 ss were asked to compare two at a time and to select, which they sought 'their family needs most'  
 Items were:  
 -food  
 -health  
 -employment  
 -leisure  
 This leads to six pairs of comparisons.  
 Score pro need can be:  
 0. not mentioned  
 1. once  
 2. twice  
 3. three times  
 Needs index is the mean number of times an item is chosen.

*Measured Values:* 0: 1,40%; 1: 19,7%; 2: 35,0%; 3: 30,8% M: 14,5%

*Remarks:* Items for pairwise comparison were selected by participant observation and open interviews

Correlational finding on Happiness and . satisfaction with local recreation  
Subject code: L10.4.2.4

## Study BUTTE 1977

*Reported in:* Buttel, F.H.; Martinson, O.B.  
Ideology and Social Indicators of the Quality of Life.  
Social Indicators Research, 1977, Vol. 4, 353 - 369 ISSN p 0303 8300; ISSN e 1573  
0921 DOI:10.1007/BF00353138  
Page in Report: 358

*Population:* 18+ aged, general public, Winconsin USA, 1974

*Sample:*

*Non-Response:*

*N:* 548

## Correlate

*Authors label:* Satisfaction with quality of outdoor recreation (1)

*Our classification:* . satisfaction with local recreation, code L10.4.2.4

*Measurement:* Single closed question rated on a 5-point scale: In general, how good are the opportunities for outdoorrecreation around here: very good / fairly good / both good and bad / not very good / not good at all.

## Observed Relation with Happiness

Happiness Measure	Statistics	Elaboration/Remarks
-------------------	------------	---------------------

C-A/u/sq/v/7/a       $r=+.15$   
                                   $p<.05$

O-HL/c/sq/v/7/a       $r=+.11$   
                                   $p<.05$

## Correlational finding on Happiness and . satisfaction with local recreation

Subject code: L10.4.2.4

### Study                      HOOPE 1989

*Reported in:* Hoopes, L.L.; Lounsbury, J.W.  
 An Investigation of Life Satisfaction Following a Vacation: A Domain-Specific Approach.  
 Journal of Community Psychology, 1989, Vol 17, 129 -140  
 Page in Report: 132, 134

*Population:* Working adults, USA, before and after vacation, 198?,

*Sample:* Non-probability purposive sample

*Non-Response:* 23

*N:* 129

### Correlate

*Authors label:* Satisfaction with nature

*Our classification:* . satisfaction with local recreation, code L10.4.2.4

*Measurement:* Self report on satisfaction with:  
 - outdoor places you can go in your spare time round here  
 - nearby places you can go in your spare time around here  
 - the condition of the natural environment around here -  
 the air, land, and water in this area  
 Assessed on a 1-7 scale:1 delighted...7 terrible

*Measured Values:* N=121 M=2,27 SD=.86

*Error Estimates:* alpha =.84

*Remarks:* Assessed for three periods:  
 T1: 1 or 2 weeks before vacation  
 T2: during vacation (retrospectively at T3)  
 T3: the week after vacation

## Observed Relation with Happiness

Beta's controlled for:

- Age
- Gender
- Environment:Housing:
  - housing amenities
  - home ownership
  - satisfaction with housing
  - satisfaction with living area
- Mobility:
  - car in household
  - satisfaction with public transportation
  - satisfaction with mobility
- Services:
  - medical services
  - services and shops
  - satisfaction with services
- Culture:
  - cultural amenities
  - natural environment
- Security:
  - security
- Social Environment:
  - living together
  - division social network
  - friends/kin nearby
- Economic situation:
  - income per person
  - satisfaction with finances
- Health:
  - ADL
  - satisfaction with health

Only standardized regression coefficient  
 significant at a maximum error rate of  $\alpha=.05$   
 are shown.

*Population:* Adult, general public, poor rural village, Barasi, India 1991

*Sample:* Non-probability purposive-quota sample

*Non-Response:* 0

N: 234

## Correlate

*Authors label:* boys school facilities (1)

*Our classification:* . satisfaction with local schools, code L10.4.2.5

*Measurement:* Village needs prioritized by Paired Comparisons. Out of four basic needs  
 ss were asked to compare two at a time and to select, which they sought 'their family needs most'  
 Items were:  
 -food  
 -health  
 -employment  
 -leisure  
 This leads to six pairs of comparisons.  
 Score pro need can be:  
 0. not mentioned  
 1. once  
 2. twice  
 3. three times  
 Needs index is the mean number of times an item is chosen.

*Measured Values:* 0: 1,96%; 1: 9,9%; 2: 20,9%; 3: 35,0% M: 35,0%

*Remarks:* Items for pairwise comparison were selected by participant observation and open interviews

**Study****ROSEN 1962**

*Reported in:* Rosenberg, M.  
The Dissonant Religious Context and Emotional Disturbance.  
The American Journal of Sociology, 1962, Vol. 68, 1-10. ISSN 0002 9602  
Page in Report:

*Population:* High school pupils, New York, USA, 1960

*Sample:*

*Non-Response:* 1% because of inadequate answers

*N:* 1618

**Correlate**

*Authors label:* Religious dissonance of social context

*Our classification:* Local social homogeneity, code L10.6.1

*Measurement:* 0 Mixed/Consonant  
1 Dissonant neighbourhood

The neighbourhood were one lived (longest) when one grew up was rated as either "dissonant" or "consonant" on the basis of a direct open question on the religious affiliation of most of the people in that neighbourhood (more than 50% different from ones own religion rated "dissonant", less than 50% "mixed" or "consonant").

## Observed Relation with Happiness

*Happiness Measure*

*Statistics Elaboration/Remarks*

M-AO/g/mq/v/5/a

G=-.24  
p<.01

Stronger among Protestants and Jews than among Catholics (G' respectively -.40, -.36, -.07).

Lower when controlled for recall of prejudice experience.

Variable with cultural similarity:

- Catholics who grew up in Protestant area happier than those who grew up in Jewish area,
- Protestants who grew up in Catholic area happier than those who grew up in Jewish area,
- Jews who grew up in Protestant area happier than those who grew up in Catholic area.

