## Correlational Findings on Happiness and PERSONALITY: CURRENT TRAITS Subject Code: P4

© on data collection: [Ruut Veenhoven, Erasmus University Rotterdam](#)

### Classification of Findings

<i>Subject Code</i>	<i>Description</i>	<i>Nr of Studies on this Subject</i>
P4	PERSONALITY: CURRENT TRAITS	6
P4.1	Aggressive, Angry	17
P4.2	Ambitious	3
P4.3	Active	6
P4.5	Agreeing, yea-saying	5
P4.7	Anxious	24
P4.8	Assertive	4
P4.9	Approval seeking	23
P4.11	Blaming	3
P4.12	Bold	1
P4.13	Calm	0
P4.14	Clever	3
P4.15	Critical	0
P4.16	Conscientious	5
P4.17	Coherence (sense of)	2
P4.21	Conservating	1
P4.22	Conservative	4
P4.24	Defensive	8
P4.30	Dominant	8
P4.30.1	. need for dominance	2
P4.30.2	. dominant behavior	4
P4.31	Efficacious, productive	6
P4.32	Egoistic	5
P4.33	Empathic	2
P4.36	Emotional	1
P4.39	Extraverted	14
P4.40	Extreme	0
P4.41	Fail anxious	4
P4.44	Fortuitous	2
P4.46	Genuine	2
P4.47	Guilty	3

P4.48	Hedonistic	0
P4.49	Helpless	2
P4.50	Honest	0
P4.52	Humorous	1
P4.53	Impulsive (vs self controlled)	4
P4.54	Independent	8
P4.55	Individualistic	0
P4.57	Inhibited	11
P4.58	Inner locus of control	77
P4.59	Interested	2
P4.61	Intrinsically motivated	1
P4.62	Irritable	8
P4.63	Jealous	2
P4.64	Kind	5
P4.65	Liking	0
P4.69	Modest (vs supercilious)	3
P4.70	Moral	5
P4.71	Naive	1
P4.73	Nervous	1
P4.74	Neurotic	4
P4.76	Open	7
P4.77	Optimistic	7
P4.79	Outgoing	2
P4.80	Practical	2
P4.81	Persistent	5
P4.85	Positive reacting	15
P4.87	Psychotic	3
P4.89	Resigned	3
P4.90	Rigid	4
P4.93	Secure	1
P4.95	Sensation seeking	10
P4.96	Self-actualization (need for)	9
P4.98	Self-centered	0
P4.99	Self-conscious	2
P4.100	Self-confidant	17
P4.101	Self-disclosing	1
P4.101.1	. degree of self-disclosure	1
P4.101.2	. style of self-disclosure	3
P4.105	Sober	1
P4.106	Sociable	23
P4.106.1	. tendency to like people	4
P4.107	Solidary, cooperative	4

P4.108	Speedy, hurried	1
P4.109	Stable	3
P4.110	Suggestible	1
P4.111	Tense	5
P4.113	Tolerant	0
P4.114	Tough	1
P4.115	Trust in people	16
P4.116	Trust-worthy	2
P4.117	Vigorous	4
P4.120	Zestful	2

## Study

## GEORG 1978

*Reported in:* George, L.K.  
The Impact of Personality and Social Status Factors upon Levels of Activity and Psychological Well-Being.  
Journal of Gerontology, 1978, Vol. 33, 840 - 847. ISSN 0022 1422  
Page in Report: 845

*Population:* 50+ aged, whites, Durham, North Carolina, USA, 197?

*Sample:*

*Non-Response:*

*N:* 380

## Correlate

*Authors label:* Personality (1)

*Our classification:* PERSONALITY: CURRENT TRAITS, code P4

*Measurement:* Cattell (1970) personality variables.

A. Outgoing  
B. Intelligence  
C. Emotional stability  
E. Dominance  
F. Soberness  
G. Conscientiousness  
H. Social Boldness  
I. Tough mindedness  
L. Sense of thrust  
M. Practicality  
N. Naïvety  
O. Security  
Q1 Conservation  
Q2 Selfsufficiency  
Q3 Control  
Q4 Tenseness  
QI Extraversion  
QII Anxiety  
QIII Cortial arousal  
QIV Independance

## Correlational finding on Happiness and PERSONALITY: CURRENT TRAITS

Subject code: P4

## Study

## GURMA 1972

*Reported in:* Gurman, A.S.  
Therapists' Mood Patterns and Therapeutic Facilitativeness. Therapists' Mood Patterns and Therapeutic Facilitativeness.  
Journal of Counseling Psychology, 1972, Vol. 19, 169 -170  
Page in Report: 170

*Population:* Student psychotherapists, Columbia University, USA, 1971

*Sample:*

*Non-Response:* -

*N:* 12

## Correlate

*Authors label:* Therapist's functioning (1)

*Our classification:* PERSONALITY: CURRENT TRAITS, code P4

*Measurement:* Rating of individual therapy sessions (recorded on audiotapes) by 3 advanced graduate students in counseling psychology.  
Two 4-minute segments from each of 24 tapes were rated independently by the raters for each variable. The average of these ratings per scale per therapist was used.  
Inter-rater reliabilities ranged from .69 to .97.  
Scales from Truax & Carkhuff 1967.

## Observed Relation with Happiness

## Correlational finding on Happiness and PERSONALITY: CURRENT TRAITS

Subject code: P4

### Study                      SCHAE 1963/1

*Reported in:* Schaefer, E.S. ;Bayley, N.  
 Maternal Behavior, Child Behavior and Their Intercorrelation.  
 Monographs of the Society for Research in Child Development, Serial no. 87, 1963, Vol. 28, 3 - 127  
 Page in Report: 29

*Population:* Children followed from age 0 to 18, Berkeley, California, USA, 1929-47

*Sample:*

*Non-Response:* 13% drop-outs (7 children and their mothers)

*N:* 54

### Correlate

*Authors label:* Current characteris-tics (at 10-36 months of age) (1)

*Our classification:* PERSONALITY: CURRENT TRAITS, code P4

*Measurement:* Repeated expert rating on the basis of observation of expressive behavior in test situation on bi-polar 7-point scales.  
 Rated 12 times between 10-36 months of age. Rating combined: months 10 + 11 + 12 / 13 + 14 + 15 / 18 + 21 + 24 / 27 + 30 + 36.

1. Responsiveness to persons  
 slight - marked

2. Activity  
 Inactivity - vigorous

3. Speed of movements  
Slow - rapid

4. Degree of strangeness  
Shy - unreserved

5. Amount of positive behaviour  
Negative - positive

6. Irritability (tendency to be sensitive to and react to stimulation)  
Calm - excitable

*Remarks:* Happiness (hedonic level) was rated 12 times between months 10-36 of age. Ratings combined: months 10 + 11 + 12 / 13 + 14 + 15 / 18 + 21 + 24 / 27 + 30 + 36.

Months	Months	Months	Months
10-12	13-15	18-24	27-36

## Correlational finding on Happiness and PERSONALITY: CURRENT TRAITS

Subject code: P4

### Study

SCHAE 1963/2

*Reported in:* Schaefer, E.S.; Bailey, N.  
Maternal Behavior, Child Behavior and Their Intercorrelation.  
Monographs of the Society for Research in Child Development, Serial no. 87, 1963, Vol. 28, 3 - 127  
Page in Report: 39

*Population:* Girls, followed from age 0 to 18, Berkely, California, USA, 1929-47

*Sample:*

*Non-Response:*

*N:* 19

### Correlate

*Authors label:* Personality in adolescence (age 12-18) (1)

*Our classification:* PERSONALITY: CURRENT TRAITS, code P4

*Measurement:* Ratings by four judges on the basis of notes from observations and interviews between age 12 to 18

Ratings were made on 7 point bi-polar adjective scales.

- a. Timid, self-conscious, sensitive, lacks confidence, shy, easily hurt, inhibited, serious, humorless, rigid, precise
- b. Courteous, respectful, conservative, compliant, tactful, cooperative, patient, considerate
- c. Conscientious, dependable, persevering
- d. Friendly, talkative, not unfriendly
- e. Social in situation, interested in people, natural, straightforward
- f. Independant, assertive, outgoing, leader, resourceful, takes initiative, independant at home
- g. Bold, impulsive, boastful, uninhibited, show-off, pleasure loving, opinionated
- h. Irritable, disrespectful, domineering, pugnacious, noisy, demanding, tactless, not dependable, excitable, distractable
- i. Defiant, rude, sarcastic, critical
- j. Hostile, resentful
- k. Sulky, bitter
- l. Reserved, cold, aloof, uncommunicative
- m. Popular, belongs to groups
- n. Calm, not nervous

*Remarks:* Adolescent happiness assessed in the same way.  
(Both HAP 7.3 and AFF 5.1 are sumscores of adjective rating from the same sources)

## Correlational finding on Happiness and PERSONALITY: CURRENT TRAITS

Subject code: P4

### Study WESSM 1966/2

*Reported in:* Wessman, A.E.;Ricks, D.F.  
Mood and Personality.  
Holt, Rinehart and Wilson, 1966, New York, USA. ISBN 03 0541 151 8  
Page in Report: 113-115

*Population:* Male college students, followed 3 years, Harvard University, USA, 1957-60

*Sample:* Non-probability chunk sample

*Non-Response:* 37%: 9 dropouts, incomplete; about the same happiness distribution.

*N:* 17

## Correlate

*Authors label:* Personality traits (1)

*Our classification:* PERSONALITY: CURRENT TRAITS, code P4

*Measurement:* 16 Personality Factor Test (16 PF test; see Cattell, 1950).

*Remarks:* Total factor scores for the two forms (one taken in elation, the other in depression) were correlated with the mean daily average score on the Elation-Depression Scale).  
Only significant associations with the 16 factors were reported.

