

Stellingen behorend bij dit proefschrift:

Acoustics provide insight in the neonatal brain and cerebral perfusion

The incidence of asymptomatic cerebral sinovenous thrombosis in preterm infants is higher than previous expected.

– this thesis

The neonatal circle of Willis is competent to prevent brain injury.

– this thesis

Serial cranial ultrasound including color Doppler can detect flow problems at an early stage.

– this thesis

The incidence of brain injury during neonatal ECMO in the Netherlands is comparable with incidence in international literature.

– this thesis

During the neonatal period serial advanced cranial ultrasound is adequate in the detection of brain injury, however lesions in the fossa posterior can be missed.

– this thesis

Medicine is a science of uncertainty and an art of probability.

– William Osler

It is much more important to know what sort of a patient has a disease than what sort disease a patient has.

– Hippocrates

To know that we know what we know, and that we do not know what we do not know, that is true knowledge.

– Confucius

Omdat het brein zich grotendeels bezighoudt met remming van activiteit, getuigt het van een goede hersenfunctie liever lui dan moe te zijn.

– Dr. J.P.P. van Vugt

Mijn kinderen hebben het verstand van hun moeder, want ik heb het mijne nog.

– mijn vader; Jan Raets

Life is what happens to you, while you are busy making other plans.

– John Lennon