**Study**

**ADAMS 1988**

*Reported in:* Adams, R.G.

Which Comes First: Poor Psychological Well-Being or Decreased Friendship Activity? Activities, Adaptation and Aging, 1988, Vol. 12, 27 - 41  
Page in Report: 35/36

*Population:* 62+ aged, white, non-married, females, middle class suburb of Chicago, USA. 1981-84

*Sample:*

*Non-Response:* Dropout : 27% due to incapacity, 13% refusal

*N:* 70

## Correlate

*Authors label:* Number of local friends (1)

*Our classification:* Local social contacts, code L10.6.2

*Measurement:* Ss were asked to list the persons they consider as friends. Next they indicated which of these lived in the same town.

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<u>A-BB/cm/mq/v/2/a</u>	<u>r=+.22</u> <u>p&lt;.05</u>	Synchronic correlation at T1.
<u>A-BB/cm/mq/v/2/a</u>	<u>r=+.06</u> <u>ns</u>	Synchronic correlation at T2. The correlation has decreased between T1 and T2 (difference in r .16)
<u>A-BB/cm/mq/v/2/a</u>	<u>rpc=</u> <u>+.00 ns</u>	Diachronic correlation: T1 local friends by T2 happiness, controlled for T1 happiness. Rpc indicates the effect of earlier local friends on later CHANGE IN HAPPINESS.

A-BB/cm/mq/v/2/arpc=  
+.30  
p<.10

Diachronic correlation: T1 happiness by T2 local friends, controlled for T1 local friends.  
Rpc indicates the EFFECT OF EARLIER HAPPINESS on later change in local friends.

The effect of local friends on happiness appears considerably smaller than the effect of happiness on local friends (difference in rpc .30).

		4 to 3: -.08	1,22	4.413

O-SLW/u/sq/n/7/e    B=+.01    2 once or twice a month (vs. 1)  
ns

O-SLW/u/sq/n/7/e    B=+.05    3 once or twice a week (vs. 1)  
p<.05

O-SLW/u/sq/n/7/e    B=+.07    4 on most days (vs. 1)  
p<.01

B's are estimated by means of fixed effects estimators instead of OLS.

B's controlled for:

- frequency of talking to neighbours
- gender
- age
- real household income
- marital status
- employment status
- look after home
- health status
- education level
- household size
- home ownership
- days spent in hospital
- number of children

Adittional control variables about quality of accommodation and neighbourhood do not make a difference:

- shortage of space
- noise from neighbours
- street noise
- not enough lights
- lack of adequate heating
- condensation

- leaky roof
- damp wall, floors, etc.
- rot windows, floors, etc
- pollution/environmental problems
- vandalism or crime
- average district income

Fixed effect estimators differ significantly from OLS estimators denoting a positive inborn personality bias on the observed relationship between frequency of social contacts, income and life satisfaction

### Study WONG 1985

*Reported in:* Wong, N.W.  
Effects of Individual Sources of Support on Well-Being in Employed Parents.  
PhD Dissertation, University of Michigan, 1985, USA  
Page in Report: 50,67,74,133,138

*Population:* Working parents with children <16, USA, 1984

*Sample:* Non-probability purposive sample

*Non-Response:* 59-79%

*N:* 651

## Correlate

*Authors label:* Support from Friends, Neighbors and Relatives

*Our classification:* Local social contacts, code L10.6.2

**Measurement:** Think back to your experiences as a working parent over the last two months. How have your friends, neighbors and relatives helped you to manage? How often in the past two months did friends, neighbors and relatives do each of the following?

Verbal support:

- Shared ideas or advice.
- Listened to my problems.
- Was understanding or sympathetic.
- Helped me to figure out how to solve a problem.

Instrumental support:

- Handled child's sickness or other emergency.
- Took care of some of my responsibilities when I was especially tired or busy.
- Took care of children before or after school.

Rated: 1= Never, 2 = Rarely, 3 = Sometimes, 4 = Often, 5 = Very often, 8 = not applicable

**Measured Values:** Married Fathers: M=1,9, SD=.69, Married Mothers M = 2,4 SD = .76, Single Mothers M=2,6 SD=.82

**Error Estimates:** alpha=.83 Verbal support: alpha=.89, Instrumental support alpha = .71

## Correlational finding on Happiness and Perceived cohesion in community

Subject code: L10.6.3

### Study COHEN 1982

*Reported in:* Cohen, P.; Struening, E.L.; Muhlin, G. L.; Genevie, L. E; et al  
Community Stressors, Mediating Conditions and Well-Being in Urban  
Neighbourhoods.  
Journal of Community Psychology, 1982, Vol. 10, 377 - 391  
Page in Report: 384

*Population:* 18-55 aged, general public, New York City, 1979

*Sample:*

*Non-Response:*

*N:* 602

## Correlate

*Authors label:* Perceived social cohesion in neighborhood (1)

*Our classification:* Perceived cohesion in community, code L10.6.3

**Measurement:** 6-item index measuring the extent to which respondents see their local neighborhood as a positive source of help.

1: most of the people around here know their neighbors well.

2: the people in the neighborhood often share things to help each other out.

3: people in this neighborhood talk to each other about things that bother them.

4: in this neighborhood you can always find somebody to help you out when you need it.

5: a lot of people in this area are friendly and helpful.

6: people in this neighborhood sometimes lend each other money when things are tight.

responses were given on a four-point scale, ranging from "not all like it is" (1) to "exactly like it is" (4).

under 30	: +.06	ns	30-49	: +.32	05
50-64	: +.18	05	over 64	: +.15	05

$\beta$  controlled for: negative life change, degree of disability, days lost due to illness, powerlessness, recent migrant, contact with friends, contact with relatives, organizational affiliation, church attendance, separated / divorced, sex, unemployed, family income, education.