## Observed Relation with Happiness

Happiness Measure	Statistics	Elaboration/Remarks
<a href="#">A-ARE/md/sqr/v/10/a</a>	$r=+.61$ $p<.05$	1. Parmia (Parasympathetic Immunity) vs Threctia (Threat Reactivity).
<a href="#">A-ARE/md/sqr/v/10/a</a>	$r=+.52$ $p<.05$	2. Dominance vs submissiveness
<a href="#">A-ARE/md/sqr/v/10/a</a>	$r=-.49$ $p<.05$	3. Guilt proneness vs confidence

## Correlational finding on Happiness and Aggressive, Angry

Subject code: P4.1

### Study

### BACHM 1970

*Reported in:* Bachman, J.G.; Kahn, R.L.; Mednick, M.; Davidson, T.N.  
Youth in Transition. Vol.II: The Impact of Family Background on Intelligence in 10th-Grade Boy.  
Institute for Social Research, 1970, University of Michigan, Ann Arbor, USA  
Page in Report: 122

*Population:* Public highschool boys followed 3 years from grade 10, USA, 1966-69

*Sample:*

*Non-Response:* 2.8% incomplete information in 1966

*N:* 1799

## Correlate

*Authors label:* Impulse to aggression (1)

*Our classification:* Aggressive, Angry, code P4.1

*Measurement:* 4-item index of closed questions on feelings of swearing, losing temper at teachers, being rude to teachers, picking a fight with parents.

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<a href="#">O-HP/g/mq/v/5/a</a>	$r=-.33$ $p<.001$	Both variables assessed at T1.

## Correlational finding on Happiness and Aggressive, Angry Subject code: P4.1

### Study BACHM 1977

*Reported in:* Bachman, J. G.; O'Malley, P. M.; Johnston, J. Youth in Transition, Vol. VI: Adolescence to Adulthood, Change and Stability in the Lives of Young Men. Institute for Social Research, 1970, University of Michigan, Ann Arbor, USA  
Page in Report:

*Population:* Public highschool boys followed 8 years from grade 10, USA, 1966-74

*Sample:*

*Non-Response:* 2.8% at T1, 17.2% at T2, 21.0% at T3, 28.9% at T4, 28.5% at T5

*N:* 1628

## Correlate

*Authors label:* Impulse to aggression (1)

*Our classification:* Aggressive, Angry, code P4.1

*Measurement:* A mean of the following four items: "I feel like swearing", "I feel like losing my temper at people", "I feel like being a little rude to people", "I feel like picking a fight or arguing with my parents"  
Scale: 1.00 = never true to 5.00 = almost always true.  
Assessed at T1, T2, T3 and T4

## Observed Relation with Happiness

Levels of Emotional Strain in East Asian Cities.

Asian Folklore & Social Life Monographs, The Orient Cultural Service, 1972, Taipei, Formosa

Page in Report: 43

*Population:* 18+ aged, general public, Hong Kong, South East Asia, 1967

*Sample:*

*Non-Response:* 21%

*N:* 3966

### Correlate

*Authors label:* Hostility (1)

*Our classification:* Aggressive, Angry, code P4.1

*Measurement:* Six item index. Typical items are :

- Some people make you dislike them so that whatever they want you to do, you just want to do the opposite.
- You feel that you are going to explode.

For each item, the respondent was asked if he experienced the symptom many times, sometimes, hardly ever, or never (1 = many times and sometimes, 0 = hardly ever and never).

Maximum score = 6, minimum score = 0.

Those with a score of two or more are considered as hostile.

## Observed Relation with Happiness

Happiness Measure	Statistics	Elaboration/Remarks
-------------------	------------	---------------------

O-SLW/c/sq/n/10/aaBeta=+.17  
p<.01

Individual happiness (not average) by trusting most people.

Beta controlled for other individual level variables:

- religion
- conservative ideology
- confidence in parliament
- income
- age
- gender
- education
- marital status
- children
- selfemployed
- housewife
- retired
- student
- unemployed
- service attendance (church etc.)
- belief in superior being

O-SLW/c/sq/n/10/aaBeta=+.10  
p<.01

Beta additionally controlled for aggregated variables at country level:

- infant mortality
- years of independence
- share of catholics
- share of protestants
- bicameral system
- openness to trade
- investment price level
- postcommunist
- Asia
- Latin America
- Africa
- Middle East and North Africa

### Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
--------------------------	-------------------	----------------------------

O-SLW/c/sq/n/10/aaBeta=+.14  
p<.01

Individual happiness (not average) by having conservative ideology.

Beta controlled for other individual level variables:

- religion
- confidence in parliament
- trust most people
- income
- age
- gender
- education
- marital status
- children
- selfemployed
- housewife
- retired
- student
- unemployed
- service attendance (church etc.)
- belief in superior being

O-SLW/c/sq/n/10/aaBeta=+.15  
p<.01

Beta additionally controlled for aggregated variables at country level:

- infant mortality
- years of independence
- share of catholics
- share of protestants
- bicameral system
- openness to trade
- investment price level
- postcommunist
- Asia
- Latin America
- Africa
- Middle East and North Africa

## Correlate

*Authors label:* Defense mechanisms. (1)

*Our classification:* Defensive, code P4.24

*Measurement:* Inventory containing 10 stories, dealing with the following conflict areas: authority, independence, masculinity (male form), femininity (female form), competition and situational. After reading each story each S was asked to respond to four questions corresponding to four types of behavior evoked by the situation described in the story:

- purpose actual behavior
- impulsive behavior (in fantasy)
- thoughts
- feelings

Five responses are provided for each question, each response representing one of five defense mechanisms. Each S marked a plus for the response most representative for his reaction and a minus for the one least representative. (Defense Mechanism Inventory; see Gleser & Ihilevich, 1969).

1. TURNING AGAINST OTHERS: Defenses that deal with conflict through attacking a real or presumed external frustration object (Turning against Object cluster).
2. PROJECTION: Defenses which justify the expression of aggression towards an external object through first attributing negative intent or characteristics to it (Projection cluster).
3. INTELLECTUALIZATION: Defenses that deal with conflict through invoking a general principle that 'splits off' affect from content and represses the former; e.g. intellectualization, isolation, rationalization (Principalization cluster).
4. TURNING AGAINST SELF: Defenses that deal with conflict through directing aggressive behavior towards S himself; e.g. masochism and auto-sadism (Turning against Self cluster)
5. REVERSAL: Defenses that deal with conflict by responding in a positive or neutral fashion to a frustrating object which might be expected to evoke negative reaction, e.g. negation, denial, reaction formation, and repression (Reversal cluster).

*Remarks:* Correlations were presented for males only. Among females no relationships were found, except in the case of turning against others.

## Observed Relation with Happiness

*Sample:* Non-probability accidental sample

*Non-Response:* 0 %

N: 121

---

## Correlate

*Authors label:* Decision 1: egalitarian over other-rewarding

*Our classification:* Egoistic, code P4.32

*Measurement:* Ss met in one large room and were explained that they would randomly be assigned one of two roles in an experiment:  
 A: Passive role (dead), no say in the decision, only asked what they would do if they had been in the other role and/or to predict the choice of B  
 B: Active role (live), makes two decisions about partition of money between A and B.  
 After this introduction Ss were randomly assigned either role A or role B.  
 Next Ss answered written questions about respectively general happiness (GH), comparative happiness (CH) and momentary happiness (MH)  
 Then B's were asked to choose between two options for partition between all A and B subjects, which were equally rewarding for themselves:  
 1 other-rewarding: 900 for A, 600 for B  
 2 egalitarian: 600 for A, 600 for B

*Measured Values:* Egalitarian 34 %, Other-rewarding 66 %

*Remarks:* Values were in Spanish Peseta's: 150 = US\$ 1  
 Only active subjects (B) considered here.

## Observed Relation with Happiness

### Correlate

*Authors label:* Perceived freedom and control in life

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Selfreport on single question:  
Some people feel they have completely free choice and control over their lives, while other people feel that what they do has no real effect on what happens to them. Please use this scale where 1 means "none at all" and 10 means "a great deal" to indicate how much freedom of choice and control you feel you have over the way your life turns out.

*Remarks:* Data weighed

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>

The Structure of Psychological Well-Being Revisited.  
Journal of Personality and Social Psychology, 1995, Vol. 69, 719 - 727. ISSN 0022 3514  
Page in Report: 724

*Population:* 25+ aged, USA, 1993

*Sample:* Probability multi-stage cluster sample

*Non-Response:*

*N:* 1108

## Correlate

*Authors label:* Environmental mastery

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Self report on 3 items rated on a 6-point scale ranging from completely disagree to completely agree.  
-High scorers: have a sense of mastery and competence in managing the environment; control complex array of external activities; make effective use of surrounding opportunities; able to choose or create contexts suitable to personal needs and values.  
-Low scorers: have difficulty managing everyday affairs; feel unable to change or improve surrounding context; are unaware of surrounding opportunities; lack sense of control over external world.

*Reported in:* Smits, C.H.; Deeg, D.J.; Bosscher, R.J.  
Well-Being and Control in Older Persons: The Prediction of Well-Being from Control Measures.  
International Journal of Aging and Human Development, 1995, Vol. 40, 237 -251  
Page in Report: 241, 245, 246

*Population:* Elderly, Sassenheim, the Netherlands, 1992

*Sample:* Probability simple random sample

*Non-Response:* 24,4%

*N:* 119

## Correlate

*Authors label:* mastery

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Selfreport on five items.  
 Typical question: "I have little control over the things that happen to me."  
 Five-item version of Mastery scale Pearlin and Schooler. Scale translated by Ormel, Kempen, Steverink et al.

*Measured Values:* M= 11,61 (sd=2,75)

*Error Estimates:* Cronbach alpha = .51

*Remarks:* Data available for 44 Ss, only 30 in regression analysis.

