Quantitative Imaging Assessment of Bioresorbable Scaffolds: Preprocedural Sizing and Acute Performance

1. Vessel sizing, acute performance and patient outcome after implantation of bioresorbable scaffolds. The main part of this thesis relates to angiographic and intra coronary imaging assessment of bioresorbable scaffolds. [This thesis]
2. In the early Absorb studies, several technical failure and adverse events are documented. Acute vessel closure, due to dislodgement of a coronary stent during deployment or an early stent thrombosis, is a rare but potentially fatal complication of percutaneous coronary intervention. [This thesis]
3. Considering the use of the Absorb scaffolds in bifurcation lesions, we review the reappraisal angiographic assessment. [This thesis]
4. To explore long term assessment of bioresorbable scaffolds beyond angiography. [This thesis]
5. If I wasn't hard, I wouldn't be alive. If I couldn't ever be gentle, I wouldn't deserve to be alive. [Raymond Chandler]
6. Determine that the thing can and shall be done, and then we shall find the way. [Abraham Lincoln]
7. Our greatest weakness lies in giving up. The most certain way to succeed is to try just one more time. [Thomas A. Edison]
8. He who would learn to fly one day must first learn to stand and walk and run and climb and dance; one cannot fly into flying. [Friedrich Nietzsche]
9. Where there's hope, there's life. It fills us with fresh courage and makes us strong again. [Anne Frank]
10. I will prepare and some day my chance will come. [My father]