## Correlational finding on Happiness and Attitudes to local political issues

Subject code: L10.7.1

**Study**

**LOUNS 1979**

*Reported in:* Lounsbury, J.W.; Sundstrom, E.; Shields, M.  
The Relationship of Avowed Life Satisfaction to Public Acceptance of and Expectations about a Nuclear Power Plant.  
Journal of Community Psychology, 1979, Vol 7, 298 -304  
Page in Report:

*Population:* Adults, general public, Hartsville/Trousdale County, Tennessee, USA, 1975

*Sample:*

*Non-Response:*

N: 288

## Correlate

*Authors label:* Perceived effects of nuclear plants new in town (1)

*Our classification:* Attitudes to local political issues, code L10.7.1

*Measurement:* Ss were shown a list of 27 events that might accompany the construction or operation of a nuclear plant at five miles of the centre of the town. The likelihood of these events was rated as a 7-point scale ranging from (1) 'certain' to (7) 'impossible'.

1. Social disruption: a.o. traffic congestions, more bars, crowding in schools, increasing noise, crime, drugs problems, increasing taxes and housing shortage.

2. Health hazards: a.o. radiation, and air-pollution.

3. Increased business: a.o. more stores, more public entertainment, etc.

4. Outside attentions: a.o. public recognition of the town and the town becomes a tourist attraction.

5. Individual economic benefit: a.o. increased land value, more jobs, better paying jobs and better schools.

*Remarks:* Likelyhood scores:  
all happy unhappy

## Appendix 1: Happiness Items used

<i>Happiness Item Code</i>	<i>Full Text</i>
A-AOL/c/sq/v/4/b	Selfreport on single closed question:  "How is your mood these days....?" 4 very good all the time 3 2 1 not good almost all the time
A-AOL/c/sq/v/5/c	Selfreport on single question:  How well do you feel these days? Is your current well-being....? 0 very low 1 2 3 4 very high
A-AOL/g/sq/v/3/d	Selfreport on single question:  I now mention some experiences, moods. Please tell me how often you feel so ....." happy." (one of several moods) 1 seldom or never 2 sometimes 3 often

A-AOL/m/sq/v/5/a

Single direct question:

How are you feeling now....?

5 very good

4 good

3 neither good nor poor

2 poor

1 very poor

A-ARE/mi/sqr/n/7/a

Selfreport on single question repeated several times a day.

" .. mood .."

Full lead question not reported

7 happy

6

5

4

3

2

1 sad

A-BB/cm/mq/v/2/a

Selfreport on 10 questions:

During the past few weeks, did you ever feel ....? (yes/no)

A Particularly exited or interested in something?

B So restless that you couldn't sit long in a chair?

C Proud because someone complimented you on something you had done?

D Very lonely or remote from other people?

E Pleased about having accomplished something?

F Bored?

G On top of the world?

H Depressed or very unhappy?

I That things were going your way?

J Upset because someone criticized you?

Answer options and scoring:

yes = 1

no = 0

Summation:

-Positive Affect Score (PAS): A+C+E+G+I

-Negative Affect Score (NAS): B+D+F+H+J

-Affect Balance Score (ABS): PAS minus NAS

Possible range: -5 to +5

Name: Bradburn's 'Affect Balance Scale' (standard version)

A-BB/cw/mq/v/2/a

Selfreport on 10 questions:

"During the past week, did you ever feel.....?"

A So restless that you could not sit long in a chair

B Proud, because someone had complimented you

C Very lonely or remote from people?

D Pleased about having accomplished something

E Bored

F On top of the world?

G Depressed

H That things were going your way?

I Upset because someone criticized you?

J Could not do anything, simply because you could not start?

Answer options and scoring:

- yes = 1

- no = 0

Summation:

Positive Affect Score (PAS): summed scores on B,D F,H

Negative Affect Score (NAS): summed scores on A,C,E,G,I,J

Affect Balance Score (ABS): PAS minus NAS

Possible range -6 to +4

Name: Bradburn's 'Affect Balance Scale' (adapted version)

A-BB/cw/mq/v/4/b

Selfreport on 8 questions:

"During the past week, did you ever feel.....?"

A Particularly interested in or excited about something

B Pleased about having accomplished something

C On top of the world

D Pity for some people you know

E Helpless, with no control over situations

F Bored

G Vaguely uneasy about something without knowing why

H Angry about something that usually wouldn't bother you

Rating options:

0 never

1 once

2 several times

3 often

Summation: Factorially derived clusters:

A+B+C+D (Enhancement)

E+F+G+H (Discomfort)

Affect Balance Score: Enhancement minus Discomfort.

Possible range: + 16 to - 16

Name: Bradburn's 'Affect Balance scale' (modified version)

A-BB/cw/mq/v/4/c

Selfreport on 8 questions:

" In the past few weeks did you ever feel.....?"

A Pleased about having accomplished something

B Upset because someone critized you

C Proud because someone complimented you one something you had done

D That things are going your way

E So restless you couldn't sit long in a chair

F Unhappy or depressed

G Particularly interested in something

H Lonely and remote from other people

Response options:

0 not at all

1 sometimes

2 often

3 very often

Scoring: a = 0.....d = 3

Summation:

Positive Affect Score (PAS): summed scores on A, C, D, G

Negative Affect Score (NAS): summed scores on B, E, F, H

Affect Balance Score (ABS): PAS minus NAS

Name: Bradburn's Affect Balance Scale (variant)

A-BB/cw/mq/v/4/e

Selfreport on 9 questions:

We are interested in the way people are feeling these days. The following list describes some of the ways people feel at different times. Please indicate how often you felt each way during the last week.

How often last week did you feel .....?

A On the top of the world

B Very lonely or remote from other people

C Particularly excited or interested in something

D Depressed or very unhappy

E Pleased about having accomplished something

F Bored

G Proud because someone complimented you on something you had done

H So restless you couldn't sit long in a chair

I Vaguely uneasy about something without knowing why

Answer options:

0 not at all

- 1 once
- 2 several times
- 3 often

Summation:

Positive Affect Score (PAS): summed scores on A, C, E, G

Negative Affect Score (NAS): summed scores on B, D, F, H, I

Affect Balance Score (ABS): PAS minus NAS

Possible range: -15 tot +12

Name: Bradburn's 'Affect Balance Scale' (modified version)

A-BC/cm/mq/v/4/a

Selfreport on 13 questions:

"During the past month, did you ever feel.....?"