## Observed Relation with Happiness

Happiness Measure	Statistics	Elaboration/Remarks
<u>A-BB/cw/mq/v/4/g</u>	<u>r=-.36 ns</u>	positive affect = -.39 (05) negative affect = -.14 (ns)
<u>A-BB/cw/mq/v/4/g</u>	<u>Beta=-.37 ns</u>	Beta controlled for: - gender - neuroticism - sense of coherence - social inadequacy

## Correlational finding on Happiness and Inner locus of control

Subject code: P4.58

### Study

**TIMME 1997/12**

*Reported in:* Timmermans, D.

Correlates of Happiness in 42 Nations: Analysis of the World Values Study 1990 - 1991.

Working paper, Erasmus University Rotterdam, Department of Sociology, February 1997, Netherlands

Page in Report:

*Population:* 18+ aged, general public, Canada, 1990

*Sample:*

*Non-Response:*

*N:* 1730

### Correlate

*Authors label:* Perceived fate control (1)

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Single question: "How much freedom of choice and control do you feel you have over the way your life turns out?" rated on a 10-point numerical scale ranging from 'none at all' to 'a great deal'.

## Correlational finding on Happiness and Inner locus of control

Subject code: P4.58

### Study

TIMME 1997/17

*Reported in:* Timmermans, D.

Correlates of Happiness in 42 Nations: Analysis of the World Values Study 1990 - 1991.

Working paper, Erasmus University Rotterdam, Department of Sociology, February 1997, Netherlands

Page in Report:

*Population:* 18+ aged, general public, Portugal, 1990

*Sample:*

*Non-Response:*

*N:* 1185

### Correlate

*Authors label:* Perceived fate control (1)

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Single question: "How much freedom of choice and control do you feel you have over the way your life turns out?" rated on a 10-point numerical scale ranging from 'none at all' to 'a great deal'.

## Correlational finding on Happiness and Inner locus of control

Subject code: P4.58

**Study**                      **TIMME 1997/22**

*Reported in:* Timmermans, D.  
 Correlates of Happiness in 42 Nations: Analysis of the World Values Study 1990 - 1991.  
 Working paper, Erasmus University Rotterdam, Department of Sociology, February 1997, Netherlands  
 Page in Report:

*Population:* 18+ aged, general public, Argentina, 1990

*Sample:*

*Non-Response:*

*N:* 1002

## Correlate

*Authors label:* Perceived fate control (1)

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Single question: "How much freedom of choice and control do you feel you have over the way your life turns out?" rated on a 10-point numerical scale ranging from 'none at all' to 'a great deal'.

## Correlational finding on Happiness and Inner locus of control

Subject code: P4.58

### Study

TIMME 1997/28

*Reported in:* Timmermans, D.

Correlates of Happiness in 42 Nations: Analysis of the World Values Study 1990 - 1991.

Working paper, Erasmus University Rotterdam, Department of Sociology, February 1997, Netherlands

Page in Report:

*Population:* 18+ aged, general public, Brazil 1990

*Sample:*

*Non-Response:*

*N:* 1782

### Correlate

*Authors label:* Perceived fate control (1)

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Single question: "How much freedom of choice and control do you feel you have over the way your life turns out?" rated on a 10-point numerical scale ranging from 'none at all' to 'a great deal'.

## Correlational finding on Happiness and Inner locus of control

Subject code: P4.58

### Study TIMME 1997/32

*Reported in:* Timmermans, D.

Correlates of Happiness in 42 Nations: Analysis of the World Values Study 1990 - 1991.

Working paper, Erasmus University Rotterdam, Department of Sociology, February 1997, Netherlands

Page in Report:

*Population:* 18+ aged general public, India, 1990

*Sample:*

*Non-Response:*

*N:* 2500

### Correlate

*Authors label:* Perceived fate control (1)

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Single question: "How much freedom of choice and control do you feel you have over the way your life turns out?" rated on a 10-point numerical scale ranging from 'none at all' to 'a great deal'.

## Correlational finding on Happiness and Inner locus of control

Subject code: P4.58

### Study

TIMME 1997/33

*Reported in:* Timmermans, D.

Correlates of Happiness in 42 Nations: Analysis of the World Values Study 1990 - 1991.

Working paper, Erasmus University Rotterdam, Department of Sociology, February 1997, Netherlands

Page in Report:

*Population:* 18+ aged, general public, Czechoslovakia, 1990

*Sample:*

*Non-Response:*

*N:* 1396

### Correlate

*Authors label:* Perceived fate control (1)

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Single question: "How much freedom of choice and control do you feel you have over the way your life turns out?" rated on a 10-point numerical scale ranging from 'none at all' to 'a great deal'.

## Correlational finding on Happiness and Inner locus of control

Subject code: P4.58

**Study**                      **TIMME 1997/36**

*Reported in:* Timmermans, D.  
Correlates of Happiness in 42 Nations: Analysis of the World Values Study 1990 - 1991.  
Working paper, Erasmus University Rotterdam, Department of Sociology, February 1997, Netherlands  
Page in Report:

*Population:* 18+ aged, general public, Bulgaria, 1990

*Sample:*

*Non-Response:*

*N:* 1034

## Correlate

*Authors label:* Perceived fate control (1)

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Single question: "How much freedom of choice and control do you feel you have over the way your life turns out?" rated on a 10-point numerical scale ranging from 'none at all' to 'a great deal'.

## Observed Relation with Happiness

## Correlational finding on Happiness and Inner locus of control

Subject code: P4.58

### Study **TIMME 1997/8**

*Reported in:* Timmermans, D.

Correlates of Happiness in 42 Nations: Analysis of the World Values Study 1990 - 1991.

Working paper, Erasmus University Rotterdam, Department of Sociology, February 1997, Netherlands

Page in Report:

*Population:* 18+ aged, general public, Spain, 1990

*Sample:*

*Non-Response:*

*N:* 4147

### Correlate

*Authors label:* Perceived fate control (1)

*Our classification:* Inner locus of control, code P4.58

*Measurement:* Single question: "How much freedom of choice and control do you feel you have over the way your life turns out?" rated on a 10-point numerical scale ranging from 'none at all' to 'a great deal'.

## SMITH 1999

*Reported in:* Smith, R.H.; Parrott, W.G.; Diener, E.; Hoyle, R.H.; Kim, S.H.  
 Dispositional Envy.  
 Personality and Social Psychology Bulletin, 1999, Vol. 25, 1007 - 1020. ISSN 0146 1672  
 DOI:10.1177/01461672992511008  
 Page in Report:

*Population:* Undergraduate students, USA, 1999

*Sample:* Non-probability accidental sample

*Non-Response:*

*N:* 130

## Correlate

*Authors label:* Dispositional Envy Scale (DES)

*Our classification:* Jealous, code P4.63

*Measurement:* Dispositional Envy Scale (DES), consisting of 8 items:  
 1. I feel envy every day  
 2. The bitter truth is that I generally feel inferior to others  
 3. Feelings of envy constantly torment me  
 4. It is so frustrating to see some people succeed so easily  
 5. No matter what I do, envy always plagues me  
 6. I am troubled by feelings of inadequacy  
 7. It somehow doesn't seem fair that some people seem to have all the talent  
 8. Frankly, the success of my neighbours makes me resent them

*Remarks:* The authors stress that "envy" is different from "jealousy"  
 Envy involves two people and corresponds to the feeling aroused when one person desires another's advantage.  
 Jealousy involves three people and corresponds to the feelings aroused when one person fears losing a special relation to a rival.

*Population:* 18-70 aged, general public, the Netherlands, 1986

*Sample:*

*Non-Response:* 28%

*N:* 2016

## Correlate

*Authors label:* Disaster awareness (2)

*Our classification:* Anxious, code P4.7

*Measurement:* 5item Guttman-index:

- 1) end to world
- 2) big war
- 3) environmental disaster
- 4) nuclear disaster
- 5) economic disaster

Ss were asked whether they expected such disasters.

Probability rated on a 5-point scale, ranging from strongly disagree to strongly agree (order reversed).

*Reported in:* Warr, P.;Cook, J.;Wall, T.  
 Scales for the Measurement of Social Work Attitudes and Aspects of Psychological.  
 Journal of Occupational Psychology, 1979, Vol. 52, 129 - 148. ISSN 0305 8107  
 Page in Report: 140

*Population:* Factory workers, blue collar, UK, 1977

*Sample:*

*Non-Response:*

*N:* 590

---

## Correlate

*Authors label:* Overall self-rated anxiety (1)

*Our classification:* Anxious, code P4.7

*Measurement:* Single question: " In general how worried or concerned do you feel these days?"  
 Answers scored on a seven point scale ranging from "not at all concerned"(1) to "extremely worried"(7).

---

## Correlational finding on Happiness and Moral

Subject code: P4.70

### Study **HEADE 1981**

*Reported in:* Headey, B.  
The Quality of Life in Australia  
Social Indicators Research, 1981, Vol. 9, 155 - 18. ISSN p 0303 8300;ISSN e 1573 0921 DOI:10.1007/BF00286195  
Page in Report: 166

*Population:* Adults, general public, Australia 1978

*Sample:* Probability sample (unspecified)

*Non-Response:* not reported

*N:* 679

## Correlate

*Authors label:* Own moral qualities index

*Our classification:* Moral, code P4.70

*Measurement:* Index of 3 single questions on satisfaction with:  
 a: How dependable and responsible you can be  
 b: Your own sincerety and honesty  
 c: How generous and kind you are  
 All scored on a 1-9 rating scale, summation by average.

*Measured Values:* M = 7.2 SD = 1.0

*Remarks:* All items scored on the same rating scale as the question on happiness.

### Study BAXTE 1917

*Reported in:* Baxter, M.F.; Yamada, K.; Washburn, M.F.  
Directed Recall of Pleasant and Unpleasant Experiences.  
American Journal of Psychology, 1917, Vol. 28, 155 - 157  
Page in Report: 156-157

*Population:* Female college students, USA, 191?

