Correlational finding on Happiness and . earlier amount of personal contacts

Subject code: S6.1.1.1

Study BAHR 1980

Reported in: Bahr, H.H.; Harvey, C.D.
Correlates of Morale Among the Newly Widowed.
The Journal of Social Psychology, 1980, Vol. 110, 219 - 233 ISSN: 0022 4545
Page in Report: 225

Population: Recently widowed miner`s wives and controls,USA, 1972

Sample:

Non-Response: Widows 39% ,survivor wives 19% ,other miners wives 48%

N: 222

Correlate

Authors label: Having close friends prior to the fire (3)

Our classification: . earlier amount of personal contacts, code S6.1.1.1

Measurement: Direct question: "Did you have close friends in the community prior to the fire?". Scores ranged from 2 low friendship (reflecting a "yes" answer) to 4 high friendship.

Observed Relation with Happiness

<i>Happiness Measure</i>	<i>Statistics</i>	<i>Elaboration/Remarks</i>

Correlational finding on Happiness and . earlier satisfaction with personal contacts

Subject code: S6.1.1.2

Study

SEARS 1977A

Reported in: Sears, P.S.; Barbee, A.H.
 Career and Life Satisfaction among Terman Gifted Women.
 Stanley, J.C.; George, W.C.; Eds.: "The Gifted and the Creative", J.Hopkins University Press, 1977,
 Baltimore, USA, 28 - 72
 Page in Report: 40-62/4

Population: "Gifted women" (IQ >135), followed 50 years, California, USA, 1921-72

Sample: Non-probability purposive sample

Non-Response: Attrition in 1972: 25%

N: 671

Correlate

Authors label: Earlier satisfaction with social contacts (1)

Our classification: . earlier satisfaction with personal contacts, code S6.1.1.2

Measurement: Social contacts mentioned on an open question on satisfying aspects of life.
 a. in 1950
 b. in 1960

Remarks: Earlier satisfaction with social contacts (1960) by present happiness (1972).

Observed Relation with Happiness

Authors label: Having met new people. (1)

Our classification: Change in personal contacts, code S6.1.2

Measurement: Direct question on new people met during past few weeks.

Observed Relation with Happiness

Happiness Measure	Statistics	Elaboration/Remarks
A-BB/cm/mq/v/5/a	<u>G=</u>	Index of Positive Affects: G = +.18 Index of Negative Affects: G = +.20

Correlational finding on Happiness and . change in amount of personal contacts

Subject code: S6.1.2.1

Study

GRANE 1975

Reported in: Graney, M.J.

Happiness and Social Participation in Aging.

Journal of Gerontology, 1975, Vol. 30, 701 - 706. ISSN 0022 1422

Page in Report: 703

Population: 62-89 aged females, followed 4 years, USA, 1967-71

Sample:

Non-Response: 27%; 24% unattainable, 3% incomplete.

N: 44

Correlate

Authors label: Changes in social activities over 4 years. (2)

Our classification: . change in amount of personal contacts, code S6.1.2.1

Measurement: Differences between responses at T1 and T2 on identical direct questions.

- a. More contacts with friends and relatives.
- b. More contacts with neighbors.
- c. More memberships in voluntary associations.
- d. More often meetings of voluntary associations attended.
- e. More often religious services attended.
- f. Telephone used more often.

Observed Relation with Happiness

2 once or twice a month (vs. 1)

O-SLW/u/sq/n/7/eB=+.05
p<.05

3 once or twice a week (vs. 1)

O-SLW/u/sq/n/7/eB=+.07
p<.01

4 on most days (vs. 1)

B's are estimated by means of fixed effects estimators instead of OLS.

