Correlational Findings on Happiness and MARRIAGE: CURRENT MARITAL STATUS Subject Code: M2

© on data collection: [Ruut Veenhoven, Erasmus University Rotterdam](#)

Classification of Findings

<i>Subject Code</i>	<i>Description</i>	<i>Nr of Studies on this Subject</i>
M2	MARRIAGE: CURRENT MARITAL STATUS	52
M2.1	Married state (compared to non-married states)	100
M2.1.1	Married vs never married	70
M2.1.2	Married vs widowed	42
M2.1.3	Married vs divorced	45
M2.1.4	Married vs separated	23
M2.1.5	Still-married vs broken marriage (widowed+separated+divorced)	18
M2.1.6	Married vs will-full unmarried (never married + divorced)	2
M2.1.7	Formally-married vs living-as-married	17
M2.2	Non-married states (compared mutually)	1
M2.2.1	Never married	4
M2.2.1.2	. vs widowed	28
M2.2.1.3	. vs divorced	30
M2.2.1.4	. vs separated	14
M2.2.1.5	. vs formerly married (widowed+divorced+separated)	15
M2.2.2	Widowed	2
M2.2.2.3	. vs divorced	26
M2.2.2.4	. vs separated	13
M2.2.2.5	. vs divorced, separated or never (willful unmarried)	1
M2.2.3	Divorced or separated	6
M2.2.3.4	. vs separated	3
M2.2.4	Separated	0
M2.3	Living as married	6
M2.3.1	Living-as-married vs formerly married	2
M2.3.2	Living-as-married vs never married	2
M2.3.3	Living-as-married vs widowed	2
M2.3.4	Living-as-married vs divorced	2
M2.3.5	Living-as-married vs separated	2
M2.4	Remarried	1

M2.5	Broken marriage (divorced and widowed vs married or never married)	1
M2.6	Time trend current marital status and happiness	0
M2.7	Attitudes to marital status	0
M2.7.1	Attitudes to one's own marital status	0
M2.7.1.1	. desire of getting married	2
M2.7.1.2	. expected satisfaction if married	1
M2.7.1.3	. satisfaction with being single	2
M2.7.2	Attitudes to marriage in general	1
M2.7.2.1	. perceived happiness of the married	2
M2.7.2.2	. perceived characteristics of singles	5

Correlational finding on Happiness and MARRIAGE: CURRENT MARITAL STATUS

Subject code: M2

Study **ABRAM 1981**

Reported in: Abramson, M.; Angers, W.; Cherepon, J.; Kohut, M.; Lalouch, H.
Pilot Analysis of a Happiness Questionnaire.
Psychological Reports, 1981, Vol. 48, 570. ISSN 0033 2941
Page in Report: 570

Population: 20-65 aged, general public, USA, 198?

Sample: Probability stratified sample

Non-Response:

N: 125

Correlate

Authors label: Marital Status (1)

Our classification: MARRIAGE: CURRENT MARITAL STATUS, code M2

Measurement: (1) Other (divorced, widowed).
(2) Single
(3) Married

Observed Relation with Happiness

Happiness Measure

Statistics

Elaboration/Remarks

[O-HL/u/sq/v/3/c](#)

$r=+ p<.05$

People who reported that they were happy tended to be married.

% very happy

p<.05

married 41

widow 23

single 22

divorced 19

The relationship remains sizable after control for recent financial change, race, household size and social participation (memberships, frequency of social contacts and visits to bars and taverns). The lower happiness of the ex-married is partly explained by recent decrease in income. Change in average happiness in the USA from 1973 to 1982 can partly be explained by a drop in % marrieds and a consequent rise in % decrease in income.

Study

VANSL 2004

Reported in: VanSluijs, J.

Effecten van Levenslooptransities op de Tevredenheid van Jong Volwassenen. (Effects of Lifecourse Transition on Satisfaction of Adolescents).

Master thesis, University of Tilburg, 2004, Netherlands

Page in Report: 40,62

Population: Young adults, followed from age 18 to 30, The Netherlands, 1987-1999

Sample: Probability stratified sample

Non-Response: 36,6% (baseline)

N: 836

Correlate

Authors label: Living together/marriage first partner

Our classification: Married state (compared to non-married states), code M2.1

Measurement: 1 Married or living as married with first partner
0 Other (mostly singles)

Measured Values: N in this situation at: T1= 412, T1-T3=297, T3-T4=127, T3-T5 or T4-T5=74, Total=910

Remarks: Marital status assessed at:

T1: 1987 when aged 18 to 26

T2: 1989 when aged 20 to 28

T3: 1991 when aged 22 to 30

T4: 1995 when aged 26 to 34

T5: 1999 when aged 30 to 34

Observed Relation with Happiness

Happiness Measure

Statistics

Elaboration/Remarks

O-Sum/cy/mq/v/7/a B= B's indicate average difference between Ss who had been married during this 12 year period and Ss who did not