*Sample:*

*Non-Response:*

N: 69

## Correlate

*Authors label:* Promptness of plea- sant association. (1)

*Our classification:* Positive reacting, code P4.85

*Measurement:* Each S was given 5 stimulus words in succession with the instruction to recall an unpleasant associated personal experience; then 5 words with the instruction to recall a pleasant idea. When a word had suggested an (un)pleasant idea the S rapped on the table. The intervals between giving the word and the S's rap were measured by a stopwatch. Sixty stimulus words were used, thirty each for the pleasant and unpleasant recalls. The average reaction time for the pleasant experiences was divided by the average reaction time for the unpleasant experiences.

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<a href="#">A-CP/g/rdp/v/2/a</a>		The results offer some confirmation of the idea that there is a positive correlation between a cheerful temperament and especially slow recall of unpleasant ideas.

*Authors label:* Negative thinking (3)  
*Our classification:* Positive reacting, code P4.85

*Measurement:* Ss were invited to think of a stressful event in the recent past and then complete a 46-item event-outcome- appraisal questionnaire (Goodhart 1981); 20 items in the questionnaire described negative outcomes.

Typical items are:

Self-relevant items:

1. I began to feel that I was doing little toward my life enjoyment or personal development.
2. I became more uncertain about who I am or want to become.
3. I began to doubt whether my present career plans are consistent with true interests and skills.

Externally relevant items:

1. The event made it more difficult to carry out ordinary daily activities.
2. The event created a financial strain.
3. Others were unaware of or insensitive to my difficulties.

Negative thinking assessed at T1.

## Correlational finding on Happiness and Positive reacting

Subject code: P4.85

### Study                      MORGA 1919

*Reported in:* Morgan, E.;Mull, H.K.;Washburn, M.F.  
An Attempt to Test Moods or Temperaments of Cheerfulness and Depression by Directed Recall of Emotionally Toned Experiences.  
American Journal of Psychology, 1919, Vol. 30, 302 - 304  
Page in Report: 303-304

*Population:* Female students, college USA, 1919

*Sample:*

*Non-Response:*

*N:* 97

### Correlate

*Authors label:* Pleasant associations. (1)

*Our classification:* Positive reacting, code P4.85

*Measurement:* Score based on the difference between the number of pleasant associations reported by each S, and the average number of pleasant associations reported by the whole sample on each of 5 lists of 50 stimulus words, using one series on each of 5 consecutive days.

Ss were asked: 'When I pronounce a word to you, observe what idea that word first calls to your mind, and report whether it is a pleasant or unpleasant idea. If it seems neither pleasant nor unpleasant, but indifferent, continue thinking until either a pleasant or unpleasant idea is suggested and report which it is'.

## Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>
<a href="#">A-CP/g/rdp/v/5/a</a>	<u>r=+</u>	Analysis of the results strongly suggests the existence of a real positive correlation between exceeding or falling below the average number of pleasant associations and cheerfulness.

---

## Correlate

*Authors label:* Social desirability

*Our classification:* Approval seeking, code P4.9

*Measurement:* 6-item version of the Crowne-Marlow social desirability scale. Both the affirmation of implausible virtues (e.g. I am always courteous, even to people who are disagreeable) and the denial of plausible faults (e.g. There have been occasions when I've felt like smashing something) contribute to a higher social desirability score. Low scores indicate less socially desirable responses.

*Measured Values:* Women with husband in white collar job: Employed M = 2,72, Housewives M = 2,72 Women with husbands in blue collar job: Employed M = 2,84, Housewives M = 2,85

### Correlate

*Authors label:* Desire to participate in exciting activities. (1)

*Our classification:* Sensation seeking, code P4.95

*Measurement:* Six indicators:

1. 6-item index of closed questions on whether at this moment one feels like engaging in activities which are characterized as exciting (+), relaxing (-), tranquil (-), or restful (-) (items from a 36-item Excitement Adjective Checklist).
2. 4-item index of closed questions on whether at this moment one feels like being a lead actress in a play dating with an attractive guy driving a sports car, walking through a forest late at night (from the Activity Reaction Scale; see Jackson & Lyons, 1969).
3. Social activities: 2-item index of

closed questions on whether at this moment one feels like being a lead actress in a play and meeting an attractive guy for the first time and being asked out for a date.

4. Non-social activities: 2-item index of closed questions on whether at this moment one feels like driving a sports car as it will go, and walking through a forest late at night by oneself.
5. 4-item index of exciting activities, scored for 'how exciting does this activity seem to you right now?'
6. 4-item index of exciting activities, scored for 'how enjoyable does this activity seem to you right now?'

*Remarks:* Ss answered these questions at the end of an experimental situation in which their self-esteem was experimentally altered. This was done by means of a false personality report dealing with the subject's creativity, maturity and other things.

## Correlate

*Authors label:* Personal growth

*Our classification:* Self-actualization (need for), code P4.96

**Measurement:** Self report on 16 positive and 16 negative statements. Each rated on a 6-point scale ranging from strongly agree to disagree.

High scorers have a feeling of continued development; see self as growing and expanding; are open to new experiences; has sense of realizing his or her potential; see improvement in self and behavior over time; are changing in ways that reflect more self-knowledge and effectiveness.

-Low scorers: have a sense of personal stagnation, lack sense of improvement or expansion over time, feel bored and interested with life, feel unable to develop new attitudes or behaviors

**Measured Values:** a: women (m=102.29, sd=9.91), men (m=97.67, sd=9.90) b: women (m=100.97, sd=13.38), men (m=98.85, sd=13.42) c: women (m=95.51, sd=13.94), men (m=95.79, sd=11.20)

**Error Estimates:** alpha=.87 Test-retest reliability between 6 week period (n=117)=.81

## Appendix 1: Happiness Items used

<i>Happiness Item Code</i>	<i>Full Text</i>
A-AOL/c/sq/v/4/b	Selfreport on single closed question:  "How is your mood these days....?" 4 very good all the time 3 2 1 not good almost all the time
A-AOL/c/sq/v/5/c	Selfreport on single question:  How well do you feel these days? Is your current well-being....? 0 very low 1 2 3 4 very high
A-AOL/cy/sq/v/10/a	Selfreport on single question:  "In thinking over the past year, indicate how elated or depressed, happy or unhappy you have felt....?" 10 Complete elation, rapturous joy and soaring ecstasy 9 Very elated and in very high spirits. Tremendous delight and buoyancy. 8 Elated and in high spirits. 7 Feeling very good and cheerful. 6 Feeling pretty good , "OK". 5 Feeling a little bit low. Just so-so. 4 Spirits low and somewhat "blue". 3 Depressed and feeling very low. Definitely "blue". 2 Tremendously depressed. Feeling terrible, really miserable, "just awful". 1 Utter depression and gloom. Completely down.

All is black and leaden. Wish it were all over.

A-AOL/g\*/v/4/a

Selfreport + 3 peer ratings, on same single question:

A. Selfreport: Each subject was asked to judge herself using one of four terms. (Precise lead item not reported)

B. Peer ratings: The judgments of three friends were obtained using the terms.

Response options:

- 4 steadily cheerful
- 3 variable tending to cheerfulness
- 2 variable tending to depression
- 1 steadily depressed

Summation:  $a + b/2$

A-AOL/g/sq/v/11/a

Selfreport on single question:

." In general how happy or unhappy do you usually feel....?"

Check the one statement that best describes your average happiness.

- 10 extremely happy (feeling ecstatic, joyous, fantastic)
- 9 very happy (feeling really good, elated)
- 8 pretty happy (spirits high, feeling good)
- 7 mildly happy (feeling fairly good and somewhat cheerful)
- 6 slightly happy (just a bit above neutral)
- 5 neutral (not particularly happy or unhappy)
- 4 slightly unhappy (just a bit below neutral)
- 3 mildly unhappy (just a little low)
- 2 pretty unhappy (somewhat "blue", spirits down)
- 1 very unhappy (depressed, spirits very low)
- 0 extremely unhappy (utterly depressed, completely down)

A-AOL/g/sq/v/5/a

Selfreport on single question:

"In general, how would you say you feel most of the time - in good spirits or in low spirits....?"

- 5 very good spirits
- 4 fairly good spirits
- 3 neither good spirits nor low spirits
- 2 fairly low spirits
- 1 very low spirits.

A-AOL/m/sq/v/5/a

Single direct question:

How are you feeling now....?

- 5 very good
- 4 good
- 3 neither good nor poor
- 2 poor
- 1 very poor

A-AOL/mi/sqr/v/5/a

Selfreport on single question in diary, filled in 6 times a day during 40 days in a 6 month period.

Is my mood at the moment

- 2 clearly positive
- 1 rather positive
- 0 indifferent
- 1 rather negative
- 2 clearly negative

A-AOL/u/mq/v/10/a

Selfreport on 4 questions:

"The following are statements of feelings or mood. Please read them over and then indicate which of these overall feelings best describes your feelings."

- A) Right now you feel .....
- B) The best you felt today ....
- C) The worst you felt today ...
- D) The way you usually feel ...

Response options:

- 10. Complete elations, rapturous joy, and soaring ecstasy.
- 9. Very elated and in very high spirits; tremendous delight and buoyancy.
- 8. Elated and in high spirits.
- 7. Feeling very good and cheerful.
- 6. Feeling pretty good, "OK".
- 5. Feeling a little bit low. Just so-so.
- 4. Spirits low and somewhat blue.
- 3. Depressed and feeling very low. Definitely blue.
- 2. Tremendously depressed. Feeling terrible, really miserable, "just awful".
- 1. Utter depression and gloom. Completely down. All is black and leaden. Wish it were all over.

Summation: average scores on A,B,C,D.