B's controlled for:

- frequency of talking to neighbours
- gender
- age
- real household income
- marital status
- employment status
- look after home
- health status
- education level
- household size
- home ownership
- days spent in hospital
- number of children

Additional control variables about quality of accommodation and neighbourhood do not make a difference:

- shortage of space
- noise from neighbours
- street noise

- not enough lights
- lack of adequate heating
- condensation
- leaky roof
- damp wall, floors, etc.
- rot windows, floors, etc
- pollution/environmental problems
- vandalism or crime
- average district income

Fixed effect estimators differ significantly from OLS estimators denoting a positive inborn personality bias on the observed relationship between frequency of social contacts, income and life satisfaction

<i>Authors label:</i>	Social/entertainmentactivities (1)
<i>Our classification:</i>	Current contacts, code S6.2
<i>Measurement:</i>	During 24-hour period prior to the interview, respondents reported each activity they engaged in (PARTICIPATION) and the time spend on each activity (DURATION) on an activity diary. Activities were coded into categories, one of which was "social relations and entertainment" such as visiting with others, going to a movie or a sports event. Work status was measured by self-labeling by respondents and a question about engagement in work for pay at present. Self-labeled housewives were excluded.

- A-BB/cm/mq/v/2/a Selfreport on 10 questions:
- During the past few weeks, did you ever feel? (yes/no)
 A Particularly excited or interested in something?
 B So restless that you couldn't sit long in a chair?
 C Proud because someone complimented you on something you had done?
 D Very lonely or remote from other people?
 E Pleased about having accomplished something?
 F Bored?
 G On top of the world?
 H Depressed or very unhappy?
 I That things were going your way?
 J Upset because someone criticized you?
- Answer options and scoring:
 yes = 1
 no = 0
 Summation:
 -Positive Affect Score (PAS): A+C+E+G+I
 -Negative Affect Score (NAS): B+D+F+H+J
 -Affect Balance Score (ABS): PAS minus NAS
 Possible range: -5 to +5
- Name: Bradburn's 'Affect Balance Scale' (standard version)
- A-BB/cm/mq/v/5/a Selfreport on 13 questions:
- "During the past four weeks have you ever felt....?" (yes/no)
- A Pleased about having accomplished something.
 B Things going my way.
 C Proud because someone complimented me on something I had done.
 D Particularly excited or interested in something I had done.
 E On top of the world.
 F A deep sense of joy.
 G Pleased because my life feels orderly and secure.
 H Bored.
 I Very lonely and remote from other people.
 J Jealous of somebody.
 K Angry with someone.

L Disappointed in myself..
M Unhappy about the small number of times I have pleasant feelings and experiences.

Answer options:

0 no

yes

If yes: How often did you feel so?

5 every day

4 several times a week

3 once a week

2 2 or 3 times a month

1 once a month

Summation:

- Positive Affect Score (PAS): Average A to G

- Negative Affect Score (NAS): Average H to M

- Affect Balance Score (AB): PAS minus NAS

Possible range: +42 tot -30

Name : Bradburn's "Affected Balance Scale' (modified version)

A-BB/cw/mq/v/4/d

Selfreport on 8 questions.

"During the past week, did you ever feel.....?"

A very lonely

B restless

C bored

D depressed

E on top of the world

F excited or interested

G pleased about accomplishment

H proud

Answer options:

1 never

2 once

3 several times

4 often

Summation:

-Positive Affect Score (PAS): E+F+G+H

-Negative Affect Score (NAS): A+B+C+D

-Affect Balance Score (ABS): PAS-NAS+13

Name: Bradburn's Affect Balance Scale (modified version)

A-BB/cw/mq/v/4/e

Selfreport on 9 questions:

We are interested in the way people are feeling these days. The following list describes some of the ways people feel at different times. Please indicate how often you felt each way during the last week.

How often last week did you feel?

A On the top of the world

B Very lonely or remote from other people

C Particularly excited or interested in something

D Depressed or very unhappy

E Pleased about having accomplished something

F Bored

G Proud because someone complimented you on something you had done

H So restless you couldn't sit long in a chair

I Vaguely uneasy about something without knowing why

Answer options:

- 0 not at all
- 1 once
- 2 several times
- 3 often

Summation:

Positive Affect Score (PAS): summed scores on A, C, E, G
Negative Affect Score (NAS): summed scores on B, D, F, H, I
Affect Balance Score (ABS): PAS minus NAS

Possible range: -15 tot +12

Name: Bradburn's 'Affect Balance Scale' (modified version)

A-BB/cw/mq/v/4/g

Selfreport on 10 questions:

"During the past few weeks, did you ever feel?"