O-Sum/cy/mq/v/7/a B=+.85
p<.001 B controlled for personal characteristics:
 - age
 - age²
 - gender
 - education
 - cohort 1965 vs cohort 1961
 - cohort 1969 vs cohort 1961
 - mental health
 - neuroticism
 - extraversion
 and life course transitions:
 - first paid job
 - no job
 - left parental home
 - divorce from first partner
 - living together/marriage second partner
 - having first child

O-Sum/cy/mq/v/7/a B=+.87
p<.001 additional controlled for years since transition (happened or not):
 - first paid job
 - no job
 - left parental home
 - living together/marriage first partner
 - divorce from first partner
 - living together/marriage second partner
 - having first child

 Unaffected by squaring the above years of transition variables

 Unaffected by gender

Study VANSL 2004

Reported in: VanSluijs, J.
 Effecten van Levenslooptransities op de Tevredenheid van Jong Volwassenen. (Effects of Lifecourse Transition on Satisfaction of Adolescents).
 Master thesis, University of Tilburg, 2004, Netherlands
 Page in Report: 40,62

Population: Young adults, followed from age 18 to 30, The Netherlands, 1987-1999*Sample:* Probability stratified sample*Non-Response:* 36,6% (baseline)*N:* 836

Correlate

Authors label: Divorce/separation from first partner

Our classification: Married vs divorced, code M2.1.3

Measurement: 1 Divorced after marriage or separation after living together
0 other

Measured Values: N in this situation at: T1= 25, T1-T3=19, T3-T4=18, T3-T5 or T4-T5=18, Total=80

Remarks: Marital status assessed at:
T1: 1987 when aged 18 to 26
T2: 1989 when aged 20 to 28
T3: 1991 when aged 22 to 30
T4: 1995 when aged 26 to 34
T5: 1999 when aged 30 to 34

Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<u>O-Sum/cy/mq/v/7/a</u>	<u>B=</u>	B's indicate average difference between Ss who divorced during this 12 year period and Ss who did not
<u>O-Sum/cy/mq/v/7/a</u>	<u>B=-1.5</u> <u>p<.001</u>	B controlled for personal characteristics: - age - age ² - gender - education - cohort 1965 vs cohort 1961 - cohort 1969 vs cohort 1961 - mental health - neuroticism and life course transitions: - first job - no job - left parental home - living together/marriage first partner - living together/marriage second partner - having first child

O-Sum/cy/mq/v/7/aB=-2.0p<.001

additional controlled for years since transition :

- first paid job
- no job
- left parental home
- living together/marriage first partner
- divorce from first partner
- living together/marriage second partner
- having first child

Unaffected by squaring the above years of transition variables

Unaffected by gender

-Positive Affect Score (PAS): A+C+E+G+I

-Negative Affect Score (NAS): B+D+F+H+J

-Affect Balance Score (ABS): PAS minus NAS

Possible range: -5 to +5

Name: Bradburn's 'Affect Balance Scale' (standard version)

A-BB/cm/mq/v/2/c

Selfreport on 10 questions:

- During the past few weeks, did you ever feel? (yes/no)
- B So restless that you couldn't sit long in a chair?
 - C Proud because someone complimented you on something you had done?
 - D Very lonely or remote from other people?
 - E Pleased about having accomplished something?
 - F Bored?
 - G On top of the world?
 - H Depressed or very unhappy?
 - I That things were going your way?
 - J Upset because someone criticized you?

Answer options and scoring:

yes = 1

no = 0

Summation:

-Positive Affect Score (PAS): AC+E+G+I

-Negative Affect Score (NAS): B+D+F+H+J

-Affect Balance Score (ABS): PAS minus NAS

Possible range: -5 to +4

Name: Bradburn's 'Affect Balance Scale' (adjusted version 'exited/interested' item dropped)

A-BB/cw/mq/v/2/a

Selfreport on 10 questions:

"During the past week, did you ever feel.....?"

- A So restless that you could not sit long in a chair
- B Proud, because someone had complimented you
- C Very lonely or remote from people?
- D Pleased about having accomplished something
- E Bored
- F On top of the world?
- G Depressed
- H That things were going your way?
- I Upset because someone criticized you?
- J Could not do anything, simply because you could not start?

Answer options and scoring:

- yes = 1

- no = 0

Summation:

Positive Affect Score (PAS): summed scores on B,D F,H

Negative Affect Score (NAS): summed scores on A,C,E,G,I,J

Affect Balance Score (ABS): PAS minus NAS

Possible range -6 to +4

Name: Bradburn's 'Affect Balance Scale' (adapted version)

A-BB/cw/mq/v/4/b

Selfreport on 8 questions:

"During the past week, did you ever feel.....?"

- A Particularly interested in or excited about something
- B Pleased about having accomplished something
- C On top of the world
- D Pity for some people you know
- E Helpless, with no control over situations
- F Bored
- G Vaguely uneasy about something without knowing why
- H Angry about something that usually wouldn't bother you

Rating options:

0 never

1 once

2 several times

3 often

Summation: Factorially derived clusters:

A+B+C+D (Enhancement)

E+F+G+H (Discomfort)

Affect Balance Score: Enhancement minus Discomfort.

