

Erratum  
Case-control studies

A.W. Hoes

*Department of Epidemiology and Biostatistics and Department of General Practice, Erasmus University, Rotterdam, Netherlands*

[Neth. J. Med. 47 (1995) 36–42]

The last sentence below Table 1 (page 38) should be:

Odds ratio of lung cancer in smoking compared to non-smoking women =  $ad/bc = (63.0\% \cdot 54.6\%) / (45.4\% \cdot 37.0\%) = 0.344/0.168 = 2.0$ .

In the Appendix, the last sentence of the first column (page 41) should be:

Moreover, if the sampling fraction  $n/N$  or  $n'/N'$  is known, the true rates can be obtained.