- A Particularly excited or interested in something?
- B So restless that you couldn't sit long in a chair?
- C Proud because someone complimented you on something you had done?
- D Very lonely or remote from other people?
- E Pleased about having accomplished something?
- F Bored?
- G On top of the world?
- H Depressed or very unhappy?
- I That things were going your way?
- J Upset because someone criticized you?

Answer options and scoring:

- 1 not at all
- 2 sometimes
- 3 often
- 4 very often

Summation:

-Positive Affect Score (PAS): A+C+E+G+I
-Negative Affect Score (NAS): B+D+F+H+J
-Affect Balance Score (ABS): PAS minus NAS
Possible range: -15 to +15

Name: Bradburn's 'Affect Balance Scale' (adapted version)

A-BB/u/mq/v/3/a

Selfreport on 8 questions:

"Here is a list that describes some of the ways people feel at different times. How often do you feel each of these ways?"

- A Very lonely or remote from other people
- B Depressed or very unhappy
- C Bored
- D So restless you couldn't sit long in a chair
- E Vaguely uneasy about something without knowing why
- F On top of the world
- G Particularly excited or interested in something
- H Pleased about having accomplished something

Answer options:

- 0 never
- 1 sometimes
- 2 often

Summation:

Positive Affect Score (PAS): summed scores on F, G, H

Negative Affect Score (NAS): summed scores on A, B, C, D, E

Affect Balance Score (ABS): PAS minus NAS

Possible range -10 to +6 (transformed to ridits (0 - 1))

Name: Bradburn's 'Affect Balance Scale' (modified variation)

A-CP/g/rdt/ro/7/a

Teacher rating on single question:

1 Personal qualities are named and briefly annotated in this schedule.

2. In the columns under each pupil's name, place one of the marks for each of the qualities specified (+3, +2, +1, 0, -1, -2, -3) To avoid errors, please put the + sign as well as the -

'General tendency to be 'cheerful' (as opposed to being depressed and low spirited)

+3 very high compared to average

+2 distinctly above average

+1 slightly above average

0 average

-1 slightly below average

-2 distinctly below average

-3 lowest as compared to average

A-CP/g/sq/v/7/a

Selfreport on single question:

"Check one of the following groups of adjectives which best describes you."

7 full of deep joy, excitedly happy, enthusiastic, thrilled

6 cheerful, successful, optimistic, lighthearted

5 satisfied, comfortable, life goes smoothly, peaceful

4 contented at times and at other times discontented, life has both favorable and unfavorable features

3 restless, impatient, uncertain, dull, cross, confined

2 anxious, irritated, discouraged, disappointed, discontented

1 gloomy, miserable, a failure, no pleasure in anything

C-ASG/h/mq/v/5/a

Selfreport on 2 questions:

A. "How important was each of the following goals in life in the plans you made for yourself in early adulthood?"

- occupational success

- family life

- friendships

- richness of cultural life

- total service to society.

1 less important to me than to most people

2

3

4

5 of prime importance to me

B. "How successful have you been in the pursuit of these goals?"

1 little satisfaction in this area

2

3

4

5 had excellent fortune in this respect

Computation: General Satisfaction 5 is the quotient obtained by multiplying the planned goal (early adulthood) by the reported success in attaining that goal, adding the five of these multiplied areas and dividing them by the sum of the planned goals for each of the areas.

Pa.Sa + Pb.Sb + Pc.Sc + Pd.Sd + Pe.Se

Pa + Pb + Pc + Pd + Pe

Pa = planned goal a (1-5)

Sa = success goal a (1-5)

C-BW/c/sq/l/10/b

Selfreport on single question:

Here is a picture of a ladder. Suppose we say that the top of the ladder (10) represents the best possible life for you and the bottom (1) represents the worst possible life for you. Where on the ladder do you feel personally stand at the present time?

[10] best possible life for you

[9]

[8]

[7]

[6]

[5]

[4]

[3]

[2]

[1] worst possible life for you

Name: Cantril's self anchoring ladder rating of life (adapted version)

M-CO*/mq/v/3/a

Selfreport on 3 questions:

A

How often do you find yourself feeling disappointed about the ways things have turned out for you?