- A. Excited or pleased about something you were doing
- B. That important things in life are going your way
- C. Happy, satisfied, or pleased with your personal life.
- D. Excited or pleased with something you did or a problem you solved
- E. That you have a lot of friends you can count on
- F. Nervous or tense
- G. So restless and irritated you couldn't sit still
- H. Down-hearted or depressed
- I. Felt concerned or worried about your health
- J. Guilty about something you shouldn't have done
- K. Unable to get a good night's sleep
- L. That your mind was not working the way it should
- M. Miserable or discouraged about your future

Answer options:

- 1 none of the time
- 2
- 3
- 4 most of the time

Summation:

Positive Affect Scale (PAS):A+B+C+D+E

Negative Affect Scale (NAS):F+G+H+I+J+K+L+M

Affect Balance Scale (ABS): PAS minus NAS

Possible range: -32 to + 20

Name: Bradburn's Affect Balance Scale (variation by Cohen)

A-CA/mh/ri/v/2/b

Interviewer-rating of cheerfulness:

Altogether the respondent looks.....

2 quite cheerful

1 not too cheerful

- difficult to say

Part of the 8 item Allensbacher Ausdrücktest which also involves ratings of cheerful appearance in: look, mouth, posture, movements, eyes, elbows and lips. This general rating is the last item in the test.

C-A/u/sq/v/7/a

Selfreport on single question:

"How do you feel about what you are accomplishing in life...?"

7 completely satisfied

6 very satisfied

5 satisfied

4 satisfied-dissatisfied

3 dissatisfied

2 very dissatisfied

1 completely dissatisfied.

C-BW/c/sq/l/11/a

Selfreport on single question:

"Here is a picture of a ladder. Suppose we say that the top of the ladder represents the best possible life for you and the bottom represents the worst possible life for you. Where on the ladder do you feel you personally stand at the present time?"

[ 10 ] best possible life

[ 9 ]

[ 8 ]

[ 7 ]

[ 6 ]

[ 5 ]

[ 4 ]

[ 3 ]

[ 2 ]

[ 1 ]

[ 0 ] worst possible life

Preceded by 1) open questions about what the respondent imagines as the best possible life and the worst possible life. 2) ratings on the ladder of one's life five years ago and where on the ladder one expects to stand five years from now.

Name: Cantril's self anchoring ladder rating of life (original)

C-BW/cy/sq/l/9/a

Selfreport on single question:

"Here is a picture of a ladder. At the bottom of the ladder is the worst life you might reasonably expect to have. At the top is the best life you might expect to have. Of course, life from week to week falls somewhere in between. Where was your life most of the time during the past year?"

[ 9 ] best life you might expect to have

[ 8 ]

[ 7 ]

[ 6 ]

[ 5 ]

[ 4 ]

[ 3 ]

[ 2 ]

[ 1 ] worst life you might expect to have

Name: Cantril's self anchoring ladder rating (modified version)

M-AO/c/mq/\*/0/a

Selfreport on 4 questions:

A For the past five years, how much have you accomplished of what you planned in your life?

1 completely failed

2

3

4

5

6

7 completely accomplished

B How much are you satisfied with your life as a whole these days?

1 completely dissatisfied

2

3

4

5

6

7 completely satisfied

C How much do you enjoy your life these days?

3 a great deal

2 a fair amount

1 not very much

D How happy have you been for the past five years?

1 completely unhappy

2

3

4

5

6

7 completely happy

Summation: % positive answers

Response options A, D and C not reported in full detail

M-AO/g/mq/v/5/a

Selfreport on 6 questions:

A On the whole, how happy would you say you are?

B On the whole, I think I am a quite happy person.

C In general, how would you say you feel most of the time -in good or in low spirits?

D I get a lot of fun out of life.

E I wish I could be as happy as others seem to be.

F How often do you feel downcast and rejected?

Response options: not reported

The items of this scale were randomly distributed in the questionnaire.

Name: Rosen 'Depressive Affect Scale'

M-AO/u/sq/f/7/a

Selfreport on single question:

Which (of the faces) best described how you feel about your life as a whole?

7 completely happy

6

5

4 neither happy nor unhappy

3

2

1 completely unhappy

M-CO/u/mq/v/7/a

Selfreport on 3 questions:

A How do you feel about what you are accomplishing in life?

B How do you feel about your life as a whole?

C In general, how happy would you say you are these days?

Answer options:

7 completely satisfied

6 very satisfied

5 satisfied

4 satisfied - dissatisfied

3 dissatisfied

2 very dissatisfied

1 completely dissatisfied

Possible range 3 - 21

M-FH/c/sq/v/5/a

Selfreport on single question:

How do you feel yourself at the time being? Is your present wellbeing.....?

5 very high

4 high

3 moderate

2 rather low

1 low

M-FH/g/sq/v/10/a

Selfreport on single question:

Use the list below to answer the following question: IN GENERAL, HOW HAPPY OR UNHAPPY DO YOU USUALLY FEEL? Check the one statement that best describes your average happiness.

10 extremely happy (feeling ecstatic, joyous, fantastic!)

9 very happy (feeling really good and elated!)

8 pretty happy (spirits high, feeling good)

7 mildly happy (feeling fairly good and somewhat cheerful)

6 slightly happy ( just a bit above neutral)

5 slightly unhappy (just a bit below neutral)

4 mildly unhappy (just a bit low)

3 pretty unhappy (somewhat "blue", spirits down)

2 very unhappy ( depressed, spirits very low)

1 extremely unhappy (utterly depressed, completely down)

Name: Fordyce's overall happiness item.

M-FH/u/sq/v/3/b

Selfreport on single question:

If you had to say whether you feel happy or not, what would you answer.....?

