

Table of Contents:

Preface vii

Chapter 1: Utilitarian Treatment of Heterogeneous Populations 1

1.1 Studying Treatment Response to Inform Treatment Choice 1

1.2 The Planning Problem 3

1.3 Practices that Limit the Usefulness of Research on Treatment Response 11

Chapter 2: The Selection Problem 19

2.1 Treatment Choice Using the Empirical Evidence Alone 20

2.2 Monotone Treatment Response 37

2.3 Exclusion Restrictions 49

Chapter 3: Treatment Using Experimental Data 56

3.1 The Expected Welfare (Risk) of a Statistical Treatment Rule 56

3.2 Using a Randomized Experiment to Evaluate an Innovation 62

3.3 Using Covariate Information with Data from a Randomized Experiment 74

Chapter 4: The Selection Problem with Sample Data 108

4.1 Sample-Analog Rules Using the Empirical Evidence Alone 109