Possible range: + 16 to - 16

Name: Bradburn's 'Affect Balance scale' (modified version)

A-BC/cm/mq/v/4/a

Selfreport on 13 questions:

"During the past month, did you ever feel.....?"

- A. Exited or pleased about something you were doing
- B. That important things in life are going your way
- C. Happy, satisfied, or pleased with your personal life.
- D. Exited or pleased with something you did or a problem you solved
- E. That you have a lot of friends you can count on
- F. Nervous or tense
- G. So restless and irritated you couldn't sit still
- H. Down-hearted or depressed
- I. Felt concerned or worried about your health
- J. Guilty about something you shouldn't have done
- K. Unable to get a good night's sleep
- L. That your mind was not working the way it should
- M. Miserable or discouraged about your future

Answer options:

- 1 none of the time
- 2
- 3
- 4 most of the time

Summation:

Positive Affect Scale (PAS):A+B+C+D+E

Negative Affect Scale (NAS):F+G+H+I+J+K+L+M

Affect Balance Scale (ABS): PAS minus NAS

Possible range: -32 to + 20

Name: Bradburn's Affect Balance Scale (variation by Cohen)

C-ASG/h/mq/v/5/a

Selfreport on 2 questions:

A. "How important was each of the following goals in life in the plans you made for yourself in early adulthood?"

- occupational success
- family life
- friendships
- richness of cultural life
- total service to society.

- 1 less important to me than to most people
- 2
- 3
- 4
- 5 of prime importance to me

B. "How successful have you been in the pursuit of these goals?"

- 1 little satisfaction in this area
- 2
- 3
- 4
- 5 had excellent fortune in this respect

Computation: General Satisfaction 5 is the quotient obtained by multiplying the planned goal (early adulthood) by the reported success in attaining that goal, adding the five of these multiplied areas and dividing them by the sum of the planned goals for each of the areas.

Pa.Sa + Pb.Sb + Pc.Sc + Pd.Sd + Pe.Se

Pa + Pb + Pc + Pd + Pe

Pa = planned goal a (1-5)

Sa = success goal a (1-5)

C-BW/c/sq//10/b

Selfreport on single question:

Here is a picture of a ladder. Suppose we say that the top of the ladder (10) represents the best possible life for you and the bottom (1) represents the worst possible life for you. Where on the ladder do you feel personally stand at the present time?

[10] best possible life for you

[9]

[8]

[7]

[6]

[5]

[4]

[3]

[2]

[1] worst possible life for you

Name: Cantril's self anchoring ladder rating of life (adapted version)

C-BW/c/sq//10/c

Selfreport on single question:

Here is a picture of a ladder. Suppose we say that the top of the ladder (10) represents the best possible life for you and the bottom (1) represents the worst possible life for you. Where on the ladder do you feel personally stand at the present time?

[9] best possible life for you

[8]

[7]

[6]

[5]

[4]

[3]

[2]

[1]

[0] worst possible life for you

Name: Cantril's self anchoring ladder rating of life (adapted version)

C-BW/c/sq//11/a

Selfreport on single question:

"Here is a picture of a ladder. Suppose we say that the top of the ladder represents the best possible life for you and the bottom represents the worst possible life for you. Where on the ladder do you feel you personally stand at the present time?"

[10] best possible life

[9]

[8]

[7]

[6]

[5]

[4]

[3]

[2]

[1]

[0] worst possible life

Preceded by 1) open questions about what the respondent imagines as the best possible life and the worst possible life. 2) ratings on the ladder of one's life five years ago and where on the ladder one expects to stand five years from now.

Name: Cantril's self anchoring ladder rating of life (original)

C-BW/c/sq/ol/11/a

Selfreport on single question:

Please rate your life satisfaction these days, compared to the BEST and the WORST periods in your life that you have just identified

Answers rated on an open line scale:

-5 | worst period
-4 |
-3 |
-2 |
-1 |
0
+1 |
+2 |
+3 |
+4 |
+5 | best period

Preceded by recall of best and worst periods in life-experience

Name: ACSA (Anamnestic Comparative Self Assessment)

C-RA/h/sq/v/2/a

Selfreport on single question.:

Up to now, have you been able to satisfy most of your ambitions in life or have you had to settle for less than you had hoped for?

2 able to satisfy ambitions

1 settled for less

C-RG/h/sq/l/11/a

Selfreport on single question:

How would you rate yourself as to how successful or unsuccessful you have been in terms of achieving your own goals and aims in life? Think of the top of the ladder as being completely successful, the bottom being entirely unsuccessful

[10] completely successful

[9]

[8]

[7]

[6]

[5]

[4]

[3]

[2]

[1]

[0] entirely unsuccessful

M-ACO/u/mq/n/4/a

Selfreport on 6 questions:

A On the whole, life gives me a lot of pleasure

B On the whole, I am very satisfied with my life today

C Things are getting just worse for me as I get older

D All in all, I find a great deal of happiness today

E I have a lot to be sad about

F Nothing ever turn out for me the way I want it

Scoring

4 strongly agree

3

2

1 strongly disagree

Computation: simple addition. Possible range 6-24

4 very happy

3

2

1 not too happy

M-FH/cy/sq/v/5/a

Selfreport on single question:

"How do you feel in general, during the last year, happy or not so happy.....?"