3 happy

2 neither happy nor unhappy

1 unhappy

M-PL/u/sq/n/5/a

Selfreport on single question:

"I have a lot of pleasure in my life"

1 totally disagree

2

3

4

5 totally agree

M-TH/g/sq/v/4/e

Self report on single question

In general, would you say that you feel happy

4 most of the time

3 only sometimes

2 almost never

1 never

M-TH/u/sq/v/5/b

Selfreport on single question:

With which of the following statements can you identify best?

- 1 I have not been cheerful for a long time
- 2 I am rarely cheerful
- 3 I am cheerful some times
- 4 I am cheerful not every day, but frequently
- 5 I am cheerful almost every day

O-DT/c/sq/v/7/aa

Selfreport on single question:

How do you feel about your life as a whole right now.....?

- 7 delightfull
- 6 very satisfying
- 5 satisfying
- 4 mixed
- 3 dissatisfying
- 2 very dissatisfying
- 1 terrible
- No opinion

Name: Andrews & Withey's `Delighted-Terrible Scale' ( modified version)

O-DT/c/sq/v/7/b

Selfreport on single question:

How do you feel about your life as a whole right now.....?

- 1 terrible
- 2 unhappy
- 3 mostly dissatisfied
- 4 mixed (about equally satisfied and dissatisfied)
- 5 mostly satisfied
- 6 pleased
- 7 delighted
- neutral (neither satisfied nor dissatisfied)
- I never thought about it
- does not apply to me

Name: Andrews & Withey's `Delighted-Terrible Scale' (modified version by Michalos)

O-DT/u/sq/f/7/a

Selfreport on single question:

Which face comes closest to expressing feeling about life as a whole?

7 delighted

6 nvery satisfying

5 satisfying

4 mixed

3 dissatisfying

2 very dissatisfying

1 terrible

- No opinion

Name: Andrews & Withey's "Delighted-Terrible Scale" (modified version)

O-DT/u/sq/v/7/a

Selfreport on single question:

How do you feel about your life as a whole.....?

7 delighted

6 pleased

5 mostly satisfied

4 mixed

3 mostly dissatisfied

2 unhappy

1 terrible

Name: Andrews & Withey's `Delighted-Terrible Scale' (original version)

O-DT/u/sqt/v/7/a

Selfreport on single question, asked twice in interview:

How do you feel about your life as a whole.....?

7 delighted

6 pleased

5 mostly satisfied

4 mixed

3 mostly dissatisfied

2 unhappy

1 terrible

Summation: arithmetic mean

Name: Andrews & Withey's "Delighted-Terrible Scale" (original version)

O-HL/u/sq/v/5/a

Selfreport on single question:

How happy or unhappy do you think you are.....?

5 very happy

4 happy

3 moderately happy

2 fairly unhappy

1 very unhappy

O-HL/u/sq/v/7/a

Selfreport on single question:

Considering your life as a whole, would you describe it as.....?

1 very unhappy

2

| unhappy

3

4 an even mixture of unhappiness and happiness

5

| happy

6

7 very happy

no opinion

O-HL/u/sq/v/7/b

Selfreport on single question:

How do you feel how happy you are.....?

7 delighted

6 pleased

5 mostly satisfied

4 mixed (about equally satisfied and dissatisfied)

3 mostly

2 unhappy

1 terrible

O-HP/g/mq/v/5/a

Selfreport on 6 questions:

" Describe the kind of person you are. Please read each sentence, then mark how often it is true for you"

1 I feel like smiling

2 I generally feel in good spirits

3 I feel happy

4 I am very satisfied with life

5 I find a good deal of happiness in life

6 I feel sad

Response options:

5 almost always true

4 often true

3 sometimes true

2 seldom true

1 never true

Summation: average  
Possible range: 1 to 5

O-HP/g/sq/ol/7/a

Selfreport on single question:

"Generally speaking are you a happy person.....?"

Responses were made on an open line scale, and were later coded in 7 categories:

1 very unhappy  
2  
3  
4  
5  
6  
7 very happy.

O-HP/u/sq/v/5/a

Selfreport on single question

To what extend do you consider yourself a happy person....?

5 very happy  
4 happy  
3 neither happy nor unhappy  
2 not very happy  
1 unhappy

O-HP/u/sq/v/5/g

Selfreport on single question:

With which of the following statements can you identify best?

1 I am very unhappy, very miserable  
2 I am unhappy, miserable  
3 I am neither happy noot unhappy  
4 I am happy, I am fine  
5 I am very happy, very fine

O-Mix/\*/sq/\*/11/a

Self report on different single questions

Responses transformed to common 0 to 10 scale

- scores on verbal response scales transformed using Thurstone's technique of expert weighing
- scores on numerical scales shorter than 11 step transformed by linear stretching

O-QOL/cm/sq/v/5/a Selfreport on single question:

We ask you to think about your life in the last two weeks.....

How would you rate your quality of life?

1 very poor

2 poor

3 neither poor nor good

4 good

5 very good

Item 1 in WHOQOL-Bref

O-SL?/?/sq/l/10/a Selfreport on single question:

Ss were asked to rate themselves on an 1 - 10 rating ladder in terms of their self-perceived life satisfaction.

(Full question not reported).

"In general, how happy would you say you are....."?

Response options not reported

O-SLC/c/sq/l/21/a Selfreport on single question:

There are moments you feel your work and your personal affairs are going well.

Sometimes without any specific reason you feel good and confident towards the

future. There are also moments that things seem to go bad; that you feel anxious and worried about the future. Now here is a picture of a ladder running from 0 to 20.

Suppose 0 represents the time in you life you felt most miserable and 20 represents the best time you ever had. Where on the ladder are you now?