Name: Elation-Depression Scale (variant)

A-ARE/md/sqr/v/10/a

Selfreport on single question, repeated every evening before retiring during 3 weeks (experience sampling).

"On the average, how happy or unhappy did you feel today....?"

- 1 Extremely unhappy. Utterly depressed. Completely down.
- 2 Very unhappy. Depressed. Spirits very low.
- 3 Pretty unhappy. Somewhat 'blue'. Spirits down.
- 4 Mildly unhappy. Just a little low.
- 5 Barely unhappy. Just this side of neutral.
- 6 Barely happy. Just this side of neutral.
- 7 Mildly happy. Feeling fairly good and somewhat cheerful.
- 8 Pretty happy. Spirits high. Feeling good.
- 9 Very happy. Feeling really good. Elated.
- 10 Extremely happy. Feeling ecstatic, joyous, fantastic.

Name: Wessman & Ricks' "Elation - Depression Scale" (adapted version)

A-ARE/md/sqr/v/10/b

Selfreport on single question, answered every evening before retiring during six weeks (experience sampling)

"On average; how elated or depressed, happy or unhappy you felt today....?"

- 10 Complete elation, rapturous joy and soaring ecstasy
- 9 Very elated and in very high spirits. Tremendous delight and buoyancy
- 8 Elated and in high spirits
- 7 Feeling very good and cheerful
- 6 Feeling pretty good , "OK"
- 5 Feeling a little bit low. Just so-so
- 4 Spirits low and somewhat 'blue'
- 3 Depressed and feeling very low. Definitely 'blue'
- 2 Tremendously depressed. Feeling terrible, really miserable, "just awful"
- 1 Utter depression and gloom. Completely down.

All is black and leaden. Wish it were all over.

Name: Wessman & Ricks' `Elation - depression scale'

A-ARE/md/sqr/v/7/a

Selfreport on single question, asked twice with an interval of 16 days.

"Consider your experience during the past 24 hours, being as objective and matter-of-fact as possible. Estimate honestly the prevailing or dominant level of your mood, and put a cross through the term which most accurately describes your prevailing feeling".

- 7 highly elated
- 6 moderately cheerful
- 5 mildly cheerful
- 4 indifferent
- 3 wildly depressed
- 2 moderately depressed
- 1 extremely gloomy

Summation: Average of 32 scores.

A-ARE/mi/sqr/n/7/a

Selfreport on single question repeated several times a day.

" .. mood .."

Full lead question not reported

- 7 happy
- 6
- 5
- 4
- 3
- 2
- 1 sad

A-ARE/mi/sqr/v/3/a

Selfreport on single question, asked 21 times in a period of 10 weeks (experience sampling)

"How would you characterize your mood or impulse of the last instant....?"

- 3 happy
- 2 neutral
- 1 sad

Summation: average of 21 scores.

A-ASA/md/mq/ol/10/a

Daily self report of mood on 95 questions:

How I feel ....

Items from 18 mood scales concerning

- A depression
- B confusion
- C anxiety
- D tension-anxiety
- E aggression
- F skepticism
- G fatigue
- H guilt
- I shyness
- J concentration
- K general deactivation
- L affection
- M general activation
- N surgency
- O euphoria
- P elation
- Q wakefulness

Rated on a 100 mm open line scale ranging from 0 No, not at all to 1 Yes, extremely

Summation: first component in principal component analysis, average over all days

A-BB/cm/mq/v/2/a

Selfreport on 10 questions:

During the past few weeks, did you ever feel ....? (yes/no)

A Particularly exited or interested in something?

B So restless that you couldn't sit long in a chair?

C Proud because someone complimented you on something you had done?

D Very lonely or remote from other people?

E Pleased about having accomplished something?

F Bored?

G On top of the world?

H Depressed or very unhappy?

I That things were going your way?

J Upset because someone criticized you?

Answer options and scoring:

yes = 1

no = 0

Summation:

-Positive Affect Score (PAS): A+C+E+G+I

-Negative Affect Score (NAS): B+D+F+H+J

-Affect Balance Score (ABS): PAS minus NAS

Possible range: -5 to +5

Name: Bradburn's 'Affect Balance Scale' (standard version)

Selfreport on 25 questions:

A number of statements that people have used to describe how they feel are given below. Read each one and circle the number that best describes how frequently that statement was true for you in the past seven days, including today. Some statements describe positive feelings and some describe negative feelings. You may have experienced both positive and negative feelings at different times in the past week.

A I felt sad  
B I felt I had failed as a person  
C I felt dissatisfied with my life  
D I felt mentally alert  
E I felt disappointed with myself  
F I felt cheerful  
G I felt life wasn't worth living  
H I felt satisfied with my life  
I I felt healthy  
J I felt life crying  
K I felt I had been successful  
L I felt happy  
M I felt I couldn't make decisions  
N I felt unattractive  
O I felt optimistic about the future  
P I felt life was rewording  
Q I felt cheerless  
R I felt life has a purpose  
S I felt too tired to do anything  
T I felt pleased with the way I am  
U I felt lethargic  
V I found it easy to make decisions  
W I felt life was enjoyable  
X I felt life was meaningless  
Y I felt run down

Answer options:

0 never  
1 rarely  
2 sometimes  
3 often

Negative affect score (NAS): A, B, C, E, G, J, M, N, Q, S, U, X, Y.

Selfreport on 12 questions:

During the past 30 days, how much of the time did you feel ..?

A So sad nothing could cheer you up

B Nervous

C Restless or fidgety

D Hopeless

E That everything was an effort

F Worthless

G Cheerful

H In good spirits

I Extremely happy

J Calm and peaceful

K Satisfied

L Full of life

Computation:  $(G+H+I+J+K+L) - (A+B+C+D+E+F)$

Name: Mroczek & Kolarz (1998) Affect Balance Scale

A-CA/mh/ri/v/2/b

Interviewer-rating of cheerfulness:

Altogether the respondent looks.....

2 quite cheerfull

1 not too cheerful

- difficult to say

Part of the 8 item Allensbacher Ausdrücktest which also involves ratings of cheerful appearance in: look, mouth, posture, movements, eyes, elbows and lips. This general rating is the last item in the test.

A-CA/mi/tsb/v/8/a

Time sampling of happy behaviors:

Clinical ratings on the basis of repeated observations of expressive behavior in test situation. Scored by two independent rates. Interval between tests was one week. Observations based on Bayley Infant Behavior Profile, Research Form 1959. One of the items in the schedule is:

"General emotional tone: unhappy - happy."

1 Child seems unhappy throughout the period.

2 Mostly unhappy, but not consistently so.

3 At times rather unhappy, but may respond happily to interesting procedures.

4 Seems calm and contented.

5 Happy: may become upset by some procedures, but recovers fairly easily.

6 Appears generally in a happy state of well-being.

7 Consistently happy, radiating a gay mood, only rarely disturbed by an annoying situation.

8 Radiantly happy; nothing is upsetting; animated.

A-CP/g/fi/v/7/a

Selfreport in focused interview

Rating two independent interviewers.

A. Psychiatric social worker who interviewed parents at home. Interview focused on child

B. Clinical psychologist who interviewed parents separately. Interview focused on family life.

Rating options:

7 extremely cheerful, animated, jolly

6

5

4 usually good-humored air

3

2

1 dejected, melancholic appearance, in the dumps

Summation: average ratings A and B

A-CP/g/rdn/?/7/a

Rating by two independent staff members who were familiar with the patient.

7 happy

6

5

4

3

2

1 depressed

A-CP/g/rdp/ro/7/a

Peer rating on single question (based on contact during 6 months):

Rater instruction: "personal qualities are named and briefly annotated in this schedule. If you have any doubt as to the meaning of any of them, please ask me (investigator)

2. In the columns under each subject's name, place one of the marks for each of the qualities specified (+3, +2, +1, 0, -1, -2, -3) To avoid errors, please put the + sign as well as the -

'General tendency to be 'cheerful' (as opposed to being depressed and low spirited)

+3 very high compared to average

+2 distinctly above average

+1 slightly above average

0 average

-1 slightly below average

-2 distinctly below average

-3 lowest as compared to average

A-CP/g/rdp/v/2/a

Peer-rating on single question: Each S was judged by 3 acquaintances.

"Do you think that S tends in general to be...?"

2 optimistic and cheerful

1 pessimistic and uncheerfull

A-CP/g/rdp/v/5/a

Peer-rating on the basis of two questions:

A. "Is S inclined to be ... most of the time?"

b optimistic and cheerfull

a pessimistic and depressed

B. "Is she ... in mood?"

a steady

b fluctuating

Ss were classified as:

5 steadily optimistic

4 variable tending to optimism

3 indifferent or fluctuating

2 variable tending to pessimism

1 steadily pessimistic.

A-CP/g/rdt/ro/7/a

Teacher rating on single question:

1 Personal qualities are named and briefly annotated in this schedule.

2. In the columns under each pupil's name, place one of the marks for each of the qualities specified (+3, +2, +1, 0, -1, -2, -3) To avoid errors, please put the + sign as well as the -

'General tendency to be 'cheerful' (as opposed to being depressed and low spirited)

+3 very high compared to average

+2 distinctly above average

+1 slightly above average

0 average

-1 slightly below average

-2 distinctly below average

-3 lowest as compared to average

A-CP/g/sq/v/4/a

Selfreport on single question:

Each S was asked to judge herself using one of the four terms:  
(precise lead item not reported)

4 steadily cheerful

3 variable tendency to cheerfulness

2 variable tendency to depression

1 steadily depressed

A-CP/g/sq/v/7/a

Selfreport on single question:

"Check one of the following groups of adjectives which best describes you."