- 5 very happy
- 4 fairly happy
- 3 not happy, not unhappy
- 2 not too happy
- 1 unhappy
- Don't know

M-FH/g/sq/n/11/b

Selfreport on single question:

Now I am going to ask you how you FEEL, not just at the moment, but GENERALLY in your life. How happy do you generally feel? On a scale from 0 to 10...

- 0 completely unhappy
- 1
- 2
- 3
- 4
- 5 neutral
- 6
- 7
- 8
- 9
- 10 completely happy

M-FH/u/sq/v/3/a

Selfreport on single question:

Do you feel.....?

- 3 happy
- 2 not too happy
- 1 unhappy

M-FH/u/sq/v/5/c

Selfreport on single question:

"How do you feel personally, how happy do you feel?"

Rated on a 5-step scale.
(Answer options not reported)

M-PL/h/sq/v/5/b

Selfreport on single question: following enumeration of lifegoals in six areas, the last of which was 'joy in living'

" How successful have you been in pursuit of that goal.....?"

- (joy in living)
- 5 had excellent fortune in this respect
- 4
- 3
- 2
- 1 found little satisfaction in this area

M-TH/g/sq/v/2/a

Selfreport on single question:

" Most of the time I feel happy"

- 2 true
- 1 false

M-TH/g/sq/v/3/c

Selfreport on single question:

".....general feelings...."
(lead item not fully reported)
1 happy most of the time
2 sometimes happy
3 unhappy most of the time
- can't say

M-TH/g/sq/v/5/d

Selfreport on single question

"How happy are you most of the time ...?"
1 very unhappy
2 moderately unhappy
3 neither unhappy nor happy
4 moderately happy
5 very happy

O-DT/c/mq/v/5/a

Selfreport on two questions:

A At this present moment, how do you feel about your life as a whole?
1 terrible (very dissatisfied)
2 unhappy (dissatisfied)
3 neutral (neither satisfied nor dissatisfied)
4 pleased (satisfied)
5 delighted (very satisfied)

B Taking all the above into consideration, on an ascending scale from 1-5, how satisfied are you with your life at present?

Question A asked at the beginning of the interview and question B at the end.

Summation: $(A+B)/2$

O-DT/c/sq/v/7/aa

Selfreport on single question:

How do you feel about your life as a whole right now.....?
7 delightfull
6 very satisfying
5 satisfying
4 mixed
3 dissatisfying
2 very dissatisfying
1 terrible
No opinion

Name: Andrews & Withey's 'Delighted-Terrible Scale' (modified version)

O-SLW/c/sq/n/7/a

Selfreport on single question:

We have talked about various parts of your life, now I want to ask you about your life as a whole. How satisfied are you with your life as a whole these days.....?

7 completely satisfied

6

5

4 neutral

3

2

1 completely dissatisfied

O-SLW/c/sq/v/4/g

Selfreport on single question:

How satisfied are you with your life as a whole these days?

4 quite satisfied

3 rather satisfied

2 rather unsatisfied

1 not at all satisfied

- no answer

- hard to say

O-SLW/c/sq/v/5/d

Selfreport on single question:

Taking everything into consideration, how satisfied are you with life in general at the present time? Would you say you are.....?

5 extremely satisfied

4 very satisfied

3 fairly satisfied

2 slightly satisfied

1 not satisfied"

O-SLW/c/sq/v/5/n

Selfreport on single question

Now taking everything into account, how satisfied or dissatisfied are you with your life these days?

5 very satisfied

4 satisfied

3 neither satisfied nor dissatisfied

2 dissatisfied

1 very dissatisfied

- don't know

- no answers

Numerical scale reversed

O-SLW/c/sq/v/5/q

Selfreport on single question:

Currently I am .. with life as a whole
1 very dissatisfied
2 dissatisfied
3 neither satisfied, nor dissatisfied
4 satisfied
5 very satisfied

O-SLW/c/sq/v/5/t

Selfreport on single question:

How would you describe your satisfaction with life in general at present.....?
1 bad
2 poor
3 fair
4 good
5 excellent

O-SLW/c/sq/v/7/b

Selfreport on single question:

Are you at this moment satisfied or dissatisfied with your life in general?"
7 very satisfied
6 for the greater part satisfied
5 rather more satisfied than dissatisfied
4 neither satisfied nor dissatisfied
3 somewhat more satisfied than dissatisfied
2 for the greater part dissatisfied
1 dissatisfied
- do not know, difficult to say

O-SLW/u/sq/n/11/a

Selfreport on single question:

All things considered, how satisfied or dissatisfied are you with your life as a whole?
10 completely satisfied

0 completely dissatisfied

O-SLW/u/sq/n/11/ca

Selfreport on single question:

Thinking about your own life and personal circumstances, how satisfied are you with your life as a whole?
1 very dissatisfied
2
3
4
5 neutral
6
7
8
9
10 very satisfied

First item in Cummins' 'Personal Well-being Scale' (labels used until 2005)

O-SLW/u/sq/n/11/d

Selfreport on single question:

All things considered, how satisfied are you with your life?