[ 20 ] best time you ever had

## Appendix 2: Statistics used

<i>Symbol</i>	<i>Explanation</i>
AoV	<p>ANALYSIS of VARIANCE (ANOVA)</p> <p>Type: statistical procedure</p> <p>Measurement level: Correlate(s): nominal, Happiness: metric.</p> <p>In an ANOVA, the total happiness variability, expressed as the sum of squares, is split into two or more parts, each of which is assigned to a source of variability. At least one of those sources is the variability of the correlate, in case there is only one, and always one other is the residual variability, which includes all unspecified influences on the happiness variable. Each sum of squares has its own number of degrees of freedom (df), which sum up to <math>N_e - 1</math> for the total variability. If a sum of squares (SS) is divided by its own number of df, a mean square (MS) is obtained. The ratio of two correctly selected mean squares has an F-distribution under the hypothesis that the corresponding association has a zero-value.</p> <p>NOTE: A significantly high F-value only indicates that, in case of a single correlate, the largest of the c mean values is systematically larger than the smallest one. Conclusions about the other pairs of means require the application of a Multiple Comparisons Procedure (see e.g. BONFERRONI's MULTIPLE COMPARISON TEST, DUNCAN's MULTIPLE RANGE TEST or STUDENT-NEWMAN-KEULS)</p>
B	<p>REGRESSION COEFFICIENT (non-standardized) by LEAST SQUARES (OLS)</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: metric, Happiness: metric</p> <p>Theoretical range: unlimited</p> <p>Meaning:</p> <p><math>B &gt; 0</math> A higher correlate level corresponds with, on an average, higher happiness rating.</p> <p><math>B &lt; 0</math> A higher correlate level corresponds with, on an average, lower happiness rating.</p> <p><math>B = 0</math> Not any correlation with the relevant correlate.</p>

Beta	<p>(<math>\beta</math>) STANDARDIZED REGRESSION COEFFICIENT by LEAST SQUARES (OLS)  Type: test statistic.  Measurement level: Correlates: all metric, Happiness: metric.  Range: [-1 ; +1]</p> <p>Meaning:  <math>\beta &gt; 0</math> « a higher correlate level corresponds with, on an average, higher happiness rating.  <math>\beta &lt; 0</math> « a higher correlate level corresponds with, on an average, lower happiness rating.  <math>\beta = 0</math> « no correlation.  <math>\beta = +1</math> or <math>-1</math> « perfect correlation.</p> <p>Remark:  Mean of observations is subtracted from all observations if standardized.</p>
BMCT	<p>BONFERRONI's MULTIPLE COMPARISON TEST  Type: statistical procedure  Measurement level: Correlate: nominal, Happiness: metric</p> <p>Meaning: if the correlate is measured at c levels, the c mean happiness values can be ranked from low to high. A multiple comparison procedure judges for each of the <math>\frac{1}{2}c(c-1)</math> pairs whether or not they differ significantly. A convenient way to represent the results is by ranking the c means and by underlining them in such a way that means which have a common underlining do NOT differ significantly.</p> <p>When added by us, this test is performed at the 95% confidence level for all the differences together.</p>
D%	<p>DIFFERENCE in PERCENTAGES  Type: descriptive statistic only.  Measurement level: Correlate level: dichotomous, but nominal or ordinal theoretically possible as well. Happiness level: dichotomous  Range: [-100; +100]</p> <p>Meaning: the difference of the percentages happy people at two correlate levels.</p>
DM	<p>DIFFERENCE of MEANS  Type: descriptive statistic only.  Measurement level: Correlate: dichotomous, Happiness: metric  Range: depending on the happiness rating scale of the author; range symmetric about zero.</p> <p>Meaning: the difference of the mean happiness, as measured on the author's rating scale, between the two correlate levels.</p>

DMs	<p>STANDARDIZED DIFFERENCE of MEANS (CRITICAL RATIO)</p> <p>Type: test statistic.</p> <p>Measurement level: Correlate: dichotomous, Happiness: metric</p> <p>Theoretical range: unlimited</p> <p>Meaning: DMs is the ratio of the difference of the, either untransformed or transformed, means and its standard error.</p>
DMt	<p>DIFFERENCE of MEANS AFTER TRANSFORMATION</p> <p>Type: descriptive statistic only.</p> <p>Measurement level: Correlate: dichotomous, Happiness: metric</p> <p>Theoretical range: [-10; +10]</p> <p>Meaning: the difference of the mean happiness (happiness measured at a 0-10 rating scale) between the two correlate levels.</p>
Dyx	<p>SOMERS' ASYMMETRIC TEST STATISTIC</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: ordinal, Happiness: ordinal</p> <p>Range: [-1; +1]</p> <p>Meaning:</p> <p>Dyx = 0 «no rank correlation</p> <p>Dyx = +1 «strongest possible rank correlation, where high correlate values correspond with high happiness ratings.</p> <p>Dyx = -1 «strongest possible rank correlation, where high correlate values correspond with low happiness ratings.</p>
E <sup>2</sup>	<p>CORRELATION RATIO (Elsewhere sometimes called h<sup>2</sup> or ETA)</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: nominal or ordinal, Happiness: metric</p> <p>Range: [0; 1]</p> <p>Meaning: correlate is accountable for E<sup>2</sup> x 100 % of the variation in happiness.</p> <p>E<sup>2</sup> = 0 « knowledge of the correlate value does not improve the prediction quality of the happiness rating.</p> <p>E<sup>2</sup> = 1 « knowledge of the correlate value enables an exact prediction of the happiness rating</p>
F	<p>F-STATISTIC</p> <p>Type: asymmetric standard test statistic.</p> <p>Range: nonnegative unlimited</p> <p>Meaning : the test statistic is also called the "Variance Ratio" and is the ratio of two independent estimators of the same variance with n1 and n2 degrees of freedom respectively. The critical values of its probability distribution are tabulated extensively in almost any textbook on Statistics</p>