1 often

2 sometimes

3 hardly ever

B

All in all, how much happiness would you say you find in your life today?

1 almost none

2 some

3 a good deal

C

On the whole, how satisfied would you say you are with your life today?

1 not very satisfied

2 fairly satisfied

3 very satisfied

Summation: A+B+C/3

M-CO/u/mq/v/7/a

Selfreport on 3 questions:

A How do you feel about what you are accomplishing in life?

B How do you feel about your life as a whole?

C In general, how happy would you say you are these days?

Answer options:

7 completely satisfied

6 very satisfied

5 satisfied

4 satisfied - dissatisfied

3 dissatisfied

2 very dissatisfied

1 completely dissatisfied

Possible range 3 - 21

M-FH/c/sq/l/11/a

Selfreport on single question:

Lead item not reported.
11 the happiest I could be
10

5
4
3
2
1 the saddest I could be

M-FH/cm/sq/v/5/a

Selfreport on single question:

How would you rate the last month of your life. Was it a happy or an unhappy time for you.....?
5 very happy time
4 fairly happy time
3 happy nor unhappy
2 rather unhappy time
1 very unhappy time

O-DT/c/sq/v/7/aa

Selfreport on single question:

How do you feel about your life as a whole right now.....?
7 delightfull
6 very satisfying
5 satisfying
4 mixed
3 dissatisfying
2 very dissatisfying
1 terrible
No opinion

Name: Andrews & Withey's 'Delighted-Terrible Scale' (modified version)

O-DT/u/sq/v/7/a

Selfreport on single question:

How do you feel about your life as a whole.....?
7 delighted
6 pleased
5 mostly satisfied
4 mixed
3 mostly dissatisfied
2 unhappy
1 terrible

Name: Andrews & Withey's 'Delighted-Terrible Scale' (original version)

O-DT/u/sqt/v/7/a

Selfreport on single question, asked twice in interview:

How do you feel about your life as a whole.....?

- 7 delighted
- 6 pleased
- 5 mostly satisfied
- 4 mixed
- 3 mostly dissatisfied
- 2 unhappy
- 1 terrible

Summation: arithmetic mean

Name: Andrews & Withey's "Delighted-Terrible Scale" (original version)
Also known as Lehman's 'Global lifesatisfaction'

O-DT/u/sqt/v/9/a

Selfreport on single question asked twice

'How do you feel about your life as a whole?'

- 1 terrible
- 2 very unhappy
- 3 unhappy
- 4 mostly dissatisfied
- 5 mixed feelings
- 6 mostly satisfied
- 7 pleased
- 8 very pleased
- 9 delighted

O-HL/c/sq/n/7/a

Selfreport on single question:

Here are some words and phrases. We would like you to use these in describing how you feel about your present life..

- 1 unhappy
- 2
- 3
- 4
- 5
- 6
- 7 happy

(originally presented horizontally)

Item in Campbell's semantic differential scale

O-HL/c/sq/v/3/ac

Selfreport on single question:

Taken all together, how would you say things are these days? Would you say you are....?

- 1 not too happy
- 2 relatively happy
- 3 very happy

O-HL/c/sq/v/3/ag

Selfreport on single question:

Taken all things together, how would you say things are these days. Would you say you were....?

- 1 not too happy
- 2 pretty happy
- 3 very happy

O-HL/c/sq/v/5/c Selfreport on single question:
"Taking all things together, how would you say you are these days.....?"
5 extremely happy
4 very happy
3 happy
2 pretty happy
1 not too happy

O-HL/c/sq/v/5/h Selfreport on single question
'How happy are you now?'
5 very happy
4 happy
3 neither happy nor unhappy
2 unhappy
1 very unhappy

Original text in Danish:
'Hvor lykkelig er du for tiden?'
5 meget lykkelig
4 lykkelig
3 hverken eller
2 ullykkelig
1 meget ullykkelig

O-HL/g/sq/v/3/d Selfreport on single question:
Generally speaking, how happy would you say you are.....?
3 very happy
2 fairly happy
1 not too happy

O-HL/u/sq/v/2/a Selfreport on single question:
Are you happy with your life?
2 yes
1 no
- don't know

O-HL/u/sq/v/3/c Selfreport on single question:
"Would you say:.....?"
1 You are unhappy?
2 You are reasonably happy?
3 You are happy ?