Again, pick a number between 0 and 10 to indicate how satisfied you are.

0 totally dissatisfied

1

2

3

4

5

6

7

8

9

10 totally satisfied

O-SLW/u/sq/n/11/e

Selfreport on single question:

Now here are some questions concerning how satisfied - or dissatisfied - you are with various things about your life, such as your standard of living, your education etc. To indicate this, would you use this card. If you are extremely SATISFIED with something you would call of the highest number, ten. If you are extremely DISSATISFIED you would mention the lowest number, zero. If you are neither extremely satisfied nor extremely dissatisfied you would mention some number in between zero and ten - the higher the number, the more satisfied, the lower the number the less satisfied.

How satisfied - or dissatisfied - are you with the following? Just read off the number that comes closest to how you feel.

We have talked about various parts of your life. Now taking everything into account, how satisfied or dissatisfied are you with your life as a whole?

0 dissatisfied

1

2

3

4

5

6

7

8

9

10 satisfied

O-SLW/u/sq/v/4/d

Selfreport on single question;

How satisfied are you with your life in general?

4 very satisfied

3 somewhat satisfied

2 somewhat dissatisfied

1 very dissatisfied

- no opinion

- not stated

O-SLW/u/sq/v/5/c

Selfreport on single question:

'How satisfied would you say you are with your life as a whole?'

4 completely satisfied

3 very satisfied

2 moderately satisfied

1 slightly satisfied

0 not satisfied at all

O-SLW/u/sq/v/5/d

Selfreport on single question:

Taking your life as a whole, are you

- 5 very satisfied
- 4 quite satisfied
- 3 more satisfied than discontented
- 2 more discontented than satisfied
- 1 quite dissatisfied

O-SLW/u/sq/v/7/a

Selfreport on single question:

Considering everything, how satisfied are you with your life as whole.....?

- 7 completely satisfied
- 6 satisfied
- 5 mostly satisfied
- 4 satisfied/dissatisfied
- 3 dissatisfied
- 2 very dissatisfied
- 1 completely dissatisfied

O-SLW/u/sqt/v/7/a

Selfreport on single question, asked twice in interview:

Considering everything, how satisfied are you with your life as a whole.....?

- 7 completely satisfied
- 6
- 5
- 4
- 3
- 2
- 1 completely dissatisfied

Summation: both scores added
Possible range: 2 to 14

O-SQL/c/sq/?/5/a

Selfreport on single question:

".....satisfaction with current quality of life"

(Full question not reported.)

- 1
- 2
- 3
- 4
- +
- (Response options: not reported)

O-Sum/c/mq/v/5/a

Selfreport on 3 questions:

A When you consider your present life as-a-whole, would you say you are....?

- 5 very happy
- 4 fairly happy
- 3 rather happy than unhappy
- 2 rather unhappy than happy
- 1 very unhappy
- DK/NA

B When you consider your present life as-a-whole, would you say you are.....?

- 5 very satisfied
- 4 fairly satisfied
- 3 rather satisfied than dissatisfied
- 2 rather dissatisfied than satisfied
- 1 fairly dissatisfied
- DK/NA

C How do you feel right now? Is your well-being.....?

5 very high

4 high

3 moderate

2 rather low

1 very low

- DK/NA

Summation: The summed scores were divided in three strata: low, medium and high quality of life

O-Sum/cy/mq/v/7/a

Selfreport on four questions:

Using the 1-7 scale below, indicate how much each of the following statements applies for you in the last 18 months.

A In most ways my life is close to ideal

B The conditions of my life are excellent

C I am satisfied with my life

D So far, I have gotten the important things I want in life

Answers rated:

7 applies completely

6 applies

5 applies slightly

4 neither applies nor does not apply

3 slightly not applicable

2 not applicable

1 applies not at all

Computation: A+B+C+D divided by 4

Name: Shortened Diener's Satisfaction with Life Scale (SWLS), last years version

(In the original scale item 5 reads: 'If I could live my life over, I would change nothing'. This item is left out in this selection because a positive answer to this question does not necessarily mean that the respondent doesn't like the life he/she actually lives.)

O-Sum/se/fi/?/5/a

Selfreport in focused interview:

Interviews on life after divorce, in which happiness and life-satisfaction were items. Content analysis of taped records by two raters. Rated instructions not reported

Ratings made on a 5 steps scale. (Rating scale not reported)

O-V/c/sq/v/5/a

Selfreport on single question:

I think of my life as interesting and satisfying

1 disagree

2 mostly agree

3 neither agree or disagree

4 mostly agree

5 agree

O-V/h/sq/n/11/a

Selfreport on single question:

Overall, how do you feel your life has turned out so far?