G	<p>GOODMAN &amp; Kruskal's GAMMA</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: ordinal, Happiness: ordinal</p> <p>Range: [-1; +1]</p> <p>Meaning:</p> <p>G = 0 « no rank correlation</p> <p>G = +1 « strongest possible rank correlation, where high correlate values correspond with high happiness ratings.</p> <p>G = -1 « strongest possible rank correlation, where high correlate values correspond with low happiness ratings.</p>
gH	<p>Hedges's COEFFICIENT FOR GROUP DIFFERENCES</p> <p>Type: descriptive statistic only</p> <p>Measurement level: Correlate: dichotomous, Happiness: metric</p> <p>Range (theoretical): unlimited</p> <p>Meaning: effect size indicator for difference of means.</p>
lgt	<p>LOGIT COEFFICIENT</p> <p>Type: descriptive statistic only</p> <p>Measurement level: Correlate: dichotomous, Happiness level: dichotomous</p> <p>Range: unlimited</p> <p>Meaning:</p> <p>lgt = 0 « no association at all;</p> <p>lgt -&gt; +/- infinite « at least one level of the correlate allows a perfect prediction of the happiness.</p>
mc	<p>Guttman's monotonicity coefficient.</p> <p>Range: [-1, +1].</p> <p>Measurement level: Both correlate and happiness ordinal or interval</p> <p>Based on the multiplication of signed differences within one variable with the corresponding difference in the second variable and summation over all possible differences.</p> <p>Seldom used in happiness research. See excerpted report.</p>
mr	<p>Mean correlation coefficient (r).</p> <p>For r, see PRODUCT-MOMENT CORRELATION</p>
OR	<p>ODDS RATIO</p> <p>Type: descriptive statistic only.</p> <p>Measurement level: Correlate: dichotomous, Happiness level: dichotomous</p> <p>Range: nonnegative unlimited</p> <p>Meaning:</p> <p>OR = 1 « no association at all;</p> <p>OR = 0 or infinite « at least one level of the correlate allows an error-free prediction of the happiness.</p>

r	<p>PRODUCT-MOMENT CORRELATION COEFFICIENT (Also "Pearson's correlation coefficient" or simply 'correlation coefficient')</p> <p>Type: test statistic.</p> <p>Measurement level: Correlate: metric, Happiness: metric</p> <p>Range: [-1; +1]</p> <p>Meaning:</p> <p><math>r = 0</math> « no correlation ,</p> <p><math>r = 1</math> « perfect correlation, where high correlate values correspond with high happiness values, and</p> <p><math>r = -1</math> « perfect correlation, where high correlate values correspond with low happiness values.</p>
rp	<p>POLYCHORIC CORRELATION</p> <p>Variant of r</p> <p>Seldom used in happiness research. See excerpted report for further reference.</p>
rpc	<p>PARTIAL CORRELATION COEFFICIENT</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: metric, Happiness: metric</p> <p>Range: [-1; +1]</p> <p>Meaning: a partial correlation between happiness and one of the correlates is that correlation, which remains after accounting for the contribution of the other influences, or some of them, to the total variability in the happiness scores.</p> <p>Under that conditions</p> <p><math>rpc &gt; 0</math> « a higher correlate level corresponds with a higher happiness rating,</p> <p><math>rpc &lt; 0</math> « a higher correlate level corresponds with a lower happiness rating,</p>
rs	<p>SPEARMAN'S RANK CORRELATION COEFFICIENT</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: ordinal, Happiness: ordinal.</p> <p>Range: [-1; +1]</p> <p>Meaning:</p> <p><math>rs = 0</math> « no rank correlation</p> <p><math>rs = 1</math> « perfect rank correlation, where high correlate values are associated with high happiness ratings</p> <p><math>rs = -1</math> « perfect rank correlation, where high correlate values are associated with low happiness ratings</p>
R <sup>2</sup>	<p>COEFFICIENT of DETERMINATION</p> <p>Type: test statistic</p> <p>Measurement level: Correlates: all metric, Happiness: metric</p> <p>Range: [0; 1]</p> <p>Meaning:</p> <p><math>R^2 = 0</math> « no influence of any correlate in this study has been established.</p> <p><math>R^2 = 1</math> « the correlates determine the happiness completely.</p>
SNR	Statistic Not Reported

T

## TSCHUPROW'S T

Type: test statistic.

Measurement level: Correlate: nominal, Happiness: ordinal

Range:  $[0 ; \sqrt{[(\min(r,c)-1)/(\max(r,c) - 1)]}]$ , c and r being the numbers of columns resp. rows in a cross tabulation.

Meaning:

T = 0 « no association

T -&gt; 1 « strongest possible association.

NOTE: sometimes the square value is reported instead !

t.

## t-STATISTIC (Student's t-statistic)

Type: symmetric standard test statistic.

One parameter: n (= number of degrees of freedom (df) ; range df: [1; + infinite)

Range for t: unlimited

Meaning : the test statistic is the ratio of a difference between a statistic and its expected value under the null hypothesis and its (estimated) standard error with n degrees of freedom.

The critical values of its probability distribution are tabulated extensively in almost any textbook on Statistics.

tau

## GOODMAN &amp; Kruskal's TAU

Type: descriptive statistic only.

Measurement level: Correlate: nominal, Happiness: ordinal

Range: [0; +1]

Meaning:

tau = 0 « knowledge of the correlate value does not improve the prediction quality of the happiness rating.

tau = 1 « knowledge of the correlate value enables a perfect (error-free) prediction of the happiness rating.

tb

## KENDALL'S RANK CORRELATION COEFFICIENT TAU-B

Type: test statistic

Measurement level: Correlate: ordinal, Happiness: ordinal

Range: [-1; +1]

Meaning:

tb = 0 « no rank correlation

tb = 1 « perfect rank correlation, where high values of the correlate correspond with high happiness ratings.

tb = -1 « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.

tc

KENDALL'S TAU-C (Also referred to as Stuart's tau-c)

Type: test statistic

Measurement level: Correlate: ordinal, Happiness: ordinal

Range: [-1; +1]

Meaning:

tc = 0 « no rank correlation

tc = 1 « perfect rank correlation, where high values of the correlate correspond with high happiness ratings.

tc = -1 « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.

## Appendix 3: About the World Database of Happiness

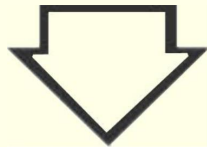

### Structure of the collections

The World Database of Happiness is an ongoing register of scientific research on the subjective enjoyment of life.

It brings together findings that are scattered throughout many studies and provides a basis for synthetic work.