O-HL/u/sq/v/7/a Selfreport on single question:
Considering your life as a whole, would you describe it as.....?
1 very unhappy
2
| unhappy
3
4 an even mixture of unhappiness and happiness
5
| happy
6
7 very happy
no opinion

O-HP/g/sq/ol/7/a

Selfreport on single question:

"Generally speaking are you a happy person.....?"

Responses were made on an open line scale, and were later coded in 7 categories:

- 1 very unhappy
- 2
- 3
- 4
- 5
- 6
- 7 very happy.

O-HP/u/sq/v/5/a

Selfreport on single question

To what extend do you consider yourself a happy person....?

- 5 very happy
- 4 happy
- 3 neither happy nor unhappy
- 2 not very happy
- 1 unhappy

O-SL?/?/sq/v/5/a

Selfreport on single question:

"..... satisfaction with life"
(full question not reported)

- 5 very satisfied
- 4 satisfied
- 3 don't know/satisfied
- 2 don't know/not satisfied
- 1 disappointed in life

O-SLL/c/sq/v/5/b

Selfreport on single question:

How satisfied are you with the life you lead these days.....?

- 5 very satisfied
- 4 fairly satisfied
- 3 neither satisfied nor dissatisfied
- 2 rather dissatisfied
- 1 very dissatisfied

O-SLu/c/sq/v/5/e

Selfreport on single question:

'How satisfied are you with your life now?'

- 5 very satisfied
- 2 satisfied
- 3 neither satisfied nor dissatisfied
- 2 dissatisfied
- 1 very dissatisfied

Original text in Danish:

'Hvor tilfreds er du med dit liv for tiden?'

- 5 meget tilfreds
- 4 tilfreds
- 3 hverken tilfreds eller utilfreds
- 2 utilfreds
- 1 meget utilfreds

O-SLu/g/sq/v/3/a

Selfreport on single question:

"On the whole, how satisfied would you say you are with your life.....?"

- 1 not very satisfied
- 2 fairly satisfied
- 3 very satisfied

O-SLW/c/sq/n/10/a

Selfreport on single question:

All things considered, how satisfied are you with your life as-a-whole these days?

- 1 dissatisfied
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 satisfied

O-SLW/c/sq/v/5/ea

Selfreport on single question:

How satisfied are you recently with your life as a whole.....?

- 1 completely dissatisfied
- 2 dissatisfied
- 3 neither satisfied nor dissatisfied
- 4 satisfied
- 5 completely satisfied

O-SLW/u/sq/n/7/e

Selfreport on single question:

How dissatisfied or satisfied are you with.. Your life overall?

- 1 not satisfied at all
- 2
- 3
- 4
- 5
- 6
- 7 completely satisfied

O-SQL/c/sq/v/5/b

Selfreport on single question:

How satisfied are you the quality of your life these days?

- 1 very dissatisfied
- 2 dissatisfied
- 3 neither nor
- 4 satisfied
- 5 very satisfied

Numbering reversed in original rating scale

O-Sum/c/mq/v/5/a

Selfreport on 3 questions:

A When you consider your present life as-a-whole, would you say you are....?

5 very happy

4 fairly happy

3 rather happy than unhappy

2 rather unhappy than happy

1 very unhappy

- DK/NA

B When you consider your present life as-a-whole, would you say you are.....?

5 very satisfied

4 fairly satisfied

3 rather satisfied than dissatisfied

2 rather dissatisfied than satisfied

1 fairly dissatisfied

- DK/NA

C How do you feel right now? Is your well-being.....?

5 very high

4 high

3 moderate

2 rather low

1 very low

- DK/NA

Summation: The summed scores were divided in three strata: low, medium and high quality of life

O-Sum/u/mq/*/0/a

Selfreport on 3 questions:

A. "Dissatisfied" and "Unhappy" responses on the Block (1961) Adjective Rating List.

B. Overall happiness. Single direct question: "Taking all things together, how would you say things are these days? Would you say you are"?"