10

9

Appendix 2: Statistics used

<i>Symbol</i>	<i>Explanation</i>
AoV	<p>ANALYSIS of VARIANCE (ANOVA) Type: statistical procedure Measurement level: Correlate(s): nominal, Happiness: metric. In an ANOVA, the total happiness variability, expressed as the sum of squares, is split into two or more parts, each of which is assigned to a source of variability. At least one of those sources is the variability of the correlate, in case there is only one, and always one other is the residual variability, which includes all unspecified influences on the happiness variable. Each sum of squares has its own number of degrees of freedom (df), which sum up to $N_e - 1$ for the total variability. If a sum of squares (SS) is divided by its own number of df, a mean square (MS) is obtained. The ratio of two correctly selected mean squares has an F-distribution under the hypothesis that the corresponding association has a zero-value.</p> <p>NOTE: A significantly high F-value only indicates that, in case of a single correlate, the largest of the c mean values is systematically larger than the smallest one. Conclusions about the other pairs of means require the application of a Multiple Comparisons Procedure (see e.g. BONFERRONI's MULTIPLE COMPARISON TEST, DUNCAN's MULTIPLE RANGE TEST or STUDENT-NEWMAN-KEULS)</p>
B	<p>REGRESSION COEFFICIENT (non-standardized) by LEAST SQUARES (OLS) Type: test statistic Measurement level: Correlate: metric, Happiness: metric Theoretical range: unlimited</p> <p>Meaning: $B > 0$ A higher correlate level corresponds with, on an average, higher happiness rating. $B < 0$ A higher correlate level corresponds with, on an average, lower happiness rating. $B = 0$ Not any correlation with the relevant correlate.</p>
Beta	<p>(β) STANDARDIZED REGRESSION COEFFICIENT by LEAST SQUARES (OLS) Type: test statistic. Measurement level: Correlates: all metric, Happiness: metric. Range: [-1 ; +1]</p> <p>Meaning: $\beta > 0$ « a higher correlate level corresponds with, on an average, higher happiness rating. $\beta < 0$ « a higher correlate level corresponds with, on an average, lower happiness rating. $\beta = 0$ « no correlation. $\beta = + 1$ or -1 « perfect correlation.</p> <p>Remark: Mean of observations is subtracted from all observations if standardized.</p>
BMCT	<p>BONFERRONI's MULTIPLE COMPARISON TEST Type: statistical procedure Measurement level: Correlate: nominal, Happiness: metric</p> <p>Meaning: if the correlate is measured at c levels, the c mean happiness values can be ranked from low to high. A multiple comparison procedure judges for each of the $\frac{1}{2}c(c-1)$ pairs whether or not they differ significantly. A convenient way to represent the results is by ranking the c means and by underlining them in such a way that means which have a common underlining do NOT differ significantly.</p> <p>When added by us, this test is performed at the 95% confidence level for all the differences together.</p>

Chi ²	<p>CHI-SQUARE</p> <p>Type: test statistic</p> <p>Range: $[0; Ne * (\min(c,r)-1)]$, where c and r are the number of columns and rows respectively in a cross tabulation of Ne sample elements.</p> <p>Meaning:</p> <p>$Chi^2 \leq (c-1) * (r-1)$ means: no association</p> <p>$Chi^2 \gg (c-1) * (r-1)$ means: strong association</p>
D%	<p>DIFFERENCE in PERCENTAGES</p> <p>Type: descriptive statistic only.</p> <p>Measurement level: Correlate level: dichotomous, but nominal or ordinal theoretically possible as well.</p> <p>Happiness level: dichotomous</p> <p>Range: [-100; +100]</p> <p>Meaning: the difference of the percentages happy people at two correlate levels.</p>
DM	<p>DIFFERENCE of MEANS</p> <p>Type: descriptive statistic only.</p> <p>Measurement level: Correlate: dichotomous, Happiness: metric</p> <p>Range: depending on the happiness rating scale of the author; range symmetric about zero.</p> <p>Meaning: the difference of the mean happiness, as measured on the author's rating scale, between the two correlate levels.</p>
DMa	<p>DIFFERENCE IN ADJUSTED MEANS, See also Ma</p> <p>Computed in Analysis of Covariance (ANCOVA) or in multiple classification analysis (MCA)</p> <p>Seldom used in happiness research. See excerpted report for further reference.</p>
DMo	<p>DIFFERENCE IN MODUS (D= difference, Mo=modal score)</p> <p>Seldom used in happiness research. See excerpted report.</p>
DMr	<p>DIFFERENCE IN MEAN RIDITS</p> <p>Type: test statistic</p> <p>Measurement level: Happiness ordinal</p> <p>Range: [0; +1]</p> <p>Meaning:</p> <p>$Mr < .50$: average happiness in this subgroup lower than in the larger population</p> <p>$Mr = .50$: average happiness in this subgroup the same as in the larger population</p> <p>$Mr > .50$: average happiness in this subgroup higher than in the larger population</p> <p>'Ridit analysis' compares the distribution of happiness scores in subgroups to its distribution in the entire sample ("Relative to an Identified Distribution")</p> <p>Testing for significance can be performed through a "BROSS Confidence Interval" (BCI). If all values the BCI for a subgroup are above/below 0.500, the subgroup is significantly more/less happy than the larger population.</p>
DMt	<p>DIFFERENCE of MEANS AFTER TRANSFORMATION</p> <p>Type: descriptive statistic only.</p> <p>Measurement level: Correlate: dichotomous, Happiness: metric</p> <p>Theoretical range: [-10; +10]</p> <p>Meaning: the difference of the mean happiness (happiness measured at a 0-10 rating scale) between the two correlate levels.</p>