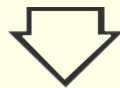

World literature on Happiness

Selection on subject

Bibliography and Directory

Selection of empirical studies

Selection on valid measurement: Item

Bank

Abstracting and classification of findings

How happy people are, distributional findings  
Happiness in Nations , Happiness in Publics

What goes together with happiness  
Correlational Findings

Listing of comparable findings in Nations

States of Nations , Trends in Nations

## Size of the collections

1226 Happiness measures (Item Bank)

4258 Nations surveys in 206 Nations

149 Distinguished publics in 1199 studies

12032 Correlational findings in 1196 studies

## Appendix 4 Further Findings in the World Database of Happiness

<i>Main Subjects</i>	<i>Subject Description</i>	<i>Number of Studies</i>
A1	ACTIVITY: LEVEL (how much one does)	58
A2	ACTIVITY: PATTERN (what one does)	32
A3	AFFECTIVE LIFE	48
A4	AGE	400
A5	AGGRESSION	12
A6	ANOMY	32
A7	APPEARANCE (good looks)	15
A8	ATTITUDES	6
A9	AUTHORITARIANISM	4
B1	BIRTH CONTROL	1
B2	BIRTH HISTORY (own birth)	201
B3	BODY	77
C1	CHILDREN	1
C2	CHILDREN: WANT FOR (Parental aspirations)	6
C3	CHILDREN: HAVING (parental status)	195
C4	CHILDREN: CHARACTERISTICS OF ONE'S CHILDREN	25
C5	CHILDREN: RELATION WITH ONE'S CHILDREN	8
C6	CHILDREN: REARING OF ONE'S CHILDREN (parental behavior)	26
C7	COMMUNAL LIVING	9
C8	CONCERNS	18
C9	COPING	43
C10	CREATIVENESS	6
C11	CULTURE (Arts and Sciences)	8
D1	DAILY JOYS & HASSLES	5
E1	EDUCATION	302
E2	EMPLOYMENT	363
E3	ETHNICITY	98
E4	EXPRESSIVE BEHAVIOR	12
F1	FAMILY OF ORIGIN (earlier family for adults, current for young)	236
F2	FAMILY OF PROCREATION	58

F3	FAMILY OF RELATIVES	157
F4	FARMING	25
F5	FREEDOM	32
F6	FRIENDSHIP	152
G1	GENDER	370
G2	GRIEF	1
H1	HABITS	1
H2	HANDICAP	25
H3	HAPPINESS: VIEWS ON HAPPINESS	49
H4	HAPPINESS: DISPERSION OF HAPPINESS	10
H5	HAPPINESS: CAREER	191
H6	HAPPINESS: CORRESPONDENCE OF DIFFERENT MEASURES	310
H7	HAPPINESS OF OTHERS	0
H8	HAPPINESS: REPUTATION OF HAPPINESS	19
H9	HEALTH-BEHAVIOR	25
H10	HELPING	5
H11	HOPE	8
H12	HOUSEHOLD: COMPOSITION	137
H13	HOUSEHOLD: WORK	32
H14	HOUSING	106
I1	INCOME	552
I2	INSTITUTIONAL LIVING	43

## Appendix 5: Related Subjects

<i>Subject</i>	<i>Related Subject(s)</i>
L10 LOCAL ENVIRONMENT	N9.1 Area in nation (geographic region)
L10.1 Residential career	M9.1 Moving career
L10.1.1 Earlier residence	F1.8.2 Rural upbringing
L10.2.1 Community size	L10.10.4 Attitude to urban life
L10.2.1.2 . rural vs urban dwelling	F1.8.2 Rural upbringing
L10.2.2 Modernity of community	N4.13 Overall development (modernity) of nation
L10.3 Local economic prosperity	N4.3.1 Economic affluence
L10.3.2 Local costs of living	L10.10.7 Attitude to local costs of living
L10.3.3 Local quality of housing	H14 HOUSING
L10.4.2.2 . satisfaction with medical services	M6.5.2 Satisfaction with health-services
L10.4.2.3 . satisfaction with local police	L10.5.3 Satisfaction with safety in community
L10.4.2.4 . satisfaction with local recreation	L3.4.3.2 . satisfaction with leisure activities
L10.5.1 Actual safety in community	N4.9.2 Crime
L10.5.2 Perceived safety in community	W7.2.1 Amount of worrying
L10.5.3 Satisfaction with safety in community	L10.4.2.3 . satisfaction with local police
L10.6.1 Local social homogeneity	E3.5 Attitudes to one's ethnic status
L10.6.1 Local social homogeneity	V4 VALUES: SIMILARITY (current fit with others)
L10.6.2 Local social contacts	S6 SOCIAL PARTICIPATION: PERSONAL CONTACTS
L10.6.2 Local social contacts	S7 SOCIAL PARTICIPATION : VOLUNTARY ASSOCIATIONS
L10.6.2 Local social contacts	S8 SOCIAL PARTICIPATION: TOTAL (personal + associations)
L10.6.3 Perceived cohesion in community	L10.10 Attitudes to local environment
L10.7 Local politics	P8 POLITICAL BEHAVIOUR
L10.7.1 Attitudes to local political issues	P8.4 Attitudes to basic political issues
L10.7.2 Attitudes to local government	L10.4.2 Satisfaction with local facilities
L10.7.2 Attitudes to local government	P8.6 Attitudes to political system
L10.8 Remoteness	L10.2.1 Community size
L10.9 Local nature	N9.4.2.1 Nature in region
L10.9.2 Attitude to local natural environment	N6.3.7 Satisfaction with natural environment

L10.10	Attitudes to local environment	N6	NATION: ATTITUDES TO ONES NATION
L10.10.1	Attitude to region	N9.4	Characteristics of region
L10.10.2	Attitude to community	M9.3	Attitudes to residential mobility
L10.10.4	Attitude to urban life	L10.2.1	Community size
L10.10.7	Attitude to local costs of living	L10.3.2	Local costs of living
L10.11	Joint local characteristics	S15	SUMMED DETERMINANTS