7 full of deep joy, excitedly happy, enthusiastic, thrilled

6 cheerful, successful, optimistic, lighthearted

5 satisfied, comfortable, life goes smoothly, peaceful

4 contented at times and at other times discontented, life has both favorable and unfavorable features

3 restless, impatient, uncertain, dull, cross, confined

2 anxious, irritated, discouraged, disappointed, discontented

1 gloomy, miserable, a failure, no pleasure in anything

A-CP/mi/tsb/n/7/a

Time sampling of happy behaviors

The children were rated during the first 3 years of their lives, after 10, 11, 12, 13, 14, 15, 18, 21, 24, 27, 30 and 36 months of living for 'Emotional tone: unhappy - happy' on a 7-point scale. Scoring rated on 7-step numerical scale.

Summation:

Later the ratings of 10 - 12, 13 - 15, 18 - 24, and 27 - 36 months were combined.

Rated on 7-step numerical scale.

A-Sum/g/mq\*/111/a

Selfreport on two questions:

A

Use the list below to answer the following question: IN GENERAL, HOW HAPPY OR UNHAPPY DO YOU USUALLY FEEL? Check the one statement that best describes your average happiness.

10 extremely happy (feeling ecstatic, joyous, fantastic!)

9 very happy (feeling really good and elated!)

8 pretty happy (spirits high, feeling good)

7 mildly happy (feeling fairly good and somewhat cheerful)

6 slightly happy ( just a bit above neutral)

5 slightly unhappy (just a bit below neutral)

4 mildly unhappy (just a bit low)

3 pretty unhappy (somewhat "blue", spirits down)

2 very unhappy ( depressed, spirits very low)

1 extremely unhappy (utterly depressed, completely down)

B)

Consider your emotions a moment further. On the average, what percentage of the time do you feel Happy? What percent of the time do you feel unhappy? What percent of the time do you feel neutral (neither happy nor unhappy)? Write down your best estimate, as well as you can, in the space below. Make sure the figures add-up to equal 100%

The percent of time I felt happy \_\_\_\_\_%

The percent of time I felt unhappy \_\_\_\_\_%

The percent of time I felt neutral \_\_\_\_\_%

Summation: A + % happy on B

Name: Fordyce's 'Happiness measure'

A-TH/g/mq/th%/101/aa

Selfreport on three questions:

'On the average, what percentage of the time do you feel.....' (percentages must add up to 100%)

1 happy

2 unhappy

3 neutral

Name: Fordyce % happy scale

Variant: % happy

A-TH/g/mq/th%/101/ab

Selfreport on three questions:

'On the average, what percentage of the time d you feel.....' (percentages must add up to 100%)

1 happy

2 unhappy

3 neutral

Name: Fordyce % happy scale

Variant: % unhappy

C-A/h/sq/v/3/a

Selfreport on single question:

"How do you feel about what you have accomplished in life...?"

3 well satisfied

2 reasonable satisfied

1 dissatisfied:

C-ASG/h/mq/v/5/a

Selfreport on 2 questions:

A. "How important was each of the following goals in life in the plans you made for yourself in early adulthood?"

- occupational success

- family life

- friendships

- richness of cultural life

- total service to society.

1 less important to me than to most people

2

3

4

5 of prime importance to me

B. "How successful have you been in the pursuit of these goals?"

1 little satisfaction in this area

2

3

4

5 had excellent fortune in this respect

Computation: General Satisfaction 5 is the quotient obtained by multiplying the planned goal (early adulthood) by the reported success in attaining that goal, adding the five of these multiplied areas and dividing them by the sum of the planned goals for each of the areas.

Pa.Sa + Pb.Sb + Pc.Sc + Pd.Sd + Pe.Se

-----  
Pa + Pb + Pc + Pd + Pe

Pa = planned goal a (1-5)

Sa = success goal a (1-5)

[ 0 ] worst possible life

Question A is the case question.

Name: Cantril's self anchoring ladder rating of life (modified version)

C-RG/h/fi/v/5/a

Selfreport in focused interview:

Content analysis of interview records by independent judges.

Interviews focused on the extent to which S feels he has achieved his goals in life, whatever those goals might be; feels he has succeeded in accomplishing what he regards as important. High ratings go, for instance, to S who says, "I've managed to keep out of jail" just as to R who says, "I managed to send all my kids through college". Low ratings go to R who feels he's missed most of his opportunities, or who says, "I've never been suited to my work", or "I always wanted to be a doctor, but never could get there". Also to R who wants most to be "loved", but instead feels merely "approved". (Expressions of regret for lack of education are not counted because they are stereotyped responses among all but the group of highest social status).

Rating options:

5 Feels he has accomplished what he wanted to do. He has

achieved or is achieving his own personal goals.  
4 Regrets somewhat the chances missed during life. "Maybe I could have made more of certain opportunities".  
Nevertheless, feels that he has been fairly successful in accomplishing what he wanted to do in life.  
3 Has a fifty-fifty record of opportunities taken and opportunities missed. Would have done some things differently, if he had his life to live over. Might have gotten more education.  
2 Has regrets about major opportunities missed but feels good about accomplishment in one area (may be his avocation).  
1 Feels he has missed most opportunities in life.

C-RG/h/sq//11/a

Selfreport on single question:

How would you rate yourself as to how successful or unsuccessful you have been in terms of achieving your own goals and aims in life? Think of the top of the ladder as being completely successful, the bottom being entirely unsuccessful

[ 10 ] completely successful

[ 9 ]

[ 8 ]

[ 7 ]

[ 6 ]

[ 5 ]

[ 4 ]

[ 3 ]

[ 2 ]

[ 1 ]

[ 0 ] entirely unsuccessful

Summation: z-scores

M-FH/c/fi/v/5/a

Selfreport in focused interview:

Content analysis of interview records by two independent judges:

High ratings for R who expresses happy, optimistic attitudes and mood; who uses spontaneous positively-toned affective terms for people and things; who takes pleasure from life and expresses it. Low ratings for depression, 'feel blue and lonely'; for feelings of bitterness; for frequent irritability and anger. (Here not only R's verbalized attitudes in the interview were considered, but interferences were made from all the knowledge of his inter-personal relationships, how others react towards him).

Rating options

5 'This is the best time of my life'. Is nearly always cheerful, optimistic. Cheerfulness may seem unrealistic to an observer, but R shows no sign of 'putting up a bold front'.

4 Gets pleasure out of life, knows it and shows it. There is enough restraint to seem appropriate to a younger person  
Usually feels positive affect. Optimistic.

3 Seems to move along on an even temperamental keel. Any depressions are neutralized by positive mood swings.  
Generally neutral-to-positive affect. May show some irritability

2 Wants things quiet and peaceful. General neutral-to-negative affect. Some depression.

1 Pessimistic, complaining, bitter. Complaints of being lonely.  
Feels 'blue' a good deal of the time. May get angry when in contact with people.

M-FH/g/sq/n/11/a

O-HL/g/sq/n/9/a

Selfreport on single question:

Generally, how happy are you.....?

- 1 not at all
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9 completely

(Originally presented on a horizontal line scale)

O-HL/g/sq/n/9/b

Selfreport on single question:

"How happy would you say your life is in general.....?"

- 1 very unhappy
- 2
- 3
- 4 neither happy
- 5 nor
- 6 unhappy
- 7
- 8
- 9 very happy

O-HL/g/sq/v/3/c

Selfreport on single question:

"In general, how happy would you say you are.....?"

- 3 very happy
- 2 fairly happy
- 1 not too happy

O-HL/g/sq/v/4/g

Selfreport on single question:

If you were to consider your life in general, how happy or unhappy would you say you are on the whole?

- 4 very happy
- 3 fairly happy
- 2 fairly unhappy
- 1 very unhappy

O-HL/u/sq/ol/9/a

Selfreport on single question:

Place a cross, on each line, on the place you estimate to be that which corresponds best with your state

- 1 | I am not very happy
- 2 |
- 3 |
- 4 |
- 5 | I am not too happy
- 6 |
- 7 |
- 8 |
- 9 | I am quite happy

Scoring: rated on an open horizontal line scale, divided afterwards in 9 sections.

O-HL/u/sq/v/4/a

Selfreport on single question:

Taking all things together, would you say you are.....?

- 4 very happy
- 3 quite happy
- 2 not very happy
- 1 not at all happy.

O-HL/u/sq/v/4/b

Selfreport on single question:

On the whole, how happy would you say you are.....?

- 4 very happy
- 3 fairly happy
- 2 not very happy
- 1 very unhappy

O-HP/g/mq/v/5/a

Selfreport on 6 questions:

" Describe the kind of person you are. Please read each sentence, then mark how often it is true for you"

- 1 I feel like smiling
- 2 I generally feel in good spirits
- 3 I feel happy
- 4 I am very satisfied with life
- 5 I find a good deal of happiness in life
- 6 I feel sad

Response options:

- 5 almost always true
- 4 often true
- 3 sometimes true
- 2 seldom true
- 1 never true

Summation: average

Possible range: 1 to 5

O-HP/g/sq/ol/7/a

Selfreport on single question:

"Generally speaking are you a happy person.....?"

Responses were made on an open line scale, and were later coded in 7 categories:

- 1 very unhappy
- 2
- 3
- 4
- 5
- 6
- 7 very happy.

O-HP/g/sq/v/3/a

Selfreport on single question:

"Do you consider yourself to be.....?"

- 3 generally happy
- 2 moderately happy
- 1 generally unhappy

O-HP/u/sq/v/5/b

Selfreport on single question:

To what degree do you consider yourself a happy person?

- 1 unhappy
- 2 not that happy
- 3 not happy and not unhappy
- 4 happy
- 5 very happy

5 satisfying  
4 rather satisfying  
3 rather dissatisfying  
2 dissatisfying  
1 very dissatisfying

O-SLW/u/sq/v/7/a

Selfreport on single question, asked twice in interview:

Considering everything, how satisfied are you with your life as a whole.....?  
7 completely satisfied  
6  
5  
4  
3  
2  
1 completely dissatisfied

Summation: both scores added  
Possible range: 2 to 14

O-SP/u/sq/ol/9/a

Selfreport on single question:

Place a cross on the line below, on the spot you estimate that corresponds best with your state.  
1 | I am not very satisfied  
2 |  
3 |  
4 |  
5 | I am not too satisfied  
6 |  
7 |  
8 |  
9 | I am very satisfied

Scoring: rated on an open horizontal line scale divided afterwards in 9 sections.

