### **The TRAPIST Study**

#### **A multicentre randomized placebo controlled clinical trial of trapidil for prevention of restenosis after coronary stenting, measured by 3-D intravascular ultrasound**

**P. W. Serruys<sup>1</sup>, D. P. Foley<sup>1</sup>, M. Pieper<sup>2</sup>, J. A. Kleijne<sup>3</sup> and P. J. de Feyter<sup>1</sup> on behalf of the TRAPIST investigators**

<sup>1</sup>*Department of Interventional Cardiology, Thoraxcenter, Erasmus Medical Center, Rotterdam, The Netherlands;*  
<sup>2</sup>*Heartcenter Bodensee, Kreuzlingen, Switzerland; and* <sup>3</sup>*Cardialysis, Rotterdam, The Netherlands*

It is regretted that an error occurred in one of the tables in the above article, published in *European Heart Journal* 2001; 22: 1938–47. In Table 4 (p. 1943), under the heading “Intention-to-treat without imputation” under the heading “Placebo” the value for the luminal volume should be 171 mm<sup>3</sup> instead of 117 mm<sup>3</sup>. One additional investigator/centre participated: Gerald S. Werner, Friedrich-Schiller-University, Jena, Germany.
