1. Multislice computed tomography has improved the performance of spiral CT with the introduction of 2-row and 4-row MSCT scanners. (This thesis)

2. Integrating a bolus chaser into the administration protocol for contrast media used during non-invasive coronary artery angiography with 16-row MSCT preserves optimal intra-vascular attenuation, while decreasing the volume of contrast media needed by 35%. (This thesis)

3. Progressively higher vascular attenuation is obtained with higher iodine concentrations. (This thesis)

4. Editing the electrocardiogram in 16-row multidetector Computed Tomography coronary angiography reduces the negative impact of mild heart rhythm irregularities on image quality. (This thesis)

5. MSCT-CA is a reliable technique to non-invasively detect coronary stenoses in patients with stable angina and atypical chest pain. (This thesis)

6. Anyone who conducts an argument by appealing to Authority is not using his intelligence, he is just using his memory. (Leonardo da Vinci)

7. Science can purify religion from error and superstition. Religion can purify science from idolatry and false absolutes. (Pope John Paul II, Karol Wojtyla)

8. Man will occasionally stumble over the truth, but usually manages to pick himself up, walk over or around it, and carry on. (Winston S Churchill)

9. Differences between human beings will elevate and kill the human genre.

10. Music is the only language that does not require translation.

11. When you do something very interesting, many people may want to be “involved”. ... whatever that means.

Filippo Cademartiri