O-Sum\*/mq\*/0/a

Self report on 8 items

A How do you feel about your life as a whole?  
Rated on a 9-step Delighted-Terrible scale  
Asked twice in the interview with 15 minutes interval

B a In most ways my life is close to ideal  
b The conditions of my life are excellent  
c I am satisfied with my life  
d So far, I have gotten the important things I want in life  
e If I could live my life over, I would change nothing'  
Answers rated: 7 strongly agree to 1 strongly disagree

C How do you feel usually?  
0 extremely unhappy

.  
. .  
10 extremely happy

Computation: factor

O-Sum/c/mq/v/5/a

Selfreport on 3 questions:

A When you consider your present life as-a-whole, would you say you are....?

- 5 very happy
- 4 fairly happy
- 3 rather happy than unhappy
- 2 rather unhappy than happy
- 1 very unhappy
- DK/NA

B When you consider your present life as-a-whole, would you say you are.....?

- 5 very satisfied
- 4 fairly satisfied
- 3 rather satisfied than dissatisfied
- 2 rather dissatisfied than satisfied
- 1 fairly dissatisfied
- DK/NA

C How do you feel right now? Is your well-being.....?

- 5 very high
- 4 high
- 3 moderate
- 2 rather low
- 1 very low
- DK/NA

Summation: The summed scores were divided in three strata: low, medium and high quality of life

O-Sum/cy/mq/v/7/a

Selfreport on four questions:

Using the 1-7 scale below, indicate how much each of the following statements applies for you in the last 18 months.

- A In most ways my life is close to ideal
- B The conditions of my life are excellent
- C I am satisfied with my life
- D So far, I have gotten the important things I want in life

Answers rated:

- 7 applies completely
- 6 applies
- 5 applies slightly
- 4 neither applies nor does not apply
- 3 slightly not applicable
- 2 not applicable
- 1 applies not at all

Computation: A+B+C+D divided by 4

Name: Shortened Diener's Satisfaction with Life Scale (SWLS), last years version  
(In the original scale item 5 reads: 'If I could live my life over, I would change nothing'. This item is left out in this selection because a positive answer to this question does not necessarily mean that the respondent doesn't like the life he/she actually lives.)

O-Sum/g/rc/v/7/a

Clinical rating.

Ratings by four judges on the basis of notes from observations and interviews between age 12-18.

Ratings were made on the following dimensions:

- A. discontented
- B. unhappy
- C. dissatisfied
- D. complaints

- 0

## Appendix 2: Statistics used

<i>Symbol</i>	<i>Explanation</i>
AoV	<p>ANALYSIS of VARIANCE (ANOVA)            Type: statistical procedure            Measurement level: Correlate(s): nominal, Happiness: metric.            In an ANOVA, the total happiness variability, expressed as the sum of squares, is split into two or more parts, each of which is assigned to a source of variability. At least one of those sources is the variability of the correlate, in case there is only one, and always one other is the residual variability, which includes all unspecified influences on the happiness variable. Each sum of squares has its own number of degrees of freedom (df), which sum up to <math>N_e - 1</math> for the total variability. If a sum of squares (SS) is divided by its own number of df, a mean square (MS) is obtained. The ratio of two correctly selected mean squares has an F-distribution under the hypothesis that the corresponding association has a zero-value.</p> <p>NOTE: A significantly high F-value only indicates that, in case of a single correlate, the largest of the <math>c</math> mean values is systematically larger than the smallest one. Conclusions about the other pairs of means require the application of a Multiple Comparisons Procedure (see e.g. BONFERRONI's MULTIPLE COMPARISON TEST, DUNCAN's MULTIPLE RANGE TEST or STUDENT-NEWMAN-KEULS)</p>
B	<p>REGRESSION COEFFICIENT (non-standardized) by LEAST SQUARES (OLS)            Type: test statistic            Measurement level: Correlate: metric, Happiness: metric            Theoretical range: unlimited</p> <p>Meaning:  <math>B &gt; 0</math> A higher correlate level corresponds with, on an average, higher happiness rating.  <math>B &lt; 0</math> A higher correlate level corresponds with, on an average, lower happiness rating.  <math>B = 0</math> Not any correlation with the relevant correlate.</p>
Beta	<p>(<math>\beta</math>) STANDARDIZED REGRESSION COEFFICIENT by LEAST SQUARES (OLS)            Type: test statistic.            Measurement level: Correlates: all metric, Happiness: metric.            Range: [-1 ; +1]</p> <p>Meaning:  <math>\beta &gt; 0</math> a higher correlate level corresponds with, on an average, higher happiness rating.  <math>\beta &lt; 0</math> a higher correlate level corresponds with, on an average, lower happiness rating.  <math>\beta = 0</math> no correlation.  <math>\beta = + 1</math> or <math>-1</math> perfect correlation.</p> <p>Remark:            Mean of observations is subtracted from all observations if standardized.</p>
BMCT	<p>BONFERRONI's MULTIPLE COMPARISON TEST            Type: statistical procedure            Measurement level: Correlate: nominal, Happiness: metric</p> <p>Meaning: if the correlate is measured at <math>c</math> levels, the <math>c</math> mean happiness values can be ranked from low to high. A multiple comparison procedure judges for each of the <math>\frac{1}{2}c(c-1)</math> pairs whether or not they differ significantly. A convenient way to represent the results is by ranking the <math>c</math> means and by underlining them in such a way that means which have a common underlining do NOT differ significantly.</p> <p>When added by us, this test is performed at the 95% confidence level for all the differences together.</p>

Chi <sup>2</sup>	<p>CHI-SQUARE  Type: test statistic  Range: [0; Ne*(min(c,r)-1)], where c and r are the number of columns and rows respectively in a cross tabulation of Ne sample elements.</p> <p>Meaning:  Chi<sup>2</sup> &lt;= (c-1) * (r-1) means: no association  Chi<sup>2</sup> &gt;&gt; (c-1) * (r-1) means: strong association</p>
D%	<p>DIFFERENCE in PERCENTAGES  Type: descriptive statistic only.  Measurement level: Correlate level: dichotomous, but nominal or ordinal theoretically possible as well.  Happiness level: dichotomous  Range: [-100; +100]</p> <p>Meaning: the difference of the percentages happy people at two correlate levels.</p>
DM	<p>DIFFERENCE of MEANS  Type: descriptive statistic only.  Measurement level: Correlate: dichotomous, Happiness: metric  Range: depending on the happiness rating scale of the author; range symmetric about zero.</p> <p>Meaning: the difference of the mean happiness, as measured on the author's rating scale, between the two correlate levels.</p>
DMt	<p>DIFFERENCE of MEANS AFTER TRANSFORMATION  Type: descriptive statistic only.  Measurement level: Correlate: dichotomous, Happiness: metric  Theoretical range: [-10; +10]</p> <p>Meaning: the difference of the mean happiness (happiness measured at a 0-10 rating scale) between the two correlate levels.</p>
E <sup>2</sup>	<p>CORRELATION RATIO (Elsewhere sometimes called h<sup>2</sup> or ETA)  Type: test statistic  Measurement level: Correlate: nominal or ordinal, Happiness: metric  Range: [0; 1]</p> <p>Meaning: correlate is accountable for E<sup>2</sup> x 100 % of the variation in happiness.  E<sup>2</sup> = 0 « knowledge of the correlate value does not improve the prediction quality of the happiness rating.  E<sup>2</sup> = 1 « knowledge of the correlate value enables an exact prediction of the happiness rating</p>
F	<p>F-STATISTIC  Type: asymmetric standard test statistic.  Range: nonnegative unlimited</p> <p>Meaning : the test statistic is also called the "Variance Ratio" and is the ratio of two independent estimators of the same variance with n1 and n2 degrees of freedom respectively. The critical values of its probability distribution are tabulated extensively in almost any textbook on Statistics</p>
G	<p>GOODMAN &amp; Kruskal's GAMMA  Type: test statistic  Measurement level: Correlate: ordinal, Happiness: ordinal  Range: [-1; +1]</p> <p>Meaning:  G = 0 « no rank correlation  G = +1 « strongest possible rank correlation, where high correlate values correspond with high happiness ratings.  G = -1 « strongest possible rank correlation, where high correlate values correspond with low happiness ratings.</p>

