Corrigendum

The authors regret that the sentence beginning on line 12 of first column on page 516, relating to Reference 43 is misleading. The sentence reads:

“At the same time however, Gal-1 is found overexpressed on the stromal tissues of long term pancreatic cancer survivors [43], indicating that the prognostic significance of Gal-1 expression is not entirely clear”.

However, the authors would like to correct this as:

“At the same time, Gal-1 is found underexpressed on the stromal tissues of long term pancreatic cancer survivors [43], indicating that the prognostic significance of Gal-1 expression is promising”.

The authors would like to apologise for any inconvenience caused.