3 very happy

2 pretty happy

1 not too happy

C. Present-year score on Life-Evaluation Chart, ranging from:

1 low

2

3

4

5

6

7

8

9 high

Appendix 2: Statistics used

<i>Symbol</i>	<i>Explanation</i>
AoV	<p>ANALYSIS of VARIANCE (ANOVA) Type: statistical procedure Measurement level: Correlate(s): nominal, Happiness: metric. In an ANOVA, the total happiness variability, expressed as the sum of squares, is split into two or more parts, each of which is assigned to a source of variability. At least one of those sources is the variability of the correlate, in case there is only one, and always one other is the residual variability, which includes all unspecified influences on the happiness variable. Each sum of squares has its own number of degrees of freedom (df), which sum up to $N_e - 1$ for the total variability. If a sum of squares (SS) is divided by its own number of df, a mean square (MS) is obtained. The ratio of two correctly selected mean squares has an F-distribution under the hypothesis that the corresponding association has a zero-value.</p> <p>NOTE: A significantly high F-value only indicates that, in case of a single correlate, the largest of the c mean values is systematically larger than the smallest one. Conclusions about the other pairs of means require the application of a Multiple Comparisons Procedure (see e.g. BONFERRONI's MULTIPLE COMPARISON TEST, DUNCAN's MULTIPLE RANGE TEST or STUDENT-NEWMAN-KEULS)</p>
B	<p>REGRESSION COEFFICIENT (non-standardized) by LEAST SQUARES (OLS) Type: test statistic Measurement level: Correlate: metric, Happiness: metric Theoretical range: unlimited</p> <p>Meaning: $B > 0$ A higher correlate level corresponds with, on an average, higher happiness rating. $B < 0$ A higher correlate level corresponds with, on an average, lower happiness rating. $B = 0$ Not any correlation with the relevant correlate.</p>
Beta	<p>(β) STANDARDIZED REGRESSION COEFFICIENT by LEAST SQUARES (OLS) Type: test statistic. Measurement level: Correlates: all metric, Happiness: metric. Range: [-1 ; +1]</p> <p>Meaning: $\beta > 0$ « a higher correlate level corresponds with, on an average, higher happiness rating. $\beta < 0$ « a higher correlate level corresponds with, on an average, lower happiness rating. $\beta = 0$ « no correlation. $\beta = + 1$ or -1 « perfect correlation.</p> <p>Remark: Mean of observations is subtracted from all observations if standardized.</p>
BMCT	<p>BONFERRONI's MULTIPLE COMPARISON TEST Type: statistical procedure Measurement level: Correlate: nominal, Happiness: metric</p> <p>Meaning: if the correlate is measured at c levels, the c mean happiness values can be ranked from low to high. A multiple comparison procedure judges for each of the $\frac{1}{2}c(c-1)$ pairs whether or not they differ significantly. A convenient way to represent the results is by ranking the c means and by underlining them in such a way that means which have a common underlining do NOT differ significantly.</p> <p>When added by us, this test is performed at the 95% confidence level for all the differences together.</p>