Dyx	<p>SOMERS' ASYMMETRIC TEST STATISTIC</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: ordinal, Happiness: ordinal</p> <p>Range: [-1; +1]</p> <p>Meaning:</p> <p>Dyx = 0 «no rank correlation</p> <p>Dyx = +1 «strongest possible rank correlation, where high correlate values correspond with high happiness ratings.</p> <p>Dyx = -1 «strongest possible rank correlation, where high correlate values correspond with low happiness ratings.</p>
E ²	<p>CORRELATION RATIO (Elsewhere sometimes called h² or ETA)</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: nominal or ordinal, Happiness: metric</p> <p>Range: [0; 1]</p> <p>Meaning: correlate is accountable for E² x 100 % of the variation in happiness.</p> <p>E² = 0 « knowledge of the correlate value does not improve the prediction quality of the happiness rating.</p> <p>E² = 1 « knowledge of the correlate value enables an exact prediction of the happiness rating</p>
F	<p>F-STATISTIC</p> <p>Type: asymmetric standard test statistic.</p> <p>Range: nonnegative unlimited</p> <p>Meaning : the test statistic is also called the "Variance Ratio" and is the ratio of two independent estimators of the same variance with n1 and n2 degrees of freedom respectively. The critical values of its probability distribution are tabulated extensively in almost any textbook on Statistics</p>
G	<p>GOODMAN & Kruskal's GAMMA</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: ordinal, Happiness: ordinal</p> <p>Range: [-1; +1]</p> <p>Meaning:</p> <p>G = 0 « no rank correlation</p> <p>G = +1 « strongest possible rank correlation, where high correlate values correspond with high happiness ratings.</p> <p>G = -1 « strongest possible rank correlation, where high correlate values correspond with low happiness ratings.</p>
gH	<p>Hedges's COEFFICIENT FOR GROUP DIFFERENCES</p> <p>Type: descriptive statistic only</p> <p>Measurement level: Correlate: dichotomous, Happiness: metric</p> <p>Range (theoretical): unlimited</p> <p>Meaning: effect size indicator for difference of means.</p>
Gs	<p>PARTIAL GAMMA. See: GAMMA</p> <p>Range: [-1, +1].</p> <p>Seldom used in happiness research. See excerpted report.</p>
lgt	<p>LOGIT COEFFICIENT</p> <p>Type: descriptive statistic only</p> <p>Measurement level: Correlate: dichotomous, Happiness level: dichotomous</p> <p>Range: unlimited</p> <p>Meaning:</p> <p>lgt = 0 « no association at all;</p> <p>lgt -> -/+ infinite « at least one level of the correlate allows a perfect prediction of the happiness.</p>