gH	<p>Hedges's COEFFICIENT FOR GROUP DIFFERENCES  Type: descriptive statistic only  Measurement level: Correlate: dichotomous, Happiness: metric  Range (theoretical): unlimited</p> <p>Meaning: effect size indicator for difference of means.</p>
Gs	<p>PARTIAL GAMMA. See: GAMMA  Range: [-1, +1].  Seldom used in happiness research. See excerpted report.</p>
mc	<p>Guttman's monotonicity coefficient.  Range: [-1, +1].  Measurement level: Both correlate and happiness ordinal or interval  Based on the multiplication of signed differences within one variable with the corresponding difference in the second variable and summation over all possible differences.  Seldom used in happiness research. See excerpted report.</p>
MCT	<p>Multiple Comparison Test, variant not specified.  Possible variants: Scheffe, Tukey, Student/Newman/Keuls, Bonferoni (BMCT)</p>
mr	<p>Mean correlation coefficient (r).  For r, see PRODUCT-MOMENT CORRELATION</p>
r	<p>PRODUCT-MOMENT CORRELATION COEFFICIENT (Also 'Pearson's correlation coefficient' or simply 'correlation coefficient')  Type: test statistic.  Measurement level: Correlate: metric, Happiness: metric  Range: [-1; +1]</p> <p>Meaning:  <math>r = 0</math> « no correlation ,  <math>r = 1</math> « perfect correlation, where high correlate values correspond with high happiness values, and  <math>r = -1</math> « perfect correlation, where high correlate values correspond with low happiness values.</p>
Ra <sup>2</sup>	<p>ADJUSTED COEFFICIENT OF MULTIPLE CORRELATION  Type: descriptive statistic only  Measurement level: Correlates: all metric, Happiness: metric  Range: [0 ; 1]</p> <p>Meaning:  <math>R_a = 0</math> « not any association  <math>R_a = 1</math> « strongest possible association</p>
rp	<p>POLYCHORIC CORRELATION  Variant of r  Seldom used in happiness research. See excerpted report for further reference.</p>
rpc	<p>PARTIAL CORRELATION COEFFICIENT  Type: test statistic  Measurement level: Correlate: metric, Happiness: metric  Range: [-1; +1]</p> <p>Meaning: a partial correlation between happiness and one of the correlates is that correlation, which remains after accounting for the contribution of the other influences, or some of them, to the total variability in the happiness scores.  Under that conditions  <math>rpc &gt; 0</math> « a higher correlate level corresponds with a higher happiness rating,  <math>rpc &lt; 0</math> « a higher correlate level corresponds with a lower happiness rating,</p>

rs	<p>SPEARMAN'S RANK CORRELATION COEFFICIENT  Type: test statistic  Measurement level: Correlate: ordinal, Happiness: ordinal.  Range: [-1; +1]</p> <p>Meaning:  rs = 0 « no rank correlation  rs = 1 « perfect rank correlation, where high correlate values are associated with high happiness ratings  rs = -1 « perfect rank correlation, where high correlate values are associated with low happiness ratings</p>
R <sup>2</sup>	<p>COEFFICIENT of DETERMINATION  Type: test statistic  Measurement level: Correlates: all metric, Happiness: metric  Range: [0; 1]</p> <p>Meaning:  R<sup>2</sup> = 0 « no influence of any correlate in this study has been established.  R<sup>2</sup> = 1 « the correlates determine the happiness completely.</p>
SNR	Statistic Not Reported
T	<p>TSCHUPROW'S T  Type: test statistic.  Measurement level: Correlate: nominal, Happiness: ordinal  Range: [0 ; SQRT[[min(r,c)-1]/[max(r,c) -1]]], c and r being the numbers of columns resp. rows in a cross tabulation.</p> <p>Meaning:  T = 0 « no association  T -&gt; 1 « strongest possible association.</p> <p>NOTE: sometimes the square value is reported instead !</p>
t.	<p>t-STATISTIC (Student's t-statistic)  Type: symmetric standard test statistic.  One parameter: n (= number of degrees of freedom (df) ; range df: [1; + infinite)  Range for t: unlimited</p> <p>Meaning : the test statistic is the ratio of a difference between a statistic and its expected value under the null hypothesis and its (estimated) standard error with n degrees of freedom.  The critical values of its probability distribution are tabulated extensively in almost any textbook on Statistics.</p>
tau	<p>GOODMAN &amp; Kruskal's TAU  Type: descriptive statistic only.  Measurement level: Correlate: nominal, Happiness: ordinal  Range: [0; +1]</p> <p>Meaning:  tau = 0 « knowledge of the correlate value does not improve the prediction quality of the happiness rating.  tau = 1 « knowledge of the correlate value enables a perfect (error-free) prediction of the happiness rating.</p>

tb	<p>KENDALL'S RANK CORRELATION COEFFICIENT TAU-B Type: test statistic Measurement level: Correlate: ordinal, Happiness: ordinal Range: [-1; +1]</p> <p>Meaning: tb = 0 « no rank correlation tb = 1 « perfect rank correlation, where high values of the correlate correspond with high happiness ratings. tb = -1 « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.</p>
tc	<p>KENDALL'S TAU-C (Also referred to as Stuart's tau-c) Type: test statistic Measurement level: Correlate: ordinal, Happiness: ordinal Range: [-1; +1]</p> <p>Meaning: tc = 0 « no rank correlation tc = 1 « perfect rank correlation, where high values of the correlate correspond with high happiness ratings. tc = -1 « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.</p>
V	<p>CRAMÉR'S V Type: test statistic Measurement level: Correlate: nominal, Happiness: ordinal Range: [0; 1]</p> <p>Meaning: V = 0 « no association V = 1 « strongest possible association</p>
ZZZZZ	<p>CRAMÉR'S V Type: test statistic Measurement level: Correlate: nominal, Happiness: ordinal Range: [0; 1]</p> <p>Meaning: V = 0 « no association V = 1 « strongest possible association</p>

## Appendix 3: About the World Database of Happiness

### Structure of the collections

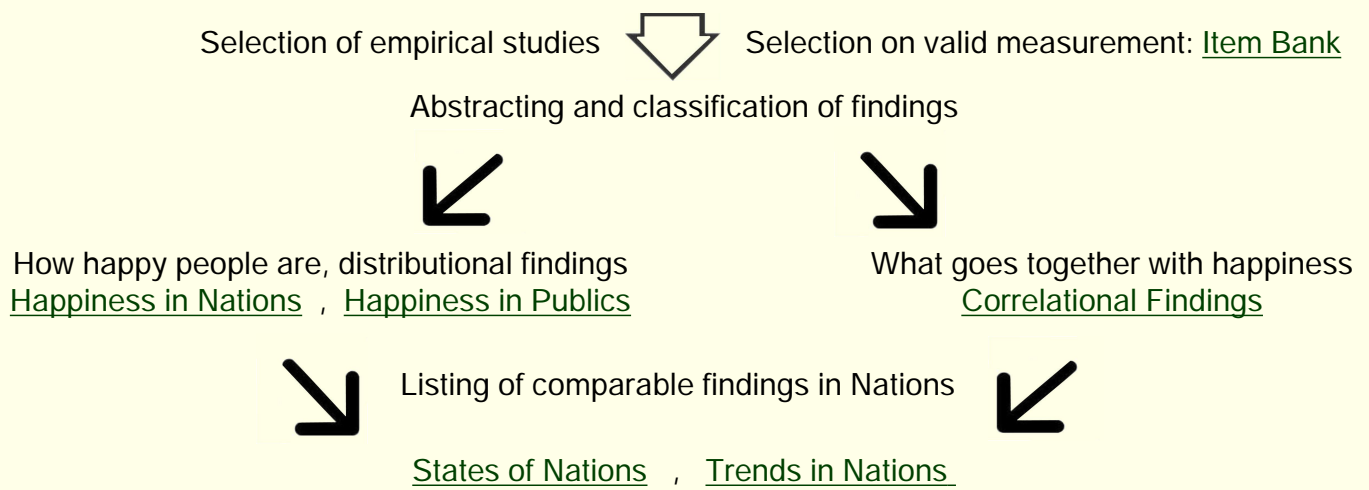

The World Database of Happiness is an ongoing register of scientific research on the subjective enjoyment of life. It brings together findings that are scattered throughout many studies and provides a basis for synthetic work.

World literature on Happiness

Selection on subject

[Bibliography](#) and [Directory](#)

## Size of the collections

1226 Happiness measures (Item Bank)

4258 Nations surveys in 206 Nations

149 Distinguished publics in 1199 studies

12032 Correlational findings in 1196 studies

## Appendix 4 Further Findings in the World Database of Happiness

<i>Main Subjects</i>	<i>Subject Description</i>	<i>Number of Studies</i>
A1	ACTIVITY: LEVEL (how much one does)	58
A2	ACTIVITY: PATTERN (what one does)	32
A3	AFFECTIVE LIFE	48
A4	AGE	400
A5	AGGRESSION	12
A6	ANOMY	32
A7	APPEARANCE (good looks)	15
A8	ATTITUDES	6
A9	AUTHORITARIANISM	4
B1	BIRTH CONTROL	1
B2	BIRTH HISTORY (own birth)	201
B3	BODY	77
C1	CHILDREN	1
C2	CHILDREN: WANT FOR (Parental aspirations)	6
C3	CHILDREN: HAVING (parental status)	195
C4	CHILDREN: CHARACTERISTICS OF ONE'S CHILDREN	25
C5	CHILDREN: RELATION WITH ONE'S CHILDREN	8
C6	CHILDREN: REARING OF ONE'S CHILDREN (parental behavior)	26
C7	COMMUNAL LIVING	9
C8	CONCERNS	18
C9	COPING	43
C10	CREATIVENESS	6
C11	CULTURE (Arts and Sciences)	8
D1	DAILY JOYS & HASSLES	5
E1	EDUCATION	302

E2	EMPLOYMENT	363
E3	ETHNICITY	98
E4	EXPRESSIVE BEHAVIOR	12
F1	FAMILY OF ORIGIN (earlier family for adults, current for young)	236
F2	FAMILY OF PROCREATION	58
F3	FAMILY OF RELATIVES	157
F4	FARMING	25
F5	FREEDOM	32
F6	FRIENDSHIP	152
G1	GENDER	370
G2	GRIEF	1
H1	HABITS	1
H2	HANDICAP	25
H3	HAPPINESS: VIEWS ON HAPPINESS	49
H4	HAPPINESS: DISPERSION OF HAPPINESS	10
H5	HAPPINESS: CAREER	191
H6	HAPPINESS: CORRESPONDENCE OF DIFFERENT MEASURES	310
H7	HAPPINESS OF OTHERS	0
H8	HAPPINESS: REPUTATION OF HAPPINESS	19
H9	HEALTH-BEHAVIOR	25
H10	HELPING	5
H11	HOPE	8
H12	HOUSEHOLD: COMPOSITION	137
H13	HOUSEHOLD: WORK	32
H14	HOUSING	106
I1	INCOME	552