DM	<p>DIFFERENCE of MEANS Type: descriptive statistic only. Measurement level: Correlate: dichotomous, Happiness: metric Range: depending on the happiness rating scale of the author; range symmetric about zero.</p> <p>Meaning: the difference of the mean happiness, as measured on the author's rating scale, between the two correlate levels.</p>
DMt	<p>DIFFERENCE of MEANS AFTER TRANSFORMATION Type: descriptive statistic only. Measurement level: Correlate: dichotomous, Happiness: metric Theoretical range: [-10; +10]</p> <p>Meaning: the difference of the mean happiness (happiness measured at a 0-10 rating scale) between the two correlate levels.</p>
Dyx	<p>SOMERS' ASYMMETRIC TEST STATISTIC Type: test statistic Measurement level: Correlate: ordinal, Happiness: ordinal Range: [-1; +1]</p> <p>Meaning: Dyx = 0 «no rank correlation Dyx = +1 «strongest possible rank correlation, where high correlate values correspond with high happiness ratings. Dyx = -1 «strongest possible rank correlation, where high correlate values correspond with low happiness ratings.</p>
E ²	<p>CORRELATION RATIO (Elsewhere sometimes called h² or ETA) Type: test statistic Measurement level: Correlate: nominal or ordinal, Happiness: metric Range: [0; 1]</p> <p>Meaning: correlate is accountable for E² x 100 % of the variation in happiness. E² = 0 « knowledge of the correlate value does not improve the prediction quality of the happiness rating. E² = 1 « knowledge of the correlate value enables an exact prediction of the happiness rating</p>
G	<p>GOODMAN & Kruskal's GAMMA Type: test statistic Measurement level: Correlate: ordinal, Happiness: ordinal Range: [-1; +1]</p> <p>Meaning: G = 0 « no rank correlation G = +1 « strongest possible rank correlation, where high correlate values correspond with high happiness ratings. G = -1 « strongest possible rank correlation, where high correlate values correspond with low happiness ratings.</p>
OR	<p>ODDS RATIO Type: descriptive statistic only. Measurement level: Correlate: dichotomous, Happiness level: dichotomous Range: nonnegative unlimited</p> <p>Meaning: OR = 1 « no association at all; OR = 0 or infinite « at least one level of the correlate allows an error-free prediction of the happiness.</p>

r	<p>PRODUCT-MOMENT CORRELATION COEFFICIENT (Also "Pearson's correlation coefficient' or simply 'correlation coefficient')</p> <p>Type: test statistic.</p> <p>Measurement level: Correlate: metric, Happiness: metric</p> <p>Range: [-1; +1]</p> <p>Meaning:</p> <p>$r = 0$ « no correlation ,</p> <p>$r = 1$ « perfect correlation, where high correlate values correspond with high happiness values, and</p> <p>$r = -1$ « perfect correlation, where high correlate values correspond with low happiness values.</p>
rpc	<p>PARTIAL CORRELATION COEFFICIENT</p> <p>Type: test statistic</p> <p>Measurement level: Correlate: metric, Happiness: metric</p> <p>Range: [-1; +1]</p> <p>Meaning: a partial correlation between happiness and one of the correlates is that correlation, which remains after accounting for the contribution of the other influences, or some of them, to the total variability in the happiness scores.</p> <p>Under that conditions</p> <p>$rpc > 0$ « a higher correlate level corresponds with a higher happiness rating,</p> <p>$rpc < 0$ « a higher correlate level corresponds with a lower happiness rating,</p>
SNR	Statistic Not Reported
T	<p>TSCHUPROW'S T</p> <p>Type: test statistic.</p> <p>Measurement level: Correlate: nominal, Happiness: ordinal</p> <p>Range: $[0 ; \text{SQRT}[\frac{\min(r,c)-1}{\max(r,c) - 1}]]$, c and r being the numbers of colums resp. rows in a cross tabulation.</p> <p>Meaning:</p> <p>$T = 0$ « no association</p> <p>$T \rightarrow 1$ « strongest possible association.</p> <p>NOTE: sometimes the square value is reported instead !</p>
t.	<p>t-STATISTIC (Student's t-statistic)</p> <p>Type: symmetric standard test statistic.</p> <p>One parameter: n (= number of degrees of freedom (df) ; range df: [1; + infinite)</p> <p>Range for t: unlimited</p> <p>Meaning : the test statistic is the ratio of a difference between a statistic and its expected value under the null hypothesis and its (estimated) standard error with n degrees of freedom.</p> <p>The critical values of its probability distribution are tabulated extensively in almost any textbook on Statistics.</p>
tau	<p>GOODMAN & Kruskal's TAU</p> <p>Type: descriptive statistic only.</p> <p>Measurement level: Correlate: nominal, Happiness: ordinal</p> <p>Range: [0; +1]</p> <p>Meaning:</p> <p>$\tau = 0$ « knowledge of the correlate value does not improve the prediction quality of the happiness rating.</p> <p>$\tau = 1$ « knowledge of the correlate value enables a perfect (error-free) prediction of the happiness rating.</p>

tb

KENDALL'S RANK CORRELATION COEFFICIENT TAU-B

Type: test statistic

Measurement level: Correlate: ordinal, Happiness: ordinal

Range: [-1; +1]

