

Cerebellar Involvement in Ataxia and Generalized Epilepsy

Cerebellaire Betrokkenheid bij Ataxie en Gegeneraliseerde Epilepsie

Proefschrift

ter verkrijging van de graad van doctor aan de
Erasmus Universiteit Rotterdam
op gezag van
Rector Magnificus

Prof.dr. H.A.P. Pols,

en volgens besluit van het College voor Promoties

De openbare verdediging zal plaatsvinden op

woensdag 29 april 2015
om 11:30 uur

Lieke Kros
geboren te Eindhoven

Promotiecommissie

Defense Committee

Promotor:	Prof.dr. C.I. de Zeeuw
<i>Advisor</i>	
Overige leden:	Dr. T.J.H. Ruigrok
<i>Reading committee</i>	Prof.dr. J. van der Steen
	Prof.dr. A.M.J.M. van den Maagdenberg
Copromotor:	Dr. F.E. Hoebeek

Table of contents

1. Introduction	5
1.1. The cerebellum	5
1.2. Cerebellar ataxia caused by calcium channel mutations	10
1.3. Cerebellar involvement in generalized epilepsy	13
1.4. Scope of thesis	20
1.5. References	22
1.6. Table	32
2. Purkinje cell-specific ablation of Ca_v2.1 channels is sufficient to cause cerebellar ataxia in mice	33
2.1. Introduction	34
2.2. Materials and methods	35
2.3. Results	40
2.4. Discussion	48
2.5. References	52
2.6. Table	55
3. Cerebellar output controls the occurrence of generalized spike-and-wave discharges in epileptic cerebral cortex	57
3.1. Introduction	58
3.2. Materials and methods	59
3.3. Results	69
3.4. Discussion	78
3.5. References	82
3.6. Tables	86
4. An implementation of a wavelet-based seizure detection filter suitable for realtime closed-loop epileptic seizure suppression	93
4.1. Introduction	94
4.2. Background	94
4.3. Implementation	95
4.4. Conclusions	101
4.5. References	102
4.6. Tables	103

5. Purkinje cell signatures and synchronicity in generalized epilepsy	105
5.1. Introduction	106
5.2. Materials and methods	107
5.3. Results	112
5.4. Discussion	120
5.5. References	124
5.6. Tables	128
6. Mechanisms underlying cerebellar control of thalamocortical oscillations unraveled	131
6.1. Introduction	132
6.2. Materials and methods	133
6.3. Results	138
6.4. Discussion	142
6.5. References	144
6.6. Tables	146
7. Discussion	149
7.1. Cerebellar ataxia can be caused by Purkinje cell-specific calcium channelopathy	149
7.2. Reciprocal modulation of GSWD related cerebellar and thalamocortical activity	151
7.3. Implications for future research	154
7.4. References	156
8. Appendix	161
8.1. Summary	161
8.2. Samenvatting	162
8.3. Curriculum Vitae	163
8.4. PhD portfolio	165
9. Acknowledgements	166