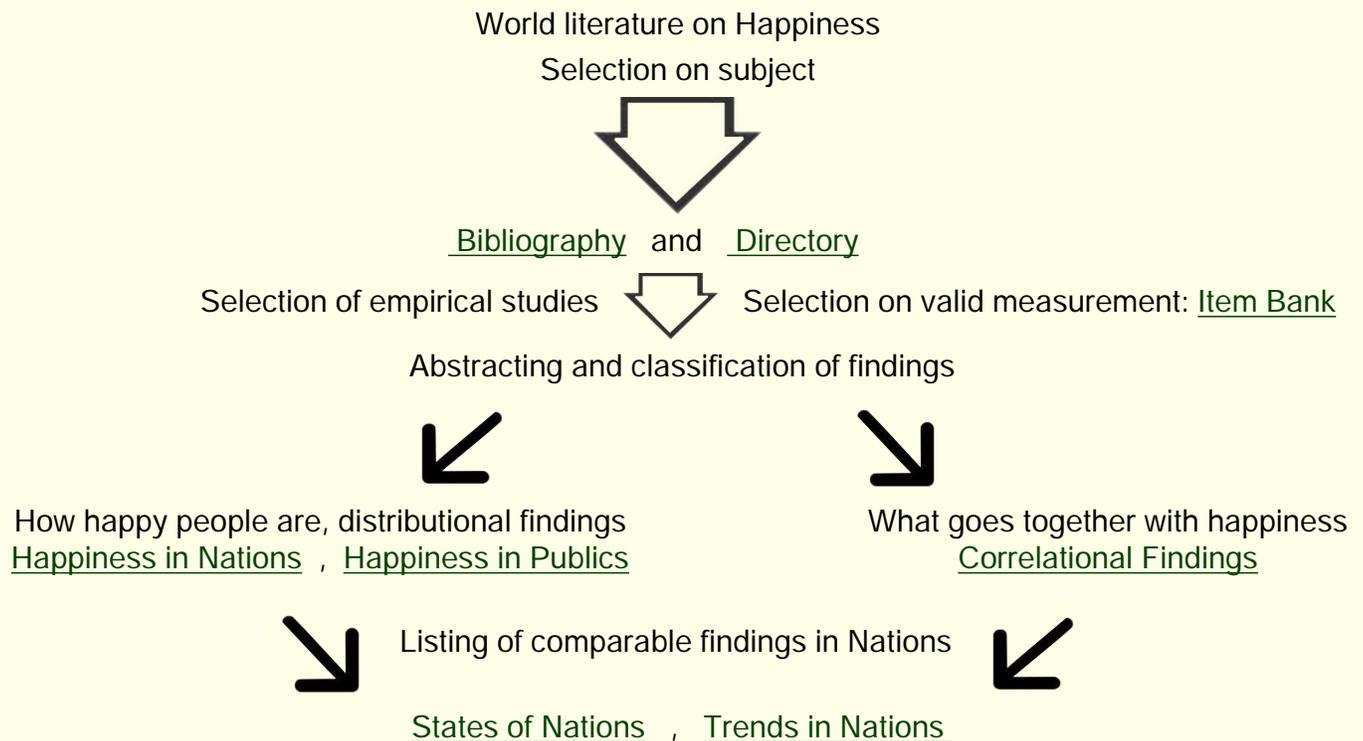

OR	<p>ODDS RATIO</p> <p>Type: descriptive statistic only.</p> <p>Measurement level: Correlate: dichotomous, Happiness level: dichotomous</p> <p>Range: nonnegative unlimited</p> <p>Meaning:</p> <p>OR = 1 « no association at all;</p> <p>OR = 0 or infinite « at least one level of the correlate allows an error-free prediction of the happiness.</p>
r	<p>PRODUCT-MOMENT CORRELATION COEFFICIENT (Also "Pearson's correlation coefficient" or simply 'correlation coefficient')</p> <p>Type: test statistic.</p> <p>Measurement level: Correlate: metric, Happiness: metric</p> <p>Range: [-1; +1]</p> <p>Meaning:</p> <p>$r = 0$ « no correlation ,</p> <p>$r = 1$ « perfect correlation, where high correlate values correspond with high happiness values, and</p> <p>$r = -1$ « perfect correlation, where high correlate values correspond with low happiness values.</p>
rpc	<p>PARTIAL CORRELATION COEFFICIENT</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: metric, Happiness: metric</p> <p>Range: [-1; +1]</p> <p>Meaning: a partial correlation between happiness and one of the correlates is that correlation, which remains after accounting for the contribution of the other influences, or some of them, to the total variability in the happiness scores.</p> <p>Under that conditions</p> <p>$rpc > 0$ « a higher correlate level corresponds with a higher happiness rating,</p> <p>$rpc < 0$ « a higher correlate level corresponds with a lower happiness rating,</p>
R ²	<p>COEFFICIENT of DETERMINATION</p> <p>Type: test statistic</p> <p>Measurement level: Correlates: all metric, Happiness: metric</p> <p>Range: [0; 1]</p> <p>Meaning:</p> <p>$R^2 = 0$ « no influence of any correlate in this study has been established.</p> <p>$R^2 = 1$ « the correlates determine the happiness completely.</p>
SNR	Statistic Not Reported
tau	<p>GOODMAN & Kruskal's TAU</p> <p>Type: descriptive statistic only.</p> <p>Measurement level: Correlate: nominal, Happiness: ordinal</p> <p>Range: [0; +1]</p> <p>Meaning:</p> <p>$\tau = 0$ « knowledge of the correlate value does not improve the prediction quality of the happiness rating.</p> <p>$\tau = 1$ « knowledge of the correlate value enables a perfect (error-free) prediction of the happiness rating.</p>

tb	<p>KENDALL'S RANK CORRELATION COEFFICIENT TAU-B Type: test statistic Measurement level: Correlate: ordinal, Happiness: ordinal Range: [-1; +1]</p> <p>Meaning: tb = 0 « no rank correlation tb = 1 « perfect rank correlation, where high values of the correlate correspond with high happiness ratings. tb = -1 « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.</p>
tc	<p>KENDALL'S TAU-C (Also referred to as Stuart's tau-c) Type: test statistic Measurement level: Correlate: ordinal, Happiness: ordinal Range: [-1; +1]</p> <p>Meaning: tc = 0 « no rank correlation tc = 1 « perfect rank correlation, where high values of the correlate correspond with high happiness ratings. tc = -1 « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.</p>

Appendix 3: About the World Database of Happiness

Structure of the collections

The World Database of Happiness is an ongoing register of scientific research on the subjective enjoyment of life. It brings together findings that are scattered throughout many studies and provides a basis for synthetic work.

Size of the collections
 1226 Happiness measures (Item Bank)

4258 Nations surveys in 206 Nations
 149 Distinguished publics in 1199 studies
 12032 Correlational findings in 1196 studies

Appendix 4 Further Findings in the World Database of Happiness

<i>Main Subjects</i>	<i>Subject Description</i>	<i>Number of Studies</i>
A1	ACTIVITY: LEVEL (how much one does)	58
A2	ACTIVITY: PATTERN (what one does)	32
A3	AFFECTIVE LIFE	48