Meaning:

tb = 0 « no rank correlation

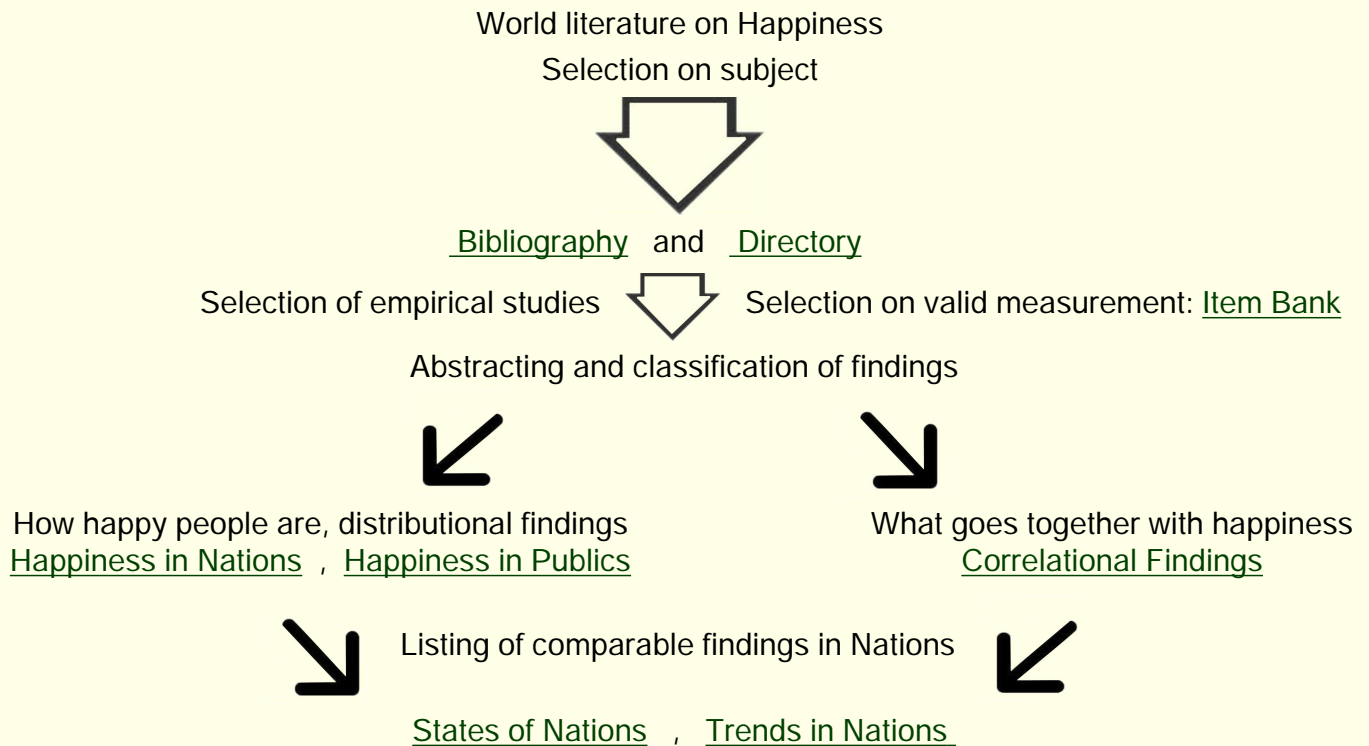

tb = 1 « perfect rank correlation, where high values of the correlate correspond with high happiness ratings.

tb = -1 « perfect rank correlation, where high values of the correlate correspond with low happiness ratings.

Appendix 3: About the World Database of Happiness

Structure of the collections

The World Database of Happiness is an ongoing register of scientific research on the subjective enjoyment of life. It brings together findings that are scattered throughout many studies and provides a basis for synthetic work.

Size of the collections

1226 Happiness measures (Item Bank)

4258 Nations surveys in 206 Nations

149 Distinguished publics in 1199 studies

12032 Correlational findings in 1196 studies

Appendix 4 Further Findings in the World Database of Happiness

Main Subjects	Subject Description	Number of Studies
A1	ACTIVITY: LEVEL (how much one does)	58
